Robert Adam and His Circle John Fleming,1962 *Robert Adam and His Circle in Edinburgh and Rome* John Fleming,1962 **Robert adam and his circle** b.1919 Fleming,1962 *Robert Adam and His Circle in Edinburgh & Rome* John Fleming (Kunsthistoriker, Architekturhistoriker),1962 *Robert Adams and His Circle in Edinburgh & Rome. [With Plates.]* John FLEMING (B.A., Cantab.),Robert ADAM (Architect.),1962 **The Education of the Eye** Peter De Bolla,2003 The Education of the Eye examines the origins of visual culture in eighteenth century Britain setting out to reclaim visual culture for the democracy of the eye and to explain how aesthetic contemplation may once more be open to all who have eyes to look Observations on the Letter of Monsieur Mariette Giovanni Battista Piranesi,2002 An impassioned plea for a Roman Style eclecticism that draws freely on all artistic forms and traditions Piranesi s Observations anticipates the contemporary debate between devotees of a rational minimal architecture and advocates of an architecture rich in ornament and historical references BOOK JACKET The Story of the Country House Clive Aslet,2021-09-14 The fascinating story of the evolution of the country house in Britain from its Roman precursors to the present The Story of the Country House is an authoritative and vivid account of the British country house exploring how they have evolved with the changing political and economic landscape Clive Aslet reveals the captivating stories behind individual houses their architects and occupants and paints a vivid picture of the wider context in which the country house in Britain flourished and subsequently fell into decline before enjoying a renaissance in the twenty first century The genesis style and purpose of architectural masterpieces such as Hardwick Hall Hatfield House and Chatsworth are explored alongside the numerous country houses lost to war and economic decline We also meet a cavalcade of characters owners with all their dynastic obsessions and diverse sources of wealth and architects such as Inigo Jones Sir John Vanbrugh Robert Adam Sir John Soane and A W N Pugin who dazzled or in some cases outraged their contemporaries The Story of the Country House takes a fresh look at this enduringly popular building type exploring why it continues to hold such fascination for us today *The Architecture of Ruins* Jonathan Hill,2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular

ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change *Robert and James Adam, Architects of the Age of Enlightenment* Ariyuki Kondo,2015-10-06 During the second half of the eighteenth century British architecture moved away from the dominant school of classicism in favour of a more creative freedom of expression At the forefront of this change were architect brothers Robert and James Adam Kondo s work places them within the context of eighteenth century intellectual thought *Ancient Bovillae* Peter Hatlie,2025-02-18 *Ancient Bovillae* is the first comprehensive study in English about the ancient city south of Rome that flourished for centuries before eventual abandonment After its peak of prosperity and influence in the first and second centuries CE Bovillae went into steady decline as an urban center then disappeared as an identifiable physical entity during the Middle Ages and finally came to suffer complete abandonment in modern times Despite previous archaeological inquiries no major study on Bovillae has appeared in any language other than Italian nor has there been one as comprehensive as this volume s examination *Ancient Bovillae* goes well beyond the work of any previous publication by gathering together all known evidence about the city from the ancient medieval and modern ages with contributors analyzing the significance of Bovillae in art architecture religion and history Written by a distinguished team of scholars and featuring nearly one hundred images of artifacts monuments and technical drawings associated with Bovillae this book boldly pieces together evidence about the history art and archaeology of Bovillae It draws attention to Bovillae s significance within the Roman world as well as its transformation and decline in the post Roman era *Vitruvius Scoticus* William Adam,2013-12-17 This classic portfolio uses elevations floor plans and other line drawings by Scotland s first great classical architect to document the high Scottish style of the eighteenth century It was assembled by William Adam 1689 1748 whose sons were the developers of the Adam style and published posthumously in 1812 The elder Adam designed extended and remodeled numerous country homes and undertook many public contracts *Vitruvius Scoticus* s 160 plates include 100 of his own designs Unlike the *Vitruvius Britannicus* books this volume features plans for many smaller buildings

that served as models for American builders and architects of the nineteenth century Its engravings include images of such stately homes as Mavisbank House Haddo House and Fasque House Hamilton Palace one of the nation s grandest homes and Holyrood Palace the official residence of the monarch in Scotland and a series of bridges at Inveraray in the county of Argyll Never before available in an affordable edition this volume is an essential reference for architectural historians and students It includes an Introduction and Notes to the Plates by James Simpson **Humphry Repton** Tom Williamson,2020-09-17 Humphry Repton 1752 1818 remains one of England s most interesting and prolific garden and landscape designers Renowned for his innovative design proposals and distinctive before and after images captured in his famous Red Books Repton s astonishing career represents the link between the simple parklands of his predecessor Capability Brown and the more elaborate structured and formal landscapes of the Victorian age This lavishly illustrated book based on a wealth of new research reinterprets Repton s life working methods and designs and examines why they proved so popular in a rapidly changing world **Cities and the Grand Tour** Rosemary Sweet,2012-10-04 A fascinating study of how British travellers experienced described and represented the cities they visited on the Grand Tour The Ruins Lesson Susan Stewart,2020-01-15 How have ruins become so valued in Western culture and so central to our art and literature Covering a vast chronological and geographical range from ancient Egyptian inscriptions to twentieth century memorials Susan Stewart seeks to answer this question as she traces the appeal of ruins and ruins images and the lessons that writers and artists have drawn from their haunting forms Stewart takes us on a sweeping journey through founding legends of broken covenants and original sin the Christian appropriation of the classical past and images of decay in early modern allegory Stewart looks in depth at the works of Goethe Piranesi Blake and Wordsworth each of whom found in ruins a means of reinventing his art Lively and engaging The Ruins Lesson ultimately asks what can resist ruination and finds in the self transforming ever fleeting practices of language and thought a clue to what might truly endure Athens on the Frontier Patrick Lee Lucas,2023-03-28 In 1811 architect Benjamin Henry Latrobe spurred American builders into action when he called for them to reject the corrupt Age of Dioclesian or the still more absurd and debased taste of Louis the XIV and to emulate instead the ancient temples of Greece In response people in the antebellum trans Appalachian region embraced the clean lines intricate details and stately symmetry of the Grecian style On newly built public buildings private homes and religious structures references to classical Greek architecture became the preferred ornamentation Several antebellum cities and towns adopted the moniker of Athens styling themselves as centers of culture education and sophistication As the trend grew American citizens understood the name as a link between the Grecian style and the founding principles of democracy signaling a change of taste in service to the larger American cultural ideal In Athens on the Frontier Patrick Lee Lucas examines the material culture of Grecian style buildings in antebellum America to help recover nineteenth century regional identities As communities worked to define their built landscape and develop a shared Western identity Lucas s study invites readers to

question many of the assumptions Americans have made about divisions and cultural formation in antebellum society

Bodybuilding Martin Myrone, 2005-01-01 Combining visual analysis social history and masculinity studies Bodybuilding effects a vivid image of this critical period in Britain's cultural history and establishes an ambitious new framework for the study of late eighteenth century art and gender **BOOK JACKET** **Language and the Grand Tour** Arturo Tosi, 2020-04-02

Language is still a relatively under researched aspect of the Grand Tour This book offers a comprehensive introduction enriched by the amusing stories and vivid quotations collected from travellers writings providing crucial insights into the rise of modern vernaculars and the standardisation of European languages **Architecture as Experience** Dana

Arnold, Andrew Ballantyne, 2004-07-31 This book investigates the perception and appropriation of places across intervals of time and culture The main focus is on bringing together fresh empirical research and animating it with theoretical sophistication Elements of Architecture Mikkel Bille, Tim Flohr Sorensen, 2016-02-26 Elements of Architecture explores

new ways of engaging architecture in archaeology It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment considering how people in the past have not just dwelled in buildings but have existed within them The book engages with the meeting point between these two perspectives For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things to understand humans they must also address the performances as well as temporal and affective impacts of these material remains The contributions in this volume investigate the way time performance and movement both physically and emotionally are central aspects of understanding architectural assemblages It is a book about the constellations of people places and things that emerge and dissolve as affective mobile performative and temporal engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human Elements of Architecture elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies
