Remaking Reality Nature At The Millenium:

Remaking Reality Bruce Braun, Noel Castree, 1998 This text rejects apocalyptic pronouncements that the end of the millenium represents the end of nature as well Bringing together leading international contributors this book argues that a notion of social nature provides great hope for the future Engaging with debates in politics science technology and social movements surrounding race gender and class the contributors explore important and emerging sites where nature is now being remade with considerable social and ecological consequences

Envisioning Human Geographies Paul Cloke, Philip Crang, Mark Goodwin, 2014-02-24 Bringing together many of the leading human geographers from around the English speaking world *Envisioning Human Geographies* offers a series of personal visions for the future of human geography The result is a vigorous and far sighted debate about what human geography could and should be concerned with in the twenty first century The individual contributors develop their arguments to address the shape and direction of human geographies with each chapter looking forward and envisioning an intellectual future for the subject The result is a set of powerful statements written around the themes of space nature enclosure political economy non representation post colonialism feminism post structuralism computation morality spirituality activism The statements are tied via an introduction that discusses the ideological academic and aesthetic prompts that fire the human geographical imagination *Envisioning Human Geographies* maps out important new territories of enquiry for human geography and is essential reading for all students studying the nature and philosophy of the subject

Latour and the Humanities Rita Felski, Stephen Muecke, 2020-09-01 How does the work of influential theorist Bruno Latour offer a fresh angle on the practices and purposes of the humanities In recent years defenses of the humanities have tended to argue along predictable lines the humanities foster empathy the humanities encourage critical thinking the humanities offer a counterweight to the cold calculations of the natural and social sciences The essays in *Latour and the Humanities* take a different approach Exploring the relevance of theorist Bruno Latour s work they argue for attachments and entanglements between the humanities and the sciences while looking closely at the interests institutions and intellectual projects that shape the humanities within and beyond the university The collection which is written by a group of highly distinguished scholars from around the world is divided into two sections In the first part authors engage in depth with Latour s work while also rethinking the ties between the humanities and the sciences Essays argue for greater attention to the nonhuman world the urgency of climate change and more nuanced views of universities as institutions The second half of the volume contains essays that reflect on Latour s influence on the practices of specific disciplines including art the digital humanities film studies and political theory Inspiring conversation about the relevance of actor network theory for research and teaching in the humanities *Latour and the Humanities* offers a substantial introduction to Latour s work while discussing the humanities without falling back on the genres of either the sermon or the jeremiad This volume will be of interest to all those searching for fresh perspectives on the

value and importance of humanistic disciplines and thought Contributors David J Alworth Anders Blok Claudia Breger Dipesh Chakrabarty Yves Citton Steven Connor Gerard de Vries Simon During Rita Felski Francis Halsall Graham Harman Antoine Hennion Casper Bruun Jensen Bruno Latour Heather Love Patrice Maniglier Stephen Muecke Barbara Herrnstein Smith Nigel Thrift Michael Witmore

Car Cultures Daniel Miller, 2020-05-26 Anyone who assumes that a car is simply a means to get from point A to point B or who even thinks that they know what a car is should read this book Profoundly shaped by culture the car gives rise to a wide range of emotions from guilt about the environment in the UK to aboriginal concerns with car corpses to struggles to keep the creatures alive with everything but the proper spare parts in West Africa Cars and their landscapes prove central to human life from its most intimate to the widest sense of global crisis and are capable of inspiring epic passions From road rage in Western Europe to the struggles of cab driving in Africa to the emergence of Black identity in the US this book examines the essential humanity of the car which includes the jealousies gender differences fears and moralities that cars give rise to Firmly grounded in detailed ethnographic and historical scholarship this is the first book to provide an informed sense of cars as one of the most familiar and significant forms of material culture

Museum Practices and the Posthumanities Fiona R. Cameron, 2023-10-24 This book critiques modern museologies and curatorial practices that have been complicit in emerging existential crises It confidently presents novel more than human curatorial visions methods frameworks policies and museologies radically refiguring the epistemological foundations of curatorial museological thinking and practice for a habitable planet Modern curatorial and museological practices are dominated by modern humanism in which capital growth social technological advancement hubris extraction speciesist logics and colonial domination predominate often without reflection While history science and technology museums and their engagement with non human worlds have always been ecological as an empirical reality the human centred frameworks and forms of human agency that institutions deploy tend to be non cognizant of this reality Museum Practices and the Posthumanities Curating for Planetary Habitability reveals how these practices are ill equipped to deal with the contemporary world of rapid digital transformations post Covid living climate change and its impacts among other societal changes and it shows how museums might best meet these challenges by thinking with and in more than human worlds This book is aimed at museological scholars and museum professionals and it will provide them with the inspiration to conduct research on and curate from a different ecological reference point to promote a world good enough for all things to thrive in radical co existence

Liberation Ecologies Richard Peet, Michael Watts, 2004-08-02 Liberation Ecologies elaborates a political economic explanation of environmental crisis drawing from the most recent advances in social theory

Animal History in the Modern City Clemens Wischermann, Aline Steinbrecher, Philip Howell, 2018-09-06 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched Animals are increasingly recognized as fit and proper subjects for historians yet their place in conventional historical narratives remains contested This volume argues for a history

of animals based on the centrality of liminality the state of being on the threshold not quite one thing yet not quite another Since animals stand between nature and culture wildness and domestication the countryside and the city and tradition and modernity the concept of liminality has a special resonance for historical animal studies Assembling an impressive cast of contributors this volume employs liminality as a lens through which to study the social and cultural history of animals in the modern city It includes a variety of case studies such as the horse human relationship in the towns of New Spain hunting practices in 17th century France the birth of the zoo in Germany and the role of the stray dog in the Victorian city demonstrating the interrelated nature of animal and human histories **Animal History in the Modern City** is a vital resource for scholars and students interested in animal studies urban history and historical geography

Wilderness or Home? Asebe Regassa Debelo, 2016 This book critically probes into the politics of nature conservation and commodification Building on political ecology the book argues that conservation is used by state and non state actors as an instrument of controlling multidimensional spaces of indigenous communities The study creates a nexus between the hegemonic discourse of wilderness conservation in colonial Africa and Ethiopia s appropriation of this narrative and how it internally exported it to its peripheries It found out that the successive Ethiopian regimes the imperial military and developmental state share commonalities in using nature conservation both for political control of societies and their territories and as a means of economic extraction through commodification Asebe Regassa Debelo is a graduate of the Bayreuth International Graduate School of African Studies BIGSAS Series Contributions to African Research Beitrage zur Afrikaforschung Vol 66 Subject Sociology African Studies [The Law of Political Economy](#) Poul F. Kjaer, 2020-04-23 Political economy themes have directly and indirectly been a central concern of law and legal scholarship ever since political economy emerged as a concept in the early seventeenth century a development which was reinforced by the emergence of political economy as an independent area of scholarly enquiry in the eighteenth century as developed by the French physiocrats This is not surprising in so far as the core institutions of the economy and economic exchanges such as property and contract are legal institutions In spite of this intrinsic link political economy discourses and legal discourses dealing with political economy themes unfold in a largely separate manner Indeed this book is also a reflection of this in so far as its core concern is how the law and legal scholarship conceive of and approach political economy issues

Global Political Ecology Richard Peet, Paul Robbins, Michael Watts, 2010-12-17 The world is caught in the mesh of a series of environmental crises So far attempts at resolving the deep basis of these have been superficial and disorganized Global Political Ecology links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies This critical volume draws together contributions from twenty five leading intellectuals in the field It begins with an introductory chapter that introduces the readers to political ecology and summarizes the book's main findings The following seven sections cover topics on the political ecology of war and the disaster state fuelling capitalism energy scarcity and abundance global

governance of health bodies and genomics the contradictions of global food capital's marginal product effluents waste and garbage water as a commodity a human right and power the functions and dysfunctions of the global green economy political ecology of the global climate and carbon emissions This book contains accounts of the main currents of thought in each area that bring the topics completely up to date The individual chapters contain a theoretical introduction linking in with the main themes of political ecology as well as empirical information and case material Global Political Ecology serves as a valuable reference for students interested in political ecology environmental justice and geography
