Blood for Thought Mira Balberg, 2024-05-14 *Blood for Thought* delves into a relatively unexplored area of rabbinic literature the vast corpus of laws regulations and instructions pertaining to sacrificial rituals Mira Balberg traces and analyzes the ways in which the early rabbis interpreted and conceived of biblical sacrifices reinventing them as a site through which to negotiate intellectual cultural and religious trends and practices in their surrounding world Rather than viewing the rabbinic project as an attempt to generate a nonsacrificial version of Judaism she argues that the rabbis developed a new sacrificial Jewish tradition altogether consisting of not merely substitutes to sacrifice but elaborate practical manuals that redefined the processes themselves radically transforming the meanings of sacrifice its efficacy and its value

The History of Blood Transfusion in Sub-Saharan Africa William H. Schneider,2013-07-15 This first extensive study of the practice of blood transfusion in Africa traces the history of one of the most important therapies in modern medicine from the period of colonial rule to independence and the AIDS epidemic The introduction of transfusion held great promise for improving health but like most new medical practices transfusion needed to be adapted to the needs of sub Saharan Africa for which there was no analogous treatment in traditional African medicine This otherwise beneficent medical procedure also created a royal road for microorganisms and thus played a central part in the emergence of human immune viruses in epidemic form As with more developed health care systems blood transfusion practices in sub Saharan Africa were incapable of detecting the emergence of HIV As a result given the wide use of transfusion it became an important pathway for the initial spread of AIDS Yet African health officials were not without means to understand and respond to the new danger thanks to forty years of experience and a framework of appreciating long standing health risks The response to this risk detailed in this book yields important insight into the history of epidemics and HIV AIDS Drawing on research from colonial era governments European Red Cross societies independent African governments and directly from health officers themselves this book is the only historical study of the practice of blood transfusion in Africa
