Of Kinkajous, Capybaras, Horned Beetles, Seladangs, and the Oddest and Most Wonderful Mammals, Insects, Birds, and Plants of Our World Jeanne K. Hanson, Deane Morrison, 1992-01 Describes 150 of the world's most unusual plants and animals

The World's Oddest and Most Wonderful Mammals, Insects, Birds and Plants Jeanne Hanson, Deane

Morrison, 2005-05 **A Guide to the Carnivores of Central America** Carlos L. de la Rosa, Claudia C. Nocke, 2010-06-28

Carnivores such as pumas, jaguars and ocelots have roamed the neotropical forests of Central America for millennia. Enshrined in the myths of the ancient Maya, they still inspire awe in the region's current inhabitants as well as in the ecotourists and researchers who come to experience Central America's diverse and increasingly endangered natural environment. This book is one of the first field guides dedicated to the carnivores of Central America. It describes the four indigenous families: wild cats, raccoons and their relatives, skunks and their relatives, and wild canids and their individual species that live in the region. The authors introduce each species by recounting a first person encounter with it, followed by concise explanations of its taxonomy, scientific name, English and Spanish common names, habitat, natural history, and conservation status. Range maps show the animal's past and current distribution. While Claudia Nocke's black and white drawings portray it visually, the concluding chapter looks to the carnivores' future, including threats posed by habitat destruction and other human activities, and describes some current conservation programs. Designed for citizens of and visitors to Central America as well as specialists, this book offers an excellent introduction to a group of fascinating, threatened, and still imperfectly understood animals.

Dinoverse Mike Fredericks, 1999-11-05 I was a teenage T Rex. Survival of the fittest has always been the rule at Wetherford Junior High. So when Bertram Phillips's science fair project sends his mind back 67 million years, he's well prepared. After all, as the class brain, he's learned how to avoid predators. But Bertram's not prepared for his new tanklike, spike-backed Ankylosaurus form. He's become a dinosaur, and so have three other fellow students: Mike, the star quarterback who's never had much of a killer instinct, must wrestle with the hunger pangs of a T Rex; Candayce, the beauty queen, is forced to suffer the thunder thighs of a Leptoceratops; while the morose Janine now soars blissfully on the wings of a Pterodactyl. With prehistoric perils at every turn, Bertram, Mike, Candayce, and Janine band together to find their way back home in what were once their own backyards. Theirs is an amazing, wildly comical, and very human journey through the Age of Dinosaurs.
