U. Uche, 2014-04-23 First Published in 1971 This study is a comparative investigation of contractual obligations in Ghana and Nigeria It has often been suggested that the law of civil responsibility in West Africa is the same as the current English law position on the subject This book sets out to examine the basis of this assumption an exercise which has never been attempted by any previous writer in West African law The study has been divided into five major parts **Studies in the Contract Laws of Asia** Mindy Chen-Wishart, Alexander Loke, Burton Ong, 2016 Studies in the Contract Laws of Asia provides an authoritative account of the contract law regimes of selected Asian jurisdictions including the major centres of commerce where until now limited critical commentaries have been available in the English language In this new six part series of scholarly essays from leading scholars and commentators each volume will offer an insider's perspective into specific areas of contract law including remedies formation parties contents vitiating factors change of circumstances illegality and public policy and will explore how these diverse jurisdictions

Commentaries on European Contract Laws Nils Jansen, Reinhard Zimmermann, 2018-07-12 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of
