textbook provides a comprehensive overview of the state of the art knowledge of breast cancer management for the modern breast surgeon. It covers all aspects of multidisciplinary care including primary breast and axillary surgery reconstruction and oncoplastic techniques, external beam radiotherapy and newer techniques such as tomotherapy, intraoperative radiotherapy and brachytherapy. In addition, systemic therapies including chemotherapy, the latest biological targeted therapies and endocrine therapies are covered. Readers can find out about other important aspects of breast cancer such as genetics, screening, imaging and long term health among others. Chapters take the reader through the basics up to the highest levels of knowledge in an easy to understand format with management algorithms to aid clinical care, generous referencing of the best literature and figures and photographs to illustrate each section. Published with the official approval of the European Society of Surgical Oncology (ESSO) and the European Society of Breast Cancer Specialists (EUSOMA), the book is written by a panel of recognised leaders in the field and is an indispensable guide for the practicing breast specialist and senior specialists in training wishing to update their knowledge with the latest trends or polish off their training before accreditation.

Core Clinical Skills for OSCEs in Surgery Ged Byrne, Jim Hill, Tim Dornan, Paul A. O'Neill, 2007-07-13. This title is directed primarily towards health care professionals outside of the United States. It is intended to help you learn how best to approach a clinical problem from a surgical perspective. The text provides an insight into how a surgeon might manage a particular problem and consequently how to prepare for an OSCE that might entirely or in part consist of surgical OSCE stations. Although some of the stations in the book could easily be found in a medicine OSCE, they are presented here from the perspective of both a student seeking to demonstrate well developed surgical skills within an OSCE setting and a specialist surgical examiner. Presents a series of clinical problems with an emphasis on the surgical approach to the management. Appropriate for all students needing to demonstrate their clinical expertise in surgical cases. A companion book to the highly commended *Core Clinical Skills for OSCEs in Medicine*.

Surgery of the Breast Scott L. Spear, 1998. This illustrated text atlas covers the current procedures for surgical management of the breast including biopsy, lumpectomy, quadrantectomy, mastectomy, breast reconstruction, reduction, mammoplasty, mastopexy and augmentation mammoplasty. It addresses oncologic, reconstructive and aesthetic issues including management of patients with breast diseases, breast reconstruction, reshaping and reducing the breast and aesthetic breast surgery. The editors offer tips on diagnostic approach, goals of treatment, surgical techniques and potential pitfalls.
