**The Rutters of the Sea** Pierre Garcie (called Ferrande), David Watkin Waters, 1967     *Tracks on the Ocean* Sara Caputo, 2024-10-22 An engaging look at ocean routes complicated beginnings and elusive impact Sara Caputo's *Tracks on the Ocean* is a sweeping history of how we have understood routes of travel over the ocean and how we came to represent that movement as a cartographical line Focusing on the representation of sea journeys in the Western world from the early sixteenth century to the present Caputo deftly argues that the depiction of these lines is inextricable from European imperialism the rise of modernity and attempts at mastery over nature Caputo recounts the history of ocean tracks through an array of lively stories and characters from the expeditions of Captain James Cook in the eighteenth century to tracks depicted in *Moby Dick* and popular culture of the nineteenth century to the use of navigational techniques by the British navy She discusses how tracks evolved from tools of surveying into tools of surveillance and eventually into paths of environmental calamity The impulse to record tracks on the ocean is Caputo argues reflective of an ongoing desire for order schematization and personal visibility as well as occupation and permanent ownership in this case over something that is unoccupiable and impossible to truly possess Both beautifully written and deeply researched *Tracks on the Ocean* shares how the lines drawn on maps tell the audacious and often tragic and violent stories of ocean voyages

*Mapping and Charting in Early Modern England and France* Christine Petto, 2015-03-26 Mapping and Charting for the Lion and the Lily Map and Atlas Production in Early Modern England and France is a comparative study of the production and role of maps charts and atlases in early modern England and France with a particular focus on Paris the cartographic center of production from the late seventeenth century to the late eighteenth century and London which began to emerge in the late eighteenth century to eclipse the once favored Bourbon center The themes that carry through the work address the role of government in map and chart making In France in particular it is the importance of the centralized government and its support for geographic works and their makers through a broad and deep institutional infrastructure Prior to the late eighteenth century in England there was no central controlling agency or institution for map chart or atlas production and any official power was imposed through the market rather than through the establishment of institutions There was no centralized support for the cartographic enterprise and any effort by the crown was often challenged by the power of Parliament which saw little value in fostering or supporting scholar geographers or a national survey This book begins with an investigation of the imagery of power on map and atlas frontispieces from the late sixteenth century to the seventeenth century In the succeeding chapters the focus moves from county and regional mapping efforts in England and France to the

paper wars over encroachment in their respective colonial interests The final study looks at charting efforts and highlights the role of government support and the commercial trade in the development of maritime charts not only for the home waters of the English Channel but the distant and dangerous seas of the East Indies      **The Seaforth Bibliography** Eugene

Rasor,2009-04-17 This remarkable work is a comprehensive historiographical and bibliographical survey of the most important scholarly and printed materials about the naval and maritime history of England and Great Britain from the earliest times to 1815 More than 4 000 popular standard and official histories important articles in journals and periodicals anthologies conference symposium and seminar papers guides documents and doctoral theses are covered so that the emphasis is the broadest possible But the work is far far more than a listing The works are all evaluated assessed and analysed and then integrated into an historical narrative that makes the book a hugely useful reference work for student scholar and enthusiast alike It is divided into twenty one chapters which cover resource centres significant naval writers pre eminent and general histories the chronological periods from Julius Caesar through the Vikings Tudors and Stuarts to Nelson and Bligh major naval personalities warships piracy strategy and tactics exploration discovery and navigation archaeology and even naval fiction Quite simply no one with an interest and enthusiasm for naval history can afford to be without this book at their side      **Sailing - as Life in Christ** Les Galicinski,2014-04-25 People have long been captivated by sailboats
