*Russian Sociology* Julius Friedrich Hecker, 1916 **Russian Church Singing: History from the origins to the mid-seventeenth century** Johann von Gardner, 1980 The history of church singing in Russia constitutes an essential aspect of that nation s culture and musical history For the first 650 years from the Christianization of Rus in the year 988 liturgical chant was the only documentable art music in that vast territory that eventually became the modern nations of Russia Ukraine and Belarus Indeed in Russia before the revolution of 1917 liturgical musicology was a bona fide scholarly discipline taught in conservatories universities and theological seminaries All activity in the field came to a halt however during the 75 year Soviet era when the study and practice of sacred music was severely repressed for ideological reasons with a resulting lack of published research and secondary material Consequently Russian and Western music historians church musicians and

liturgical scholars as well as ordinary churchgoers whose interest in Orthodox Christianity and its art has been increasing of late have been deprived of reference works that would impart even a general knowledge of the history and development of liturgical singing in the Russian Orthodox Church. The present Volume Russian Church Singing Volume 2 is the second installment of Professor Johann von Gardner's monumental work to appear in English translation. The 396 page volume translated and edited by Dr Vladimir Morosan considers the development and practice of liturgical chant in the Russian lands from a variety of aspects: its origins and the various cultural influences upon its formation; extant manuscripts; the evolution of the notation and the problematics of deciphering it into modern day notes; the forces involved in its performance; its stylistic evolution from exclusively monodic forms to improvised and eventually notated polyphony; its earliest known composers and performing ensembles; its aesthetics in relation to liturgy; the language and the various problems that arose over the centuries resulting in the adoption of Westernized stylistic models around the year 1650 which marks the approximate end of the time period covered in this volume. Much of this information is made accessible for the first time to the English reader and will be of interest both to the specialist and to the general reader, generating a healthy demand for further research and exploration into this fascinating and hitherto unknown field. German attitudes toward and stereotypes of Russia before the First World War and how they were inculcated in the public. The causes of the First World War have been studied and debated for many decades yet cultural historians of Germany have largely neglected the German-Russian aspect of the conflict for a focus on the clash of Germany and Great Britain. When they have focused on Germany and Russia they have too often dismissed the anti-Russian propaganda of the war's first months as a sudden and opportunistic campaign to justify the war. This intellectual and cultural history gives German attitudes toward and stereotypes of Russia their due re-examining them through the lens of German national identity and revealing an evolving obsession with Russia during the quarter century leading up to the war when Germany came to consider itself a Western nation with Russia to use Edward Said's terminology as an Oriental other. While historians have addressed the issue of an Oriental Russia this book extends the analysis beyond traditional intellectual history's focus on cultural elites by studying the construction of Russia in school textbooks newspapers and the writings of academics. Drawing upon the work of Said Jürgen Habermas Sander Gilman and Pierre Bourdieu Troy Paddock demonstrates that public debate on Russia was based on common assumptions and contends that these assumptions which resulted in the ascendancy of a view of Russia as the Slavic peril in the last few years before the war were ingrained in the public through education.
