Language Between Description and Prescription is an empirical quantitative and qualitative study of nineteenth century English grammar writing and of nineteenth century language change Based on 258 grammar books from Britain and North

America the book investigates whether grammar writers of the time noticed the language changing around them and how they reacted In particular Lieselotte Anderwald demonstrates that not all features undergoing change were noticed in the first place those that were noticed were not necessarily criticized and some recessive features were not upheld as correct The features investigated come from the verb phrase and include in particular variable past tense forms which although noticed often went uncommented and where variation was acknowledged the decline of the be perfect where the older form the be perfect was criticized emphatically and corrected the rise of the progressive which was embraced enthusiastically and which was even upheld as a symbol of national superiority at least in Britain the rise of the progressive passive which was one of the most violently hated constructions of the time and the rise of the get passive which was only rarely commented on and even more rarely in negative terms Throughout the book nineteenth century grammarians are given a voice and the discussions in grammar books of the time are portrayed The book s quantitative approach makes it possible to examine majority and minority positions in the discourse community of nineteenth century grammar writers and the changes in accepted opinion over time The terms of the debate are also investigated and linked to the wider cultural climate of the time Although grammar writing in the nineteenth century was very openly prescriptivist the studies in this book show that many prescriptive dicta contained interesting grains of descriptive detail and that eventually prescriptivism had only a small scale short term effect on the actual language used

Love, Drugs, Art, Religion

Brian R. Clack,2016-05-13 In this original and far reaching contribution to the

philosophy of religion Brian R Clack examines the manner in which religious belief emerges from the turbulence and anxiety of human existence Taking his cue from Freud's suggestion that human life is so hard to bear that it requires nothing short of cultural and psychological palliative care Clack explores each of the palliative measures Freud catalogues intoxicants religion art and love and evaluates their role in the mitigation of suffering and the provision of the assistance required for an endurable life This examination provides the context for an investigation into the meaning and function of religious belief when considered as a palliative Clack initially subjects religion to ferocious critique defending the psychoanalytic judgment that religious beliefs operate as wish fulfilling illusions but then elaborates a revised understanding of religion one in which comforting illusions are banished and in which religious belief faces up to reality and reconciles us both to the pains and disappointments of existence and to our nullity and inevitable annihilation in this genuinely interdisciplinary work Clack breaks new ground by using detailed explorations of the phenomena of drug use romantic love and the enjoyment of art in order to throw light on the meaning and nature of religion This book will be vital reading for anyone concerned with the fundamental questions of religious belief the psychoanalytic approach to culture or simply the unavoidable existential problems lying at the very heart of human life
