Partington, 2013-02-14 H G Wells was described by one of his European critics as a seismograph of his age He is one of the founding fathers of modern science fiction and as a novelist essayist educationalist and political propagandist his influence has been felt in every European country This collection of essays by scholarly experts shows the varied and dramatic nature of Wells's reception including translations critical appraisals novels and films on Wellsian themes and responses to his own well publicized visits to Russia and elsewhere The authors chart the intense ideological debate that his writings occasioned particularly in the inter war years and the censorship of his books in Nazi Germany and Francoist Spain This book offers pioneering insights into Wells's contribution to 20th century European literature and to modern political ideas including the idea of European union Reception of H G Wells in Europe Review *Space Forces* Fred Scharmen, 2021-11-09 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have imagined going to live in space What they want to do once they get up there whether conquering the unknown establishing space colonies privatising the moon's resources reveals more than expected In this fascinating radical history of space exploration Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space but these visions have real implications for life back

on earth For the Russian Cosmists of the 1890s space was a place to pursue human perfection away from the Earth For others such as Wernher Von Braun it was an engineering task that combined in the Space Race the Cold War and during World War II with destructive geopolitics Arthur C Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction Meanwhile NASA planned and managed the space station like an earthbound corporation Today the market has arrived into outer space and exploration is the plaything of superrich technology billionaires who plan to privatise the mineral wealth for themselves Are other worlds really possible Bringing these figures and ideas together reveals a completely different story of our relationship with outer space as well as the dangers of our current direction of extractive capitalism and colonisation *Red Stars* Patrick L. McGuire,1985 **Knockin' on Heaven's Door** Roland Boer,2012-10-12 Knockin On Heaven s Door offers a critically sophisticated and truly interdisciplinary analysis of the relationship between biblical studies and contemporary culture Specific biblical texts are examined in the light of cultural criticism and areas of popular culture including pornography heavy metal music and McDonald s hamburgers in the light of biblical criticism
