Corneliu C. Simut,2010-02-18 This book presents the main teachings of Edward Schillebeeckx widely considered one of the most important Catholic thinkers of the twentieth century Schillebeeckx is known for his radical departure from traditional theology which he saw as no longer relevant to the modern world Because today s world has been shaped by a process of secularization heavily based on reason and progress in science technology economics urbanism etc modern people seek relevant answers to their deep existential questions that can be explained rationally In his quest to foster relevant and meaningful answers for today s world Schillebeeckx changed the traditional metaphysical content of Christian theology into explanations that radically reinterpret traditional Christian doctrines Primarily the supernatural essence of Christianity is given up as irrelevant and is replaced by a natural perspective on the world In Schillebeeckx s thoroughly historical and truly immanent theology God is man s terrestrial future Christ the symbol of universal human values and the Church is identified with the world as those communities which share these universal human values Schillebeeckx is convinced that these explanations emptied of metaphysical content can help today s people understand their existence in a new relevant and meaningful way **Religions in the Modern World** Linda Woodhead,2002 This comprehensive guide offers an unrivalled introduction to recent work in the study of religion from the religious traditions of Asia and the West to new forms of religion and spirituality such as New Age With an historical introduction to each religion and detailed analysis of its place in the modern world Religions in the Modern World is ideal for newcomers to the study of religion It incorporates case studies and anecdotes text extracts chapter menus and end of chapter summaries glossaries and annotated further reading sections Topics covered include religion colonialism and postcolonialism religious nationalism women and religion religion and globalization religion and authority the rise of new spiritualities **Science, Society, and the Search for Life in the Universe** Bruce M. Jakosky,2022-10-18 Are we alone in the universe As humans are we unique or are we part of a greater cosmic existence What is life s future on Earth and beyond How does life begin and develop These are age old questions that have inspired wonder and controversy ever since the first people looked up into the sky With today s technology however we are closer than ever to finding the answers Astrobiology is the relatively new but fast growing scientific discipline that involves trying to understand the origin evolution and distribution of life within the universe It is also one of the few scientific disciplines that attracts the public s intense curiosity and attention This interest stems largely from the deep personal meaning that the possible existence of extraterrestrial life has for so many Whether this meaning relates to addressing the Big Questions of our existence the possibility of encountering life on other planets or the potential impact on our

understanding of religion there is no doubt that the public is firmly vested in finding answers In this broadly accessible introduction to the field Bruce Jakosky looks at the search for life in the universe not only from a scientific perspective but also from a distinctly social one In lucid and engaging prose he addresses topics including the contradiction between the public s fascination and the meager dialogue that exists between those within the scientific community and those outside of it and what has become some of the most impassioned political wrangling ever seen in government science funding

Religion and the Modern World John Herman Randall, John Herman Randall (Jr.), 1929 **Systematics Critical and Constructive 1** Ronald R. Ray, 2018-08-15 This labor of love distills Dr Ron Ray s lifetime reflections on the truth and meaning of the gospel of Jesus Christ Gathered in one volume is an abundant harvest from the best of twentieth century systematic theology Beginning students will find here an informative and clear introductory text Working pastors will receive a refresher course to steady and strengthen a ministry of integrity and joy Preachers will benefit from the author s recommendation of the topical biblical sermon an approach that leads to contemporary topics for textually based scriptural preaching while reinvigorating topical preaching with scriptural sturdiness With both conviction and transparency Ray welcomes his readers into a thoughtful conversation about why and how the Christian message still matters today In the process we also see firsthand how and why systematic theology can still matter today for those entrusted with proclaiming the good news of Jesus Christ James F Kay Dean and Vice President of Academic Affairs Professor Princeton Theological Seminary This critical and constructive perspective interacts with such fields as biblical studies Old and New Testament theology hermeneutics and other philosophy Ray s synthesis arises out of a unique theological and pastoral pilgrimage as a minister in the United States and as a missionary theologian and Christian ethicist in Nigeria and Kenya As one might expect from a scholar who did the first PhD dissertation on Jacques Ellul Ray writes with a forthright probing honest style He criticizes authors at highly specific points but often demonstrates indebtedness to the same scholars He is deeply informed by the New Testament and secondarily by the Old Testament yet insists that interpretive dishonesty is no Christian virtue Leicester R Longden Assoc Professor of Evangelism and Discipleship Emeritus University of Dubuque Theological Seminary

Proceedings of the 2025 11th International Conference on Humanities and Social Science Research (ICHSSR 2025) Bootheina Majoul, Abdullah Abdullah, Sharifah Faizah Syed Mohammed, Fonny Dameaty Hutagalung, 2025-08-10 This is an open access book Review ICHSSR was established in 2015 and the past five sessions have all been successfully published and indexed by CPCI we wholeheartedly welcome colleagues worldwide to join us at this momentous conference held in Beijing **Chemistry in Modern Life** Svante Arrhenius, 1925 **TECHNO CRITICAL MANIFESTO** Lawrence J. Terlizese, 2020-03-10 A lot of confusion exists over the right ethical approach to new technologies Do we embrace it all as an unmitigated good Or should we take a more cautionary route that seeks to evaluate our own technology use and its impact on society from a critical perspective A new awareness of both the dangers and potential benefits new technologies offer will

guide us through a morass of ethical questions We stress limits because it is here that the traditional dialectic of question and answer has broken down even talking about technological restraint is met with near universal scorn Nevertheless it is through the negative side of this debate that the antithesis will transition into a resolve for the technological problem raised in this Manifesto

European Thought and Culture, 1350-1992 Michael J. Sauter, 2021-06-06 This book explores the main currents of European thought between 1350 and 1992 which it approaches in two principal ways culture as produced by place and the progressive unmooring of thought from previously set religious and philosophical boundaries The book reads the period against spatial thought's history spatial sciences such as geography or Euclidean geometry to argue that Europe cannot be understood as a continent in intellectual terms or its history organized with respect to traditional spatial geographic categories Instead we need to understand European intellectual history in terms of a culture that defined its own place as opposed to a place that produced a given culture It then builds on this idea to argue that Europe's overweening drive to know more about humanity and the cosmos continually breached the boundaries set by venerable religious and philosophical traditions In this respect spatial thought foregrounded the human at the unchanging's expense with European thought slowly becoming unmoored as it doggedly produced knowledge at wisdom's expense Michael J Sauter illustrates this by pursuing historical themes across different chapters including European thought's exit from the medieval period the Renaissance the Reformation the Scientific Revolution the Enlightenment and Romanticism the Industrial Revolution and war and culture offering a thorough overview of European thought during this period The book concludes by explaining how contemporary culture has forgotten what early modern thinkers such as Michel de Montaigne still knew namely that too little skepticism toward one's own certainties makes one a danger to others Offering a comprehensive introduction to European thought that stretches from the late fourteenth to the late twentieth century this is the perfect one volume study for students of European intellectual history
