The New Religions of Japan Harry Thomsen, 1963 THE PUBLICATION of this book will meet a conscious need among students of Japanese religion and culture because it presents in a series of factual and scholarly yet not pedantic expositions one of the significant developments of postwar Japan the emergence and development of shinko shukyo or new religions Mr Thomsen who has given himself to the study of these religions and is one of the younger missionaries who herald a return to the scholarly tradition so greatly neglected among postwar Christian missionaries and students estimates that the new religions have about eighteen million followers or one out of every five Japanese Probably never before in the history of Japan have there been so many kinds of religious innovations and interests This book is significant on several counts it reflects the vitality of Japanese religion through the new religions which perhaps are as representative of this vitality as any of the older traditional religions It seriously considers this unique phenomenon of Japanese culture which because of fanatical and superstitious acts among some of the followers has been treated with a reproach mingled with contempt and because of obvious materialism and even charlatanry has led many to dismiss them with a quip or a laugh On the other hand some of the older religious groups are obviously

alarmed over the increasing power of the new religions because they are seemingly able to meet many of the felt needs of the Japanese people Mr Thomsen considers the religious and sociological factors that have created these movements the roots from which they have sprung and goes a considerable distance toward establishing their common bonds The book is important for the Christian student because it not only describes the encounter which Christianity has had with these new religions but it also makes clear the difficulties missionaries have had in facing the Oriental syncretic concept of religion

Spirituality and Everyday Practice Giuseppe Giordan, William H. Swatos, Jr., 2011-08-14 The current generation of young adults at least in the Western world has shown a marked tendency toward a preference for describing themselves as spiritual as contrasted to religious This book seeks to examine the possible meanings and consequences associated with this contrast in terms of the similarities and differences that affect those who use these terms with respect to the everyday practices that they themselves employ or believe should follow from being self defined as religious or spiritual or not The several chapters in this volume take up the religious spiritual contrast specifically through investigations into practice In what ways do people who claim to be religious or spiritual define these self images as manifest in their own lives How on a daily basis does a person who considers himself or herself religious or spiritual live out that self image in specific ways that she or he can describe to others even if not share with others Are there ways that being spiritual can involve religion or ways that being religious can involve spirituality and if so how do these differ from concepts in prior eras e g Ignatian spirituality Orthodox spirituality Anglican spirituality etc We also explore if there are institutions of spiritual practice to which those who term themselves spiritual turn or if the difference implied by these terms may instead be between institutionalized and de institutionalized expressions of practice including but not limited to self spiritualities *The SAGE Handbook of Modern*
