Russia on Our Minds Delia Kuhn, Ferdinand Kuhn, 1970 **Kant in Imperial Russia** Thomas Nemeth, 2017-02-15 This book presents a comprehensive study of the influence of Immanuel Kant's Critical Philosophy in the Russian Empire spanning the period from the late 19th century to the Bolshevik Revolution It systematically details the reception bestowed on Kant's ideas during his lifetime and up to and through the era of the First World War The book traces the tensions arising in the early 19th century between the imported German scholars who were often bristling with the latest philosophical developments in their homeland and the more conservative Russian professors and administrators The book goes on to examine the frequently neglected criticism of Kant in the theological institutions throughout the Russian Empire as well as the last remaining though virtually unknown embers of Kantianism during the reign of Nicholas I With the political activities of many young radicals during the subsequent decades having been amply studied this book focuses on their largely ignored attempts to grapple with Kant's transcendental idealism It also presents a complete account of the resurgence of interest in Kant in the last two decades of that century and the growing attempts to

graft a transcendental idealism onto popular social and political movements The book draws attention to the young and budding Russian neo Kantian movement that mirrored developments in Germany before being overtaken by political events

Adil Saribay, Onurcan Yilmaz, 2024-12-06 This book provides a definitive guide to the value of reflective thinking in

the modern world showing how today's most fundamental problems are to an important degree based on citizens thinking styles. The authors highlight the importance of reflection by systematically revealing the causes underlying differences in people's thinking styles and the consequences of thinking in different ways. These different ways of thinking contribute to socio-political views and can result in misunderstandings of complex issues such as beliefs in conspiracy theories and fake news, anti-vaccine attitudes and even fundamentalism and extremism. By training and strengthening reflective thinking in society via education and other means, we can encourage individuals to challenge misinformation and their own belief systems around controversial topics. The book also explores the idea that reflection is not enough on its own and examines the shortcomings of reflection and the other skills that complement it positively, especially holistic and systems thinking. In doing so, the authors highlight how implementing a solid science-based understanding of key issues in education and society at large can contribute to the solution of problems from climate change to economic inequality. By showing how we can put our reflective capacity to good use alongside critically examining reflection in relation to modern problems experienced by humanity, this book is a fascinating reading for students, researchers and academics in psychology, politics and the broader social sciences.
