Turkey the place of so called traditional religions in Africa the display of Roman Catholic crucifixes in Italian classrooms and the ability of American religious organizations to be free of employment laws in their treatment of clergy This volume brings together classic articles which are otherwise difficult to access enables students to study key articles side by side and provides instructors with a valuable teaching resource

Parapsychology and Religion Everton de Oliveira Maraldi, 2021-06-29 Parapsychology and Religion is perhaps the most controversial research area in the psychology of religion However in recent decades psychology of religion has witnessed a growing literature bearing on ontological issues including parapsychological topics such as distant healing and near death experiences This book argues that despite the methodological and theoretical controversies that still surround the field of parapsychology the findings of research on alleged anomalous processes can inform the study of religious spiritual experiences Psychological literature on the paranormal is critically reviewed and it is argued that it became less a scientific endeavor and more an ideological program devised to denigrate paranormal believers and experiencers This volume explores how an open minded dialogue between parapsychology and psychology of religion might help us move beyond the present ideological disputes and reviews the complex relations between parapsychology and religion over time as well as their implications for interdisciplinary research on religion and spirituality
