as the textual basis for investigations Chapters focusing on electronic corpora include a description of a tool that can be used to help build specialized corpora in a semi automatic fashion corpus based investigations of terminological knowledge patterns terminological implantation lexicographic information and translation solutions comparisons of corpora to conventional resources such as dictionaries and analyses of corpus processing tools such as translation memory systems In several essays notably those dealing with historical or literary documents the texts in question are specific manuscripts that have been studied with a view to learning more about lexicographic and translation practice The volume is rounded out with a chapter on audiovisual translation that takes a non conventional view of text where text includes film Published in English

Lexicography Then and Now Ladislav Zgusta, 2012-02-14 Professor Zgusta's work in lexicography and linguistics proper is built upon a multilingual command of linguistic theory literary history the history of linguistics and his experience as a practical lexicographer The topic under consideration may be the organization and development of a standard variety of a language explorations of the consequences of linguistic theory on the practical lexicographic applications in making dictionaries that range from Ahtna to Zoque and Batad Ifuagao to Yolngu Matha the method of definition in bilingual dictionaries the state of affairs in Russian lexicography learner's dictionaries ancient Greek lexicography pragmatics scripts and morphological types the history of English lexicography or behind the scenes at the making of the Czech Chinese dictionary The reader will not only be offered a careful and wide ranging study of these important topics in the discipline but will be taken on a guided comparative and historical tour that illuminates the strengths and weaknesses of current practice and theory His work reminds those linguists and lexicographers who are locked into paradigm battles of the Kuhnian kind that the wheel has already been invented Most of the articles in this volume have been updated The editors have also conflated six articles on the history of dictionaries into one seamless narrative with connective tissue supplied by Zgusta
