Maps For Empire:

The Imperial Map James R. Akerman, 2009-03 Maps from virtually every culture and period convey our tendency to see our communities as the centre of the world if not the universe and by implication as superior to anything beyond our boundaries This study examines how cartography has been used to prop up a variety of imperialist enterprises Maps for Empire British Library, Great Britain. War Office, 1992 This comprehensive listing of the maps produced by the Intelligence Department of the War Office between 1881 when the Department's output started to be numbered in sequence and 1905 The maps reveal the preoccupations of the government during the height of the British Empire **The New Nature of Maps** J. B. Harley, 2002-10-03 In these essays the author draws on ideas in art history literature philosophy and the study of visual culture to subvert the traditional positivist model of cartography and replace it with one grounded in an iconological and semiotic theory of the nature of maps **The New Map of Empire** S. Max Edelson, 2017 In 1763 British America stretched from Hudson Bay to the Keys from the Atlantic to the Mississippi Using maps that Britain created to control its new lands Max Edelson pictures the contested geography of the British Atlantic world and offers new explanations of the causes and consequences of Britain's imperial ambitions before the Revolution Mapping, Connectivity, and the Making of European Empires Luis Lobo-Guerrero, Laura Lo Presti, Filipe dos Reis, 2021-06-29 This volume seeks to collectively explore how maps can be used to understand the making of European empires how the epistemological practices embedded in them can be approached to understand European imperial space making and how maps can be seen as representations of imaginaries of connectivity Rehearsing mapping's past and its multifarious relations with European imperial orders is not merely an historical exercise to contribute to a global history of cartography What binds the several interventions is rather an awareness that looking at a particular moment of the past with composite methodologies and interdisciplinary gazes may harbour potential discoveries on the context embedded relations between mapping connectivity and European empire to which we are not yet attuned By exploring the imaginaries of the world in the mapping of Western modern empires the book also links to the burgeoning literature on the history of international relations and empire The emphasis on empires serves here as an important corrigendum for IR's state centrism and Eurocentrism and contributes to further erode the myth of Westphalia **Special Maps of Persia 1477-1925** Cyrus Alai, 2023-01-30 This volume complements the best seller and award winning *General Maps of Persia* praised by Dr John H. Bert Chief of the Geography and Map Division of the Library of Congress This carefully researched work is a must have item in any collection of research materials on the history of cartography I cannot wait for the arrival of subsequent volumes of further great scholarship and readable map reproductions on other detailed aspects of the history of mapping of Persia Encouraged by numerous commending reviews in five languages English French German Persian and Armenian and gratifying testimonials from many renowned authorities in the fields of History of Cartography and Iranian Studies Cyrus Alai continued his research and collected further material to produce the

present volume Special Maps of Persia 1477 1925 covering every map of that region other than general maps Thus it not only complements the General Maps of Persia it is also a completely new volume in its own right and providing an even closer insight into the region The book is divided into nine chapters Historical Maps District Maps Frontier Maps Town Maps Political Maps etc Like the preceding volume it has a dual character being both a carto bibliography and a mapping history of Persia It contains 761 map entries of which 409 are illustrated mostly in colour Concise related historical accounts precede every chapter and section and essential historical notes are also supplied within many of the map entries Undoubtedly this book is a treasure house not just for cartographers but also historians social historians linguists and archaeologists
