No Entanglements:

Surreal Entanglements Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction. In contrast to universalist and essentializing ways of responding to new material realities, VanderMeer's work invites us to re-imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today: the ecological, technological, aesthetic, epistemological, and political challenges of life in the Anthropocene era. Situating these messy, multi-scalar material complexities of life in close relation to their ecological material and colonialist histories, his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight. The collection measures VanderMeer's work as a new kind of speculative surrealism, his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio-technologies. The first collection to survey academic engagements with VanderMeer, this book brings together scholars in the fields of environmental literature, science fiction, genre studies, American literary history, philosophy of technology, and digital cultures to reflect on the environmentally, culturally, aesthetically, and politically central questions his fiction poses to predominant understandings of the Anthropocene.

The Entanglements of Nathaniel Hawthorne Samuel Coale, 2011 The process of Hawthorne's scholarly canonization and the ongoing critical and cultural discourse on his works. Nathaniel Hawthorne, celebrated in his own day for sketches that now seem sentimental, came only gradually to be fully appreciated for what his friend Herman Melville diagnosed as the power of blackness in his fiction: the complex moral grappling with sin and guilt. By the 1850s, Hawthorne had already been accepted into the American canon, and since then his works, especially *The Scarlet Letter*, have remained ubiquitous in American culture. Along with this has come an explosion of Hawthorne criticism, from New Criticism, New Historicism, and Cultural Studies to queer theory, feminist scholarship, and transatlantic criticism that shows no signs of slowing. This book charts Hawthorne's canonization and the ongoing critical discourse, drawing on two senses of entanglement. First, the sense from quantum physics which allows us to see what were once seen as strict dualisms in Hawthorne as more complex relations where the poles of the would-be dualities play off of and affect each other. Second, the sense of critics being tangled up in, caught up in Hawthorne: the man and his work, and in previous critics' views of him. Charting the course of Hawthorne criticism as well as his place in popular culture, this book sheds light also on the culture in which his reception has occurred. Samuel Chase Coale is Professor of American Literature and Culture at Wheaton College, Norton, Massachusetts.

Cities of Entanglements Barbara Heer, 2019-09-24 How do people live together in cities shaped by inequality? This comparative ethnography of two African cities, Maputo and Johannesburg, presents a new narrative about social life in cities often described as sharply divided. Based on the ethnography of entangled lives unfolding in a township and in a suburb in

Johannesburg in a bairro and in an elite neighborhood in Maputo the book includes case studies of relations between domestic workers and their employers failed attempts by urban elites to close off their neighborhoods and entanglements emerging in religious spaces and in shopping malls Systematizing comparison as an experience based method the book makes an important contribution to urban anthropology comparative urbanism and urban studies

Human Entanglement Theory Christian Aspalter, 2024-07-27 This innovative book has combined the latest drive to integrate the findings and principles of quantum mechanics and quantum technology especially here quantum computing into the flamboyant world of social sciences Starting with Friedrich Nietzsche as a role model especially his Human All too Human the book explores the world of interpersonal and intrapersonal intercultural and transhistorical human communication This book uses an innovative experiential and abductive research design The philosophy inspired by Nietzsche meets new inspirations stemming from quantum mechanics and quantum computing in particular Building on derived guiding principles of fuzzy randomness parallelity and universality with communication words and feelings as the least common denominator the book arrives at the formation of a new quantum inspired theory called the Theory of Human Entanglement where entanglements are causal forces for human communication and hence human actions that either instigate and propel or inhibit and stifle human communication and thus human actions Human entanglements are diverse they are complex and accumulative in nature They operate in a multi dimensional space encompassing language usage including their hidden connotations and culturally constructed truths such as hidden notions of good and evil allowed and forbidden cultural traditions and limitations governance institutions court rulings and practices particular usages of common sense local neighborhood culture and practices socio economic and environmental forces and limitations personal situations and experiences personal thoughts feelings memories and aspirations and much more The theory may serve as starting point for greater causality focus in research design and applications across all social sciences and far beyond especially when dealing with high number or infinite number of potentially causal and causal variables as well as their aggregate forces i e probability based vector forces On top artificial intelligence applications quantum information and quantum finance applications for example may contribute to the further development of human entanglement theory and vice versa

Marion Crawford** Francis Marion Crawford, 1900 Food Gels Peter Harris, 2012-12-06 The food technologist who wishes to produce a gelled product is faced with two basic options for achieving the desired effect whether to use a protein or a polysaccharide Although a gel can be formed by either a protein or a polysaccharide the resultant gels have different characteristics Polysaccharide gels are characterised by their fine texture and transparency which is achieved at a low polymer concentration They can be formed by heating and cooling pH adjustment or specific ion addition Protein gels are characterised by a higher polymer concentration 5-10% and are formed almost exclusively by heat denaturation Before reaching a final decision the technologist must take a number of factors into consideration The purpose of this book is to help the technologist in his choice by providing fundamental practical information in one book on the properties of gels and factors which influence them for both types of biopolymer To help the reader each chapter is wherever possible organised in the same way so that for example information on structure will always be available in section 2 The examples in the Applications section of each chapter are not meant to be exhaustive but to illustrate the various ways in which the particular polymer can be used to form a gelled product **Handbook of Polymer Crystallization** Ewa

Polymer Rheology: Theory and Practice Y.G. Yanovsky,2012-12-06 The present book is devoted to a rapidly developing field of science which studies the behavior of viscoelastic materials under the influence of deformation the rheology of polymers Rheology has long been treated as the theoretical foundation of polymer processing and from this standpoint it is difficult to overestimate its importance in practice Rheology plays an important role in developing our ideas on the nature of viscoelastic behavior in connection with the structural features of polymers and composites based on them This expands the possibilities of employing rheological methods to characterize a variety of materials and greatly magnifies the interest in this field of research The rheological properties of polymer systems are studied experimentally chiefly under conditions of shear and tensile strains One explanation is that many aspects of polymer material processing are associated with the stretching of melts or a combination of shear and tensile strains In scientific investigations either periodic or continuous conditions of shear deformation are employed Each mode provides widespread information In periodic deformation most attention is generally given to conditions with low deformation amplitudes that do not alter the structure of the polymer system during an experiment the region of linear deformation conditions Here the viscoelastic parameters are generally determined with respect to the frequency Continuous deformation involves considerable strains and may be attended by significant reversible and irreversible changes in the structure of a polymer **Red Jade** Henry

Adopting the Track of Expression: An Mental Symphony within **No Entanglements**

In some sort of eaten by displays and the ceaseless chatter of immediate interaction, the melodic elegance and psychological symphony produced by the prepared word often disappear in to the backdrop, eclipsed by the persistent noise and interruptions that permeate our lives. But, located within the pages of **No Entanglements** a charming fictional treasure overflowing with fresh thoughts, lies an immersive symphony waiting to be embraced. Constructed by a masterful musician of language, that interesting masterpiece conducts readers on an emotional journey, skillfully unraveling the concealed songs and profound impact resonating within each cautiously crafted phrase. Within the depths of the poignant assessment, we will investigate the book is central harmonies, analyze their enthralling writing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
