No More The Battle Against Human Rights Violations:

No More David Matas,1996-07-26 The late twentieth century witnessed massive human rights violations What can to done to stop them How can the root causes be addressed The issue of human rights has become the secular religion of our time Yet violations continue to occur in a gross and flagrant manner Author David Matas examines examples of human rights violations and suggests what individuals private organizations governments and the UN can do about this worldwide problem He also focuses on how Canada stands p to international human rights standards and provides a thorough analysis of the contribution of Amnesty International BLOODY HARVEST ,2016-05-12 The Coalition to Investigate the Persecution of the Falun Gong in China CIPFG has asked us to investigate allegations of organ harvesting of Falun Gong practitioners in China The coalition is a non governmental organization registered in Washington D C U S A with a branch in Ottawa Canada The request came formally by letter dated May 24 2006 attached as an appendix to this report The request was to investigate allegations that state institutions and employees of the government of the People s Republic of China have been harvesting organs from live Falun Gong practitioners killing the practitioners in the process In light of the seriousness of the allegations as well as our own commitment to respect for human rights we accepted the request Aftershock David Matas,2005-09-03 Verbal attacks against Israel for human rights violations have turned into physical attacks against the Jewish community worldwide How has that happened This book attempts to explain the phenomenon Anti Zionists whose primary goal is destruction of the State of Israel use accusations of the worst forms of human rights violations against Israel to delegitimize the state These accusations criminalize the Jewish population worldwide for actual or presumed support of the State of Israel The contemporary international human rights system and the existence of the State of Israel are twin legacies of the Holocaust The failure of the human rights system to prevent attacks on Israel and the Jews is an aftershock of the Holocaust

Ethiopia and the State of Democracy United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Africa and Global Health,2007 **The Rohingya Crisis** Manzoor Hasan,Syed Mansoob Murshed,Priya Pillai,2022-12-30 This edited volume addresses the broader aspects of the political and social landscape human rights violations accountability and advocacy efforts and humanitarian challenges faced by the Rohingya from Myanmar The work brings together different voices of legal policy and international affairs experts to construct a framework which addresses the complex and nuanced issues comprising the Rohingya crisis Although there is recognition that international legal mechanisms are moving forward more quickly than anticipated these processes do not constitute standalone sustainable solutions Myanmar s myriad political social cohesion development and security challenges are likely to persist even as justice and accountability processes move forward Thus this book project is premised on the consensus that the international community should complement international justice mechanisms by looking toward creative and multi faceted approaches in addition to justice and accountability This timely contribution will be of interest to academics researchers development practitioners and human

rights organizations **No More War** Dan Kovalik,2020-04-14 Kovalik helps cut through the Orwellian lies and dissembling which make so called humanitarian intervention possible Oliver Stone War is the fount of all the worst human rights violations including genocide and not its cure This undeniable truth which the framers of the UN Charter understood so well is lost in today s obsession with the oxymoron known as humanitarian intervention No More War How the West Violates International Law by Using Humanitarian Intervention to Advance Economic and Strategic Interests sets out to reclaim the original intent of the Charter founders to end the scourge of war on the heels of the devastation wrought by WWII The book begins with a short history of the West s development as built upon the mass plunder of the Global South genocide and slavery and challenges the prevailing notion that the West is uniquely poised to enforce human rights through force This book also goes through recent humanitarian interventions carried out by the Western powers against poorer nations e g in the DRC Congo and Iraq and shows how these have only created greater human rights problems including genocide than they purported to stop or prevent No More War reminds the reader of the key lessons of Nuremberg that war is the primary scourge of the world the root of all the evils which international law seeks to prevent and eradicate and which must be prevented The reader is then taken through the UN Charter and other human rights instruments and their emphasis on the prevention of aggressive war Power and Principle Christopher Rudolph,2017-04-18 On August 21 2013 chemical weapons were unleashed on the civilian population in Syria killing another 1 400 people in a civil war that had already claimed the lives of more than 140 000 As is all too often the case the innocent found themselves victims of a violent struggle for political power Such events are why human rights activists have long pressed for institutions such as the International Criminal Court ICC to investigate and prosecute some of the world s most severe crimes genocide war crimes and crimes against humanity While proponents extol the creation of the ICC as a transformative victory for principles of international humanitarian law critics have often characterized it as either irrelevant or dangerous in a world dominated by power politics Christopher Rudolph argues in *Power and Principle* that both perspectives are extreme In contrast to prevailing scholarship he shows how the interplay between power politics and international humanitarian law have shaped the institutional development of international criminal courts from Nuremberg to the ICC Rudolph identifies the factors that drove the creation of international criminal courts explains the politics behind their institutional design and investigates the behavior of the ICC Through the development and empirical testing of several theoretical frameworks *Power and Principle* helps us better understand the factors that resulted in the emergence of international criminal courts and helps us determine the broader implications of their presence in society *The Ottoman, Serbian, Montenegrin, Macedonian, Greek and Bulgarian crimes against the Albanian People* Petrit Latifi,2025-04-03 The following publication is a collection of academic publications articles studies and works from many authors reporters and historians both Albanian and from other countries The purpose of this publication is to collect sources and references part of Albanian History and to share knowledge of atrocities and war crimes

committed against Albanians through out history All the material on this book has been cited properly with links authors names titles and dates

Still Moving Morton Weinfeld, 2018-04-24 The aftermath of World War II was a period of massive Jewish migration More than a million Jews came to settle in the new state of Israel hundreds of thousands moved to North America Australia and France while tens of thousands resettled themselves elsewhere in Europe and the world Emigration was in turn paralled by large scale movement among second generation Jews from the great urban centers to the suburbs Until recently it has seemed as though the Jewish people had in the words of the Bible reached a situation of rest and landed inheritance However there is considerable evidence that Jews are still moving from the former Soviet Union to and from Israel and within nations where they have been long resident Still Moving examines the causes and character of contemporary migration in Israel and throughout the Diaspora The contributors to this volume adopt a cross cultural comparative approach Part 1 establishes the context of the new migration globally with specific concentration on its effects on the institutions of Israeli democracy Part 2 surveys immigration to Israel in the 1990s with particular emphasis on the wave of Russian emigres since the fall of the Soviet Union Internal migration from rural to urban centers is also explored Migration to the Diaspora is covered in part 3 The Jewish identity of Soviet Jews is compared to their American and Canadian counterparts Economic performance and problems of multigenerational families among emigres are also treated as are the controversies surrounding politically motivated emigration from Israel Part 4 focuses on the changing nature of the Diaspora and its relations with Israel Beyond its grounding in Jewish culture and history Still Moving frames questions that are central to understanding contemporary migration in general Does immigration accelerate or retard the abilities of host countries to restructure economically How does greater ethnic diversity affect the social and cultural life of cities What factors help immigrants integrate into the wider community Does immigration contribute to the creation of a marginalized underclass Still Moving will be essential reading for historians sociologists Jewish studies specialists and policy analysts

Protection Against Genocide Neal Riemer, 2000-03-30 Without succumbing to utopian fantasies or realistic pessimism Riemer and his contributors call for strengthening the key institutions of a global human rights regime developing an effective policy of prudent prevention of genocide working out a sagacious strategy of keenly targeted sanctions political economic military judicial and adopting a guiding philosophy of just humanitarian intervention They underscore significant changes in the international system the end of the Cold War economic globalization the communications revolution that hold open the opportunity for significant if modest movement toward strengthening key institutions The essays explore key problems in working toward prevention of genocide They highlight the existence of considerable early warning of genocide and emphasize that the real problem is a lack of political will in key global institutions Sanctions especially economic sanctions may punish a genocidal regime but at the expense of innocent civilians Thus more clearly targeted sanctions are seen as essential The argument on behalf of a standing police force to deal with the crime of genocide as they show is powerful and

controversial powerful because the need is persuasive controversial because political realists question its cost and political feasibility Implementing a philosophy of just humanitarian intervention requires an appreciation of the difficulties of interpreting those principles in difficult concrete situations A permanent international criminal tribunal to deter and punish genocide they argue will put into place a much needed component of a global human rights regime A thoughtful analysis for scholars and students of international politics and law and human rights in general

Idealism, Metaphysics and Community William Sweet, 2017-07-12 This title was first published in 2001 Idealism Metaphysics and Community examines the place of idealism in contemporary philosophy and its relation to problems of metaphysics political thought and the study of the history of philosophy Following an extensive introduction by the editor and drawing on the work of the Canadian idealist Leslie Armour the book is divided into three main parts Part 1 focuses on F H Bradley Part 2 examines metaphysical issues and idealism such as the realism anti realism debate the relation of classical and idealist metaphysics rational psychology time and eternity and the divine Part 3 draws on idealism to address contemporary concerns in ethical theory political philosophy social philosophy and culture and the history of philosophy Presenting new insights into the work of classical and contemporary authors this book provides a better understanding of classical idealism and addresses important areas of contemporary philosophical social and political concern

New Contexts of Canadian Criticism Ajay Heble, Donna Palmateer Pennee, J.R. Struthers, 1997-04-18 Times change lives change and the terms we need to describe our literature or society or condition what Raymond Williams calls keywords change with them Perhaps the most significant development in the quarter century since Eli Mandel edited his anthology Contexts of Canadian Criticism has been the growing recognition that not only do different people need different terms but the same terms have different meanings for different people and in different contexts Nation history culture art identity the positions we take discussing these and other issues can lead to conflict but also hold the promise of a new sort of community Speaking of First Nations people and their literature Beth Brant observes that Our connections are like the threads of a weaving While the colour and beauty of each thread is unique and important together they make a communal material of strength and durability New Contexts of Canadian Criticism is designed to be read to work in much the same manner

The United Nations Human Rights Council Rosa Freedman, 2013-03-12 The United Nations Human Rights Council was created in 2006 to replace the UN Commission on Human Rights The Council's mandate and founding principles demonstrate that one of the main aims at its creation was for the Council to overcome the Commission's flaws Despite the need to avoid repeating its predecessor's failings the Council's form nature and many of its roles and functions are strikingly similar to those of the Commission This book examines the creation and formative years of the United Nations Human Rights Council and assesses the extent to which the Council has fulfilled its mandate International law and theories of international relations are used to examine the Council and its functions Council sessions procedures and mechanisms are analysed in depth with particular consideration given to whether

the Council has become politicised to the same extent as the Commission Whilst remaining aware of the key differences in their functions Rosa Freedman compares the work of the Council to that of treaty based human rights bodies The author draws on observations from her attendance at Council proceedings in order to offer a unique account of how the body works in practice The United Nations Human Rights Council will be of great interest to students and scholars of human rights law and international relations as well as lawyers NGOs and relevant government agencies

Leading to the 2003 Iraq War Alexander G. Nikolaev, 2006-02-04 A telling analysis of the pre war media debate around the globe which set the stage for the 2003 Iraq war By concentrating on the pre war coverage this group of scholars engages in a more open discussion of the issues than would take place during wartime and uncovers the implications for each country s position

on international concerns *Human Rights* Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic **Congressional Record** United States. Congress, 2000 **The Canadian Forum** , 1995 Includes critical reviews
