China's Belt And Road Initiatives And Its Neighboring

Diplomacy Jie Zhang, 2016-12-15 This book studies China's Belt and Road Initiatives and the country's neighboring diplomacy. The Belt and Road Initiatives proposed by Chinese President Xi Jinping in 2013 consist of two main components: the land-based Silk Road Economic Belt and the ocean-going Maritime Silk Road. China has implemented the initiatives by establishing the Asian Infrastructure Investment Bank and the Silk Road Fund. This book focuses on analysis of the initiatives and the responses from the major powers neighboring countries and regions. The book consists of four parts: the Overview, The Belt and Road Initiatives and Big Powers, The Belt and Road Initiative and Regions, and The Belt and Road Initiative and Hot Issues. The Overview explicates the strategic orientations, connotations, and approaches of implementation of the initiatives from a theoretical perspective. The second part analyzes the Asia-Pacific strategies of four great powers: namely, the United States, Russia, Japan, and India, their relations with China, and responses to the initiative. The third part discusses the Belt and Road Initiatives and four regions: namely, Northeast Asia, Southeast Asia, South Asia, and Central Asia. It evaluates their attitudes and responses towards the Belt and Road Initiatives, strategic docking, and major challenges in this regard. The fourth part touches upon the initiatives and current hot issues, including non-traditional security, the South China Sea dispute, and venture analysis on investment environment renovation.

The Rise of China and the China-Russia Strategic Partnership Lei

Yu, 2025-02-08 This book argues that China's quest for a strategic partnership with Russia reveals the country's desire to create a geopolitical environment in favour of their country's re-emergence as a great power at the systemic global level. The partnership with its no limit is expected to help China counterbalance its perceived US containment and reshape the US dominated world order. By intensifying Sino-Russian economic and energy cooperation and trade in the framework of the partnership, China attempts to gain entry to Russia's markets and particularly its energy resources to sustain its economic growth that is viewed by Deng Xiaoping as the basis underlying China's hard power and particularly its military capabilities. By intensifying their military collaboration, China seeks to gain entry to Russia's military weaponry and technology for the modernization of the People's Liberation Army (PLA) and work together with Russia to contain their perceived US unilateralism, hegemonism, and interventionism. The Chinese foreign policy elites increasingly view US unilateralism and hegemonism as detrimental to China's core interests, e.g. its territorial integrity and national rejuvenation. This sheds light on why the Chinese foreign policy elites conceive the China-Russia partnership as vital for China's peaceful development, commonly known as peaceful rise overseas and the ballast stone for global peace and strategic stability. This book will be of

discuss and analyse other underappreciated challenges facing the region Considering Mongolia's role in achieving peace and stability in the neighbourhood the book will be a valuable resource for researchers and readers in International Relations Political Science and Asian Studies The Far Eastern Review, Engineering, Finance, Commerce ,1912 River Culture UNESCO, UNESCO Office in Beijing, 2023-01-05 Emerging Infectious Diseases ,2017 The Braconid and Ichneumonid Parasitoid Wasps Donald L. J. Quicke, 2014-12-01 The Ichneumonidae is a vast and important superfamily of parasitic wasps with some 60 000 described species and estimated numbers far higher especially for small bodied tropical taxa The superfamily comprises two cosmopolitan families Braconidae and Ichneumonidae that have largely attracted separate groups of researchers and this to a considerable extent has meant that understanding of their adaptive features has often been considered in isolation This book considers both families highlighting similarities and differences in their adaptations The classification of the whole of the Ichneumonidae along with most other insect orders has been plagued by typology whereby undue importance has been attributed to particular characters in defining groups Typology is a common disease of traditional taxonomy such that until recently quite a lot of taxa have been associated with the wrong higher clades The sheer size of the group and until the last 30 or so years lack of accessible identification materials has been a further impediment to research on all but a handful of lab rat species usually cultured initially because of their potential in biological control New evidence largely in the form of molecular data have shown that many morphological behavioural physiological and anatomical characters associated with basic life history features specifically whether wasps are ecto or endoparasitic or idiobiont or koinobiont can be grossly misleading in terms of the phylogeny they suggest This book shows how with better supported phylogenetic hypotheses entomologists can understand far more about the ways natural selection is acting upon them This new book also focuses on this superfamily with which the author has great familiarity and provides a detailed coverage of each subfamily emphasising anatomy taxonomy and systematics biology as well as pointing out the importance and research potential of each group Fossil taxa are included and it also has sections on biogeography global species richness culturing and rearing and preparing specimens for taxonomic study The book highlights areas where research might be particularly rewarding and suggests systems groups that need investigation The author provides a large compendium of references to original research on each group This book is an essential workmate for all postgraduates and researchers working on ichneumonoid or other parasitic wasps worldwide It will stand as a reference book for a good number of years and while rapid advances in various fields such as genomics and host physiological interactions will lead to new information as an overall synthesis of the current state it will stay relevant for a long time **Economic Development of China and Japan** C.D. Cowan, 2013-10-15 First published in 2005 Some of the most important of the world's problems today concern affairs in Asia and the relations between Asia and the West To deal adequately with these problems it is necessary not only to master their more obvious elements as they present themselves today but to go to their historical roots In particular it is

necessary to study the economic history of modern Asian society In London the School of Oriental and African Studies with the generous assistance of the Ford Foundation began in 1959 a research programme on the economic history of East and South East Asia As part of this programme an international study group composed of scholars from America Europe and Asia was held at the School in July 1961 This volume contains a selection of the papers presented to the study group **The Far-Eastern Review** ,1912
