Against the Tide W. Jay Moon,Craig Ott,2019-09-01 With increased globalization and modernization reaching into the furthest corners of the earth also comes the influence of secularization These three tides of influence impact traditional religious beliefs practices and institutions in significant ways Some modernizing societies see religion on the decline while others find it thriving in surprising ways This collection of essays presents the opportunities and the challenges of secularization for the mission of the Church with hopeful signs and reassurance that God is still at work in a secularizing world Readers will find both analysis and guidance that will assist the Church in an informed missional engagement with secularization in a variety of contexts starting with North America then Europe Asia and Africa Each local church and mission organization must discern the appropriate missional response for evangelism discipleship congregational life and social involvement To be Against the Tide means regaining your voice as a church on mission informed by your context and inspired by the responses of others in theirs Embodiments of Cultural Encounters Sebastian Jobs, Gesa Mackenthun,2011 The meeting of members of different cultures frequently conceptualized in abstract terms always involves the meeting of human bodies This volume brings together contributions by scholars of various disciplines that address physical aspects and effects of cultural encounters in historical and present day settings Bodies were and are not only markers of cultural identity and difference endlessly inscribed and represented as the body politic or the exotic other as battlegrounds of cross cultural

signification and identification bodies are also potential agents of change While some essays address the elusiveness of the real or material body forever lost behind a veil of textual and visual representation others analyze the performative effect of such representations their function of disciplining colonized bodies and subjects by integrating them into Western systems of cultural signification and scientific classification Yet as the volume also shows formerly colonized people far from subjecting themselves completely to Western discourses of physical discipline retain traditional body practices whether in food culture religious ritual or musical performances Such local reinscriptions escape the grip of Western culture and transform the global semantics of the body
