Biological Science and Biotechnology in Russia Russian Academy of Sciences, National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Office for Central Europe and Eurasia, Committee on Future Contributions of the Biosciences to Public Health, Agriculture, Basic Research, Counterterrorism, and Nonproliferation Activities in Russia, 2006-02-27 In July 2005 the National Academies released the report Biological Science and Biotechnology in Russia Controlling Diseases and Enhancing Security The report offered a number of recommendations that could help restore Russia's ability to join with the United States and the broader international community in leading an expanded global effort to control infectious diseases A proposed bilateral intergovernmental commission could play a pivotal role toward that end as cooperation moves from assistance to partnership The report proposed the establishment of two model State Sanitary Epidemiological Surveillance Centers in Russia more focused support of competitively selected Russian research groups as centers of excellence the promotion of investments in biotechnology niches that are well suited for Russian companies and expanded opportunities for young scientists to achieve scientific leadership positions in Russia Also the report highlighted the importance of U.S. programs that support the integration of former Soviet defense scientists with civilian researchers who had not been involved in military related activities *Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971* New York Public Library. Research Libraries, 1979 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1965 Containing Russia's Nuclear Firebirds Glenn E. Schweitzer, 2013-01-01 In the aftermath of the Soviet Union's breakup into fifteen independent states the governments of the United States the European Community Japan and Russia established the International Science and Technology Center in Moscow to address the dangers of nuclear scientists on the loose The purpose of the ISTC also known as the Moscow Science Center was to prevent the illicit flow of dangerous weapons expertise out of the former Soviet Union by helping its underemployed nuclear biological chemical and aerospace weapons scientists redirect their skills to peaceful civilian endeavors Since its creation in 1994 the ISTC has provided more than 1.3 billion to support 2,740 projects involving nearly 100,000 scientists from the former Soviet Union and international partners Thirty nine governments have become part of the ISTC family Somewhat unexpectedly in April 2010 the Russian government announced that it would withdraw from the agreement establishing the ISTC contending that the Center had accomplished its mission The Moscow Science Center will close its doors in 2015 effectively terminating ISTC activities based in Russia Schweitzer examines the impact and effectiveness of the ISTC and emphasizes opportunities for the internal community to draw on its legacy *The Library Catalogs of the Hoover Institution on War, Revolution, and Peace, Stanford University* Hoover Institution on War, Revolution, and Peace, 1969 *Hearings* United States. Congress. House, 1961 *When Science Meets Power* Geoff Mulgan, 2023-11-08 Science and politics have collaborated throughout human history and science is repeatedly invoked today in political debates from pandemic management to climate change

But the relationship between the two is muddled and muddled Leading policy analyst Geoff Mulgan here calls attention to the growing frictions caused by the expanding authority of science which sometimes helps politics but often challenges it He dissects the complex history of states use of science for conquest glory and economic growth and shows the challenges of governing risk from nuclear weapons to genetic modification artificial intelligence to synthetic biology He shows why the governance of science has become one of the biggest challenges of the twenty first century ever more prominent in daily politics and policy Whereas science is ordered around what we know and what is politics engages what we feel and what matters How can we reconcile the two so that crucial decisions are both well informed and legitimate The book proposes new ways to organize democracy and government both within nations and at a global scale to better shape science and technology so that we can reap more of the benefits and fewer of the harms Also available as an audiobook

A History of Postwar Russia Roger Pethybridge, 2021-11-29 First Published in 1966 A History of Postwar Russia covers sixteen years of Soviet history from the closing stages of the Second World War 1945 until the Twenty second Soviet Party Congress 1961 dealing with both domestic and foreign policy and their influence on each other It aims at giving the overall shape of Soviet history in these years The author argues that in Soviet society each sector of activity must be viewed in relation to the whole so that the monolithic pattern of totalitarian politics can be appreciated More than any other major power the Soviet Union did not submit easily to compartmentalized study since every branch of Soviet life was carefully trimmed to grow towards the Communist aim This book is an essential read for scholars and researchers of Soviet history Soviet politics European history Russian history and comparative politics

Regional Economic Integration and Global Competition in the Post-COVID-19 Era: European Union, Eurasian Economic Union, and the Belt and Road Initiative Karnaukhova, Oxana, Shevchenko, Dmitry, 2022-04-22 The globalized world has witnessed the development of a number of economic integration projects including at least two Eurasian projects the Eurasian Union and the Belt and Road Initiative These initiatives blur the European Union Global Strategy adjusted in 2016 to be an attempt to reconsider and enhance the role and place of the European Union as the leader in the global arena These initiatives must be studied and considered further to understand the numerous benefits opportunities and challenges they face Regional Economic Integration and Global Competition in the Post COVID 19 Era European Union Eurasian Economic Union and the Belt and Road Initiative provides insight into the reasons and consequences of the discrepancy in the legal restrictions institutional policies and mutual skepticism on the economic integration progress The text is also useful in defining and promoting a regional strategy of economic integration and the creation of mutual trust Covering a range of topics such as international trade environmental risk management and globalization this reference work is ideal for policymakers government officials strategic decision makers practitioners researchers scholars academicians instructors and students

East European Academies in Transition R. Mayntz, U. Schimank, P. Weingart, 2013-11-11 When the socialist regime in Central and Eastern Europe CEE was overthrown around the

end of the eighties beginning of the nineties an overall transformation of whole societies started Not only the political and the economic systems of these countries but all societal sectors underwent deep changes These changes presented opportunities but they also spelled trouble On one hand getting rid of stifling political control and excessive bureaucratic regulation was something which most members of these societies desired On the other it became apparent very soon that the necessary and long hoped for rebuilding of the economy education health care the mass media and science too was strongly restricted by the scarcity of financial resources After a short period during which opportunities were energetically taken up in a spirit of hope came a long and still lasting time of growing troubles and despondency Only in a few of the CEE countries have some glimpses of hope become visible recently and it remains to be seen whether these signals are reliable Until now therefore the transformation dynamics of all societal sectors in all of the CEE countries have primarily been troublesome This is surely true for the post socialist research systems I The demise of the communist party's absolute rule over society has allowed researchers the public expression and the pursuit of goals whose common denominator has been a greater self regulation of scientific research according to its own criteria and logic

Caring Like a State Inna Leykin, 2025-09-02 The post Soviet Russian state is haunted by the fear of not having enough people Despite its well publicized pronatalist campaigns declining birth rates and rising mortality rates since the 1990s cast doubt on the state's ability to care for its population effectively In this ethnography anthropologist Inna Leykin examines the post Soviet Russian state's efforts and failures in population care Revealing the existential burden of pronatalism she demonstrates how the language of demography has become influential in defining what kind of behavior and social aspirations are deemed worthy of state support and protection **Caring Like a State** The Politics of Russia's Demographic Crisis analyzes the professional world of demographers non state actors and the subjective experiences of ordinary Russian citizens to explore how their reciprocal relations have shaped the dominant understanding of population issues and their remedies
