Question Of Imperialism The Political Economy Of Dominance And Dependence:

The question of imperialism Benjamin J. Cohen, 1976 Theories Of Comparative Political Economy Ronald H Chilcote, 2018-02-05 Professor Chilcote has written an extraordinary comprehensive comparison of mainstream liberal views and alternative radical views of history development class government and democracy This book will be extremely valuable to both students and scholars Howard Sherman University of California Riverside Theories of Comparative Political Economy builds on the proposition that the study of politics and economics has evolved into political economy in a number of significant ways and that the new issues and ideas that became prominent in the 1980s and 1990s will carry on into the new millennium This book is a sequel to Chilcote's Theories of Comparative Politics Westview 1981 which was substantially revised and published in a second edition in 1994 **Advanced Introduction to International Political Economy** Benjamin J. Cohen, 2019 This book now in its second edition provides a comprehensive and up to date survey of the field of International Political Economy Although the subject's roots go far back the modern field has developed along sharply divergent paths followed by different clusters of scholars Today there are multiple versions of IPE each with its own distinct personality This book illuminates the full array of analytical styles and traditions to be found across the globe in this rich field of study *European Conquest and the Rights of Indigenous Peoples* Paul Keal, 2003-08-28 Paul Keal examines the historical role of international law and political theory in justifying the dispossession of indigenous peoples as part of the expansion of international society He argues that paradoxically law and political theory can now underpin the recovery of indigenous rights At the heart of contemporary struggles is the core right of self determination and Keal argues for recognition of indigenous peoples as peoples with the right of self determination in constitutional and international law and for adoption of the Draft Declaration on the Rights of Indigenous Peoples by the General Assembly He asks whether the theory of international society can accommodate indigenous peoples and considers the political arrangements needed for states to satisfy indigenous claims The book also questions the moral legitimacy of international society and examines notions of collective guilt and responsibility **Infrastructure Investments in Developing Economies** Giang Dang, Low Sui Pheng, 2014-10-18 This book aims to provide knowledge on how infrastructure is planned and built in a typical developing country and what key variables are there in the system limiting the efficient use of public investments in infrastructure The book begins with a comprehensive literature review on construction and economic development and trade and economic development The focus of the book is on the case of Vietnam with lessons drawn for other developing economies The book employs the mixed use of data to provide a stronger basis for analysis and interpretation of related government policies Based on the research findings the book recommends significant capacity building work for Vietnam to develop capacities that would remove constraints on the efficient use of public investments in infrastructure The general principles of significant capacity building work which are useful for policy implications are introduced in the book Analysts academics

public and private communities in developing countries can adopt the research findings as guiding principles to bring about changes in their current use of public investments in infrastructure thus supporting their trade and economic growth in the long term **The Routledge Handbook of Russian International Relations Studies** Maria Lagutina,Natalia

Lake,Robert Powell,2020-05-05 The strategic choice approach has a long pedigree in international relations In an area often rent by competing methodologies editors David A Lake and Robert Powell take the best of accepted and contested knowledge among many theories With the contributors to this volume they offer a unifying perspective which begins with a simple insight students of international relations want to explain the choices actors make whether these actors be states parties ethnic groups companies leaders or individuals This synthesis offers three new benefits first the strategic interaction of actors is the unit of analysis rather than particular states or policies second these interactions are now usefully organized into analytic schemes on which conceptual experiments may be based and third a set of methodological bets is then made about the most productive ways to analyze the interactions Together these elements allow the pragmatic application of theories that may apply to a myriad of particular cases such as individuals protesting environmental degradation governments seeking to control nuclear weapons or the United Nations attempting to mobilize member states for international peacekeeping Besides the editors the six contributors to this book all distinguished scholars of international relations are Jeffry A Frieden James D Morrow Ronald Rogowski Peter Gourevitch Miles Kahler and Arthur A Stein Their work is an invaluable introduction for scholars and students of international relations economists and government decision makers *The Globalization of Terrorism* Ihekwoaba D.
