Alston,1963 **Teaching and Understanding Pneumatology & Spiritual Gifts** Elijah E. Dunbar,2009-05-22 The geographical extent of the orient and occident is a validation of the cultural and ideological differences that have existed with constancies between the two hemispheres throughout the ions of time Ideological pluralism has been the common practice of the inhabitants of both spheres but with unique manifestations Christianity along with other religions are warmly embraced and pragmatically characterized by the orientals and occidentals with reserved peculiarities Oriental Christians viewed pneumatology as being a significant particle of their theological and liturgical lives while Occidental Christians see Christology as the primal substance in Christianity Although both groups have a history of singling out this distinction over the years theologians and theology have helped both sides understand the importance of both pneumatology and Christology in Christianity It is concertedly understood that neither of the two can be studied or taught without the other Their inseparable existence makes Christianity a complete whole The authors exploration and literary expedition through myriad of sources allow him to compile data relevant to understanding the importance of the Holy Ghost and Spiritual gifts within the Christian community Whether a secular or non secular intellectual you will find the information in this book to be rewarding resourceful and informative You will come across comments from some of humanitys and Christendoms finest and brightest academics in an eclectic form Join the author now on his literary expedition Welcome **Religious Experience and Religious Belief** Joseph Runzo,Craig K. Alston,2015-08-01 What is it for a sentence to have a certain meaning This is the question that the distinguished analytic philosopher William P Alston addresses in this major contribution to the philosophy of language His answer focuses on the given sentence s potential to play the role that its speaker had in mind what he terms the usability of the sentence to perform the illocutionary act intended by its speaker Alston defines an illocutionary act as an act of saying something with a certain content He develops his account of what it is to perform such acts in terms of taking responsibility in uttering a sentence for the existence of certain conditions In requesting someone to open a window for example the speaker takes responsibility for its being the case that the window is closed and that the speaker has an interest in its being opened In *Illocutionary Acts and Sentence Meaning* Alston expands upon this concept creating a framework of five categories of illocutionary act and going on to argue that sentence meaning is fundamentally a matter of illocutionary act potential that is for a sentence to have a particular meaning is for it to be usable to perform illocutionary acts of a certain type In providing detailed and explicit patterns of analysis for the whole range of illocutionary acts Alston makes a unique contribution to the field of philosophy of language

one that is likely to generate debate for years to come Faith and the Philosophers NA NA,2015-12-25 *Epistemic Justification* William P. Alston,1989 *Epistemic Justification* collects twelve distinguished and influential essays in epistemology by William P Alston taken from a body of work spanning almost two decades They represent the gradual development of Alston s thought in epistemology He concentrates on topics that are central to contemporary epistemology and provides a much needed and useful map to these issues by explicitly distinguishing and interrelating concepts of justification used in epistemology More important he develops and defends his own distinctive epistemic view throughout the volume Notably he argues for an account of justification that combines both internalist and externalist features In addition he discusses various forms of foundationalism and supports a moderate form Finally Alston demonstrates that the epistemic circularity that often plagues our attempts to validate our basic sources of belief does not prevent our showing that they are reliable sources of knowledge **The Reliability of Sense Perception** William P. Alston,2018-07-05 Why suppose that sense perception is an accurate source of information about the physical environment More generally is it possible to demonstrate that our basic ways of forming beliefs are reliable In this book a leading analytic philosopher confronts this classic problem through detailed investigation of sense perception the source of beliefs in which we place the most confidence Carefully assessing the available arguments William P Alston concludes that it is not possible to show in any noncircular way that sense perception is a reliable source of beliefs Alston thoroughly examines the main arguments that have been advanced for the reliability of sense perception including arguments from the various kinds of success we achieve by relying on the sense perception arguments that some features of our sense experience are best explained by supposing that it is an accurate guide and arguments that there is something conceptually incoherent about the idea that sense perception is not reliable He concludes that all of these arguments that are not disqualified in other ways are epistemically circular for they use premises based upon the very source in question Alston then suggest that the most appropriate response to the impossibility of showing that our basic sources of beliefs are reliable is an appeal to the practical rationality of engaging in certain socially established belief forming practices *The Reliability of Sense Perception* will be welcome by epistemologists cognitive scientists and philosophers of science **Faith and the Philosophers** John Hick,2011-07-05 To define and explore contemporary philosophical critiques of Christian belief is the purpose of this book which arises out of a conference held at Princeton Theological Seminary In a frank and extensive confrontation outstanding philosophers and theologians met to search for greater clarity on some important issues in the philosophy of religion The book contains the papers written for the conference the prepared criticism and excerpts from the debates The discussions revolved around the experiential grounds of religious belief the question as to what conclusions may legitimately be drawn from religious experience the emptiness or otherwise of Christian belief and ethic in the modern world the Freudian explanation of faith and the Barthian defense of Christianity
