Remarkable Lives Of 100 Women Healers And Scientists:

The Remarkable Lives of 100 Women Healers and Scientists Brooke Bailey, 1994 Surviving the Stained Glass Jungle is a compelling and positive look at the parish ministry through the eyes of a veteran pastor of more than 52 years The book directly confronts the issues of burnout conflict stress and social concerns It gives strategy and practical help in navigating through these difficult currents Self addresses the usual themes of preaching administration and pastoral care but also gives practical help with the issues of the pastor s own mental health and self care This material is written for parish leaders of all mainline denominations and will become a standard for the practice of ministry The general theme of the book is that the church is worth the effort The target audience is seminarians and veteran pastors alike in order to encourage them in the task Laymen would also benefit significantly by reading this book gaining a better understanding of the ministry William L. Self has a national reputation as a gifted preacher pastor author lecturer motivational speaker for corporate America and innovator in church growth He has pastored four churches in more than fifty years of ministry and has survived fourteen building programs and more than 1 200 deacons and finance committee meetings He achieved considerable acclaim during his 26 year pastorate at the Wieuca Road Baptist Church in Atlanta and his leadership and substantial influence have brought Johns Creek Baptist Church in Alpharetta Georgia a burgeoning suburb north of Atlanta to the vanguard of fast growing congregations

The Remarkable Lives of 100 Women Healers and Scientists Brooke Bailey, 1994-06-01 Women in science have had special obstacles to overcome in the last century For years women were barred from enrolling at many major academic institutions The eminent astronomer Cecilia Payne Gaposchkin had to make special arrangements in order to take classes at Harvard which like any number of institutions of the time had a formal ban on female enrollment Each of the 100 profiles in this book tells the inspiring story of a trailblazer who set a new standard of excellence in her field These women and their stories of ambition intellect adversity and triumph are guaranteed to inspire and delight

Women of Science John S. Croucher, 2019-12-15 An investigation into the lives of some of the more remarkable women in the history of scientific discovery

Stolen Science Ella Schwartz, 2021-08-31 A fresh approach to a

timely topic *Stolen Science* is a fascinating compendium of stories of uncredited scientists and inventors throughout the ages. Over the centuries women people from underrepresented communities and immigrants overcame prejudices and social obstacles to make remarkable discoveries in science but they weren't the ones to receive credit in history books. People with more power, money and prestige were remembered as the inventor of the telephone, the scientists who decoded the structure of DNA and the doctor who discovered the cause of yellow fever. This book aims to set the record straight and celebrate the nearly forgotten inventors and scientists who shaped our world today. *Women in the Biological Sciences* Carol A. Biermann, Louise S. Grinstein, Rose K. Rose, 1997-07-16. Biology textbooks and books on the history of science generally give a limited picture of the roles women have played in the growth and development of the biological sciences, mentioning primarily the Nobel laureates. This book provides a definitive archival collection of essays on a larger group of women, profiling both their work and their lives. The volume includes 65 representative women from different countries and eras and from as many branches of biological investigation as possible. In addition to biographical information and an evaluation of the woman's career and significance, each entry provides a full bibliographic listing of works by and about the subject. The volume includes entries on women who have gained recognition through attainment of advanced degrees despite familial and societal pressures, innovative research results, influence exerted in teaching and guidance of students, active participation and leadership in professional societies, extensive scholarly publication, participation on journal editorial boards, extensive field experience and influence on public and political scientific policymaking. A woman was considered eligible for inclusion if she met several of these criteria. Providing a historical perspective, the book is limited to women who were born before 1930 or are deceased. *Rachel Carson* Linda Lear, 2009. By drawing on previously unavailable sources and on interviews with those who knew her, Linda Lear gives a compelling portrait of this heroic woman, illuminating the origin of her connection with nature and of her determination to save what she loved. Lear reveals the unexpected influence of Carson's early experience with industrial pollution and examines her life-changing encounter with the possibility of global extinction in the frightening days of the early Cold War. The book follows Carson's efforts to become a marine biologist at a time when women were unwelcome in the academic community. It shows how her connections with nature were confirmed and strengthened through her work as a government scientist and editor, where her views about the potential dangers of synthetic chemical pesticides evolved. By the late 1950s, Carson had transformed colorless government research into three brilliant popular books about the sea, including *The Sea Around Us*, and had become the most respected science writer in America. Rachel Carson challenged the culture of her time and in the process shaped a powerful social movement that altered the course of American history. *The Biographical Dictionary of Women in Science: L-Z* Marilyn Bailey Ogilvie, Joy Dorothy Harvey, 2000. Volume 2 of 2. *Savannah's Black First Ladies, Vol. I* Pamela Howard-Oglesby, Brenda L. Roberts, 2010. Praise for Savannah's Black First Ladies. The women profiled here are valuable role models for women young and old to admire and emulate. It should be
