Exploring the Religious Life Rodney Stark, 2004-04 Though religion is for most people one of the most important aspects of their lives social scientists and other observers of human society too often misunderstand and misrepresent the nature and role of religion in history and in daily life From the supposed decline of religious attitudes in Western Europe and the venal motivations attributed to the Christian Crusaders to the very definition of religion personal biases and an inadequate grasp of relevant data have led to the formulation and propagation of unsupportable views on the sacred In *Exploring the Religious Life* Rodney Stark boldly overturns much received wisdom within the social sciences about religion drawing on a wide range of sources to reassess a diverse selection of topics in the study of religion In his first essay Stark addresses the carelessness with which scholars use the term religion and the conviction that the belief in divinity evolved from the practice of magic in primitive cultures In subsequent chapters he challenges the widespread attitude among social scientists that religion is nothing more than a mask for material realities and examines the effectiveness of religious doctrines in attracting converts and influencing individuals uncovers the surprising prevalence of upper class asceticism in medieval Christianity and explores the relationship between gender piety and criminal activity Divine revelation is a central aspect of many religions and Stark next applies empirical research to the phenomenon to assess its meaning in Judaism Christianity Islam and Mormonism He then turns to the confusion between faith and practice in debates over the secularization of the developed world before investigating the validity of the classic proposition within the social sciences that religion functions to sustain the moral order He does so examining the correlation between criminal behavior and depth of religious belief Stark concludes with an essay on the ingenious methods he uses to unearth data about the popularity of new religions in California and northern Europe the decline of Christian Science in America the spread of Christianity in the Roman world and the execution patterns during the antiwitchcraft frenzy of Enlightenment Europe Together the essays that constitute *Exploring the Religious Life* offer an engaging introduction to Rodney Stark's provocative insights and a fearless challenge to academic perceptions about religion's place in history society and private life *The Routledge International Handbook of Sex Therapy and Religion* Caleb Jacobson, 2025-09-30 *The Routledge International Handbook of Sex Therapy and Religion* is an invaluable resource for clinicians religious scholars clergy and anyone interested in the intersection of religion and sexual health By weaving together psychological theories religious ethics and cultural competence this volume provides a holistic approach to sex therapy that honors the faith and values of diverse religious traditions This handbook is

Ethnicity and Religion Joseph Ruane,Jennifer Todd,2014-06-11 Religion has regained political prominence in the twenty first century and not least for the manner in which it intersects with ethnicity Many ethnic conflicts have a strong religious dimension and religion appears as a powerful force for mobilisation solidarity and violence Religion and ethnicity can each act as a powerful base of identity group formation and communal conflict They can also overlap with ethnic and religious boundaries coinciding partially or completely internally nested or intersecting This volume maps the different forms of intersection cases where religion is prioritised in private life and ethnicity in public where each coexists in tension in political life and where the distinctions reinforce each other with dynamic effects It maps the different patterns with case studies and comparisons from Ireland Northern Ireland France Zimbabwe Ghana and Malaysia It shows how ordinary people construct their solidarities and identities using both ethnic and religious resources This opens up analysis of the socially transformative as well as politically

antagonistic potential of religion in situations of ethnic division This book was published as a special issue of *Ethnopolitics*

Exploring Catholic Faith in Shakespearean Drama David Torevell, Brandon Schneeberger, Luke Taylor, 2025-03-31 This pioneering study investigates the connection between Shakespeare and Catholic education Its authors contend that Shakespeare's plays explore Catholic understandings of human life in ways that remain relevant for Catholic educational institutions today Through chapters focusing on ethical and existential themes love desire the body marriage virginity evil finitude jealousy and lies the authors demonstrate Shakespeare's wide ranging engagement with early modern Catholic belief and practice At the same time they argue that Shakespeare's treatment of Catholic faith through imaginative literature rather than magisterial discourse and dramatically rather than didactically provides a pedagogical model for contemporary teachers The first volume to trace the relationship between a philosophy of Catholic education and Shakespearean drama it will appeal strongly to all those working in Catholic educational settings particularly those tasked with strengthening the mission of their institution as well as to scholars and researchers of literacy education religious education and to those interested in the dynamic between education and drama *Explorations in the anthropology of religion* W. E. A. van Beek, J. H. Scherer, 2013-12-14 This Festschrift is dedicated to Prof Dr J van Baal on the occasion of his retirement from the chair of cultural anthropology at the University of Utrecht The essays presented here are written by fellow scholars in recognition of his outstanding contributions to the field of anthropology In order to arrange the papers around a theme that has never ceased to fascinate van Baal we have asked the contributors to concentrate on a religious subject Within this broad area no specific topics have been solicited and the authors mainly fellow anthropologists and students of religion have been able to pursue their own personal interests in the articles Nevertheless when the papers were collected we found it possible to group them under three headings each of which represents a facet of van Baal's enduring interests Of course some overlap is inevitable as it is in any categorisation of heterogeneous items The topics of the three sections by no means represent an exhaustive inventory of all fields van Baal has successfully explored The focus on religion necessarily leaves out many problems van Baal has actively occupied himself with during his many sided career Thus the academic stance of the Festschrift in no way pays tribute to his prolonged concern with administration
