Marcel Breuer Sun Shadow The Philosoph:

Marcel Breuer: Sun and Shadow. The philosophy of an architect. Editing and notes by Peter Blake, etc. [With illustrations, including a portrait.]. Marcel Breuer, 1956 *Marcel Breuer* John Poros, 2022-09-09 This book tracks the development of Marcel Breuer's aesthetic clash between uniformity and singularity through the detailed examination of his seminal buildings. Each chapter examines a specific building and puts into context Breuer's other work and the contemporary movements architects of the post war era such as Surrealism Brutalism and structural expressionism. The buildings examined include the UNESCO Headquarters in Paris France of 1958 the IBM Research Center in Le Gaude France of 1962 the Annunciation Priory in Bismark North Dakota of 1963 and the Atlanta Central Library of 1980. Marcel Breuer's approach to design was inspired by the Spanish phrase *sol y sombra* sun and shadow. Sun and shadow meant for Breuer that a juxtaposition of contrasts was necessary: light glass walls and heavy concrete masses lifted over voids and serial precast construction resting on sculptural columns became hallmarks of Breuer's buildings. By creating an architecture of juxtaposition Breuer's work can be interpreted as a surrealist *recontre* as fueling a new architectural condition. A critical evaluation of Marcel Breuer's work this book is written for graduate students researchers and academics interested in his work and how it shaped the architecture of the post war era. *Marcel Breuer: Sun and Shadow* Marcel Breuer, 1956

Marcel Breuer: sun and shadow, the philosophy of an architect P. Blake, 1956 **Shadow** Simon Unwin, 2020-02-18 Each of these *Analysing Architecture Notebooks* is devoted to a particular theme in understanding the rich and varied workings of architecture. They can be thought of as addenda to the foundation volume *Analysing Architecture* which first appeared in 1997 and has subsequently been enlarged in three further editions. Examining these extra themes as a series of Notebooks rather than as additional chapters in future editions allows greater space for more detailed exploration of a wider variety of examples whilst avoiding the risk of the original book becoming unwieldy. Shadows may be insubstantial but they are nevertheless an important element in architecture. In prehistoric times we sought shade as a refuge from the hot sun and chilling rain. Through history architects have used shadows to draw to mould form to paint pictures to orchestrate atmosphere to indicate the passing of time as well as to identify place. Sometimes shadow can be the substance of architecture. Breuer's Bohemia James Crump, 2021-09-14 Breuer's *Bohemia* explores a vibrant period of midcentury modern design and culture as seen through the influential New England houses designed by Marcel Breuer for his circle of clients and friends. The iconic twentieth century architect Marcel Breuer was a prolific designer of residential architecture which is often overshadowed by his early renown as a Bauhaus furniture maker and his large scale projects. Breuer's *Bohemia* surveys the houses he designed in Connecticut and Massachusetts from the 1950s through the 70s many of which were commissioned by a few culturally progressive clients chiefly Rufus and Leslie Stillman and Andrew and Jamie Gagarin who coalesced around him into a dynamic social circle. Included in this scene were prominent cultural figures such as

Alexander Calder Arthur Miller Francine du Plessix Gray Philip Roth and William Styron and more marking a unique intersection of postwar architecture art and letters The publication of Breuer's *Bohemia* coincides with the feature length documentary of the same name by author and filmmaker James Crump exploring Breuer's explosive residential practice on the East Coast Through original research and interviews the voices of principal characters from Breuer's circle and notable figures from the field of architecture help tell the story of Breuer's collaborations with his friends and clients breathing new life into the history of the rich cultural atmosphere of which they all played a vital part Heavily illustrated with vintage and contemporary photographs as well as rarely seen archival materials Breuer's *Bohemia* is a unique glimpse of a twentieth century milieu that produced an aesthetic intellectual and sometimes sybaritic community during a fertile period of American design and culture

The Making of a Building Albena Yaneva, 2009 Drawing on rare ethnographical material of architects at work at the Office for Metropolitan Architecture of Rem Koolhaas in Rotterdam in the period 2001-2004 this text offers a novel account of the social and cognitive complexity of architecture in the making

The Space Within Robert McCarter, 2016-11-15 Alvar Aalto once argued that what mattered in architecture wasn't what a building looks like on the day it opens but what it is like to live inside it thirty years later In this book architect and critic Robert McCarter persuasively argues that interior spatial experience is the necessary starting point for design and the quality of that experience is the only appropriate means of evaluating a work after it has been built McCarter reveals that we can't really know a piece of architecture without inhabiting its spaces and we need to counter our contemporary obsession with exterior views and forms with a renewed appreciation for interiors He explores how interior space has been integral to the development of modern architecture from the late 1800s to today and he examines how architects have engaged interior space and its experiences in their design processes fundamentally transforming traditional approaches to composition Eloquently placing us within a host of interior spaces he opens up new ways of thinking about architecture and what its goals are and should be

Blake,1955 **Outdoor Domesticity** Ricardo Devesa,2022-02-04 Trees have been deliberately connected with houses since they were introduced as a prominent part of architectural design The relationships of contiguity between houses and trees have existed since ancient times However at the end of the 19th century those links became explicit in the design process as the house emerged as one of the fundamental architectural programs and as the result of an increasing sensibility towards environmental aspects and the landscape The first part of this publication is to present a collection of exemplary five houses that evinced explicit relationships with pre existing trees The five twentieth century projects are La Casa B Rudofsky 1969 Cottage Caesar M Breuer 1951 Ville La Roche Le Corbusier P Jeanneret 1923 Villa Pepa J Navarro Baldeweg 1994 and Hexenhaus A P Smithson 1984 2002 The second part of the book contributes three theoretical concerns for the contemporary project those ones which are established in the process with respect to time place and outdoor domesticity in modern western housing One of these theoretical contributions establishes that any house located on a site finds a significant place in conjunction with the preexisting trees The second contribution describes the effects in terms of time in addition to spatial considerations which trees can contribute to the architectural project Finally the establishment of these connections between architecture and trees enlarges the idea of the house the tree serves to draw the surrounding environment into the house and as a result becomes an intrinsic part of the house itself **Sites Unseen** Dianne Harris,D. Fairchild Ruggles,2007-05-27 Sites Unseen challenges conventions for viewing and interpreting the landscape using visual theory to move beyond traditional practices of describing and classifying objects to explore notions of audience and context While other fields such as art history and geography have engaged poststructuralist theory to consider vision and representation the application of such inquiry to the natural or built environment has lagged behind This book by treating landscape as a spatial psychological and sensory encounter aims to bridge this gap opening a new dialogue for discussing the landscape outside the boundaries of current art criticism and theory As the contributors reveal the landscape is a widely adaptable medium that can be employed literally or metaphorically to convey personal or institutional ideologies Walls gates churchyards and arches become framing devices for a staged aesthetic experience or to suit a sociopolitical agenda The optic stimulation of signs symbols bodies and objects combines with physical acts of climbing and walking and sensory acts of touching smelling and hearing to evoke an overall vision of landscape Sites Unseen considers a variety of different perspectives including ancient Roman visions of landscape the framing techniques of a Moghul palace and a contemporary case study of Christo s The Gates as examples of human attempts to shape our sensory cognitive and emotional experiences in the landscape Lessons from Modernism Kevin Bone,2014-05-13 This valuable reference for today s green building movement examines twentieth century modern architecture including buildings by Le Corbusier and Oscar Niemeyer through the lens of sustainability The hottest topics in contemporary architectural design and architectural history the focus on sustainability and the evaluation of the modern movement meet in Lessons from Modernism a partnership with The Cooper Union that explores the ways in which the

straightforward functional approach of modernist design creates environmentally sensitive solutions Lessons from Modernism provides new insights into 25 buildings by a diverse selection of architects including Frank Lloyd Wright Paul Rudolph Jean Prouv and Arne Jacobsen and demonstrates how these architects integrated environmental concerns into their designs Buildings are located across the United States Central and South America Cuba Japan and more and include houses art centers commercial buildings and civic buildings Lessons from Modernism is an affordable reference work for all interested in how architecture intersects with the green movement pairing full descriptions of all buildings with analytical essays featuring charts of climate zones and solar movement and concluding with a comprehensive chronology that details how environmental consciousness evolved throughout the twentieth century **Peformative Architecture** Branko Kolarevic, Ali Malkawi, 2005-07-08 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

Experiments in Modern Living Milton Cameron, 2012-05-01 When a group of brilliant young scientists arrived in Australia s national capital after World War II to take up leading roles in the establishment of national research institutions they commissioned Australia s leading architects to design their private houses The houses that resulted from these unique collaborations rejected previous architectural styles and wholeheartedly embraced modernist ideologies and aesthetics The story of how these progressive clients contributed to the innovative design of their houses brings fresh insights to mid twentieth century Australian domestic architecture and to Canberra s rich cultural history **Critical Readings** Ruth Verde Zein, 2020-09-01 The fifth book of the collection Latin America Thoughts presents a collection of Ruth Verde Zein s articles on architectural theory history and critic arranged around three themes Teaching and research case studies and panoramas Essays that share the belief that architectural design process is both creation of the new and connection with the relevant tradition and that being an eminently practical activity its completion and renewal only occurs when it relates to conceptual issues **An Architecture Notebook** Simon Unwin, 2000 A companion volume to the author s successful text Analysing Architecture this book follows the same approach and format to explore conceptual themes in architecture further

Photography, Reconstruction and the Cultural History of the Postwar European City Tom Allbeson, 2020-11-16 Examining imagery of urban space in Britain France and West Germany up to the early 1960s this book reveals how photography shaped individual architectural projects and national rebuilding efforts alike Exploring the impact of urban photography at a pivotal moment in contemporary European architecture and culture this book addresses case studies spanning the destruction of the war to the modernizing reconfiguration of city spaces including ruin photobooks about bombed cities architectural photography of housing projects and imagery of urban life from popular photomagazines as well as internationally renowned projects like UNESCO s Paris Headquarters Coventry Cathedral and Berlin s Ged chtniskirche This book reveals that the ways of seeing shaped in the postwar years by urban photography were a vital aspect of not only discourses on the postwar city but also debates central to popular culture from commemoration and modernization to

democratization and Europeanization This book will be a fascinating read for researchers in the fields of photography and visual studies architectural and urban history and cultural memory and contemporary European history *The Oxford Dictionary of Architecture* James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available
