White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history Like most editions of the United State Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy It includes books reports government documents and journal articles Excluded are pictorial works newspaper articles works of fiction studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation Readers wanting information on the history of aviation certainly prior to the Wright Brothers are encouraged to consult the U S Air Force Academy Friends of the Library publication The Genesis of Flight The Aeronautical History Collection of Colonel Richard Gimbel      **Air Power** Jeremy Black, 2016-03-10 This essential book offers a compelling and original interpretation of the rise of military aviation Jeremy Black one of the world s finest scholars of military history provides a lucid analysis of the use of airpower over land and sea both during the two world wars and the more limited wars of the twentieth and twenty first centuries Considering both the theory and praxis of air power the author begins with hot air balloons and then highlights the use of zeppelins piston engine fighters jet bombers and finally the so called Military Revolution of today While discussing the growth of American and European military aviation Black a pioneer in emphasizing the importance of non Western military history for understanding global developments also traces the emergence of air power in Latin America Africa and Asia Black breaks new ground by exploring not only to conventional war both inside and outside Europe but also to the use of air power in unconventional wars especially critical given to the spread of insurgencies around the globe He vividly describes traditional debates over the pros and cons of strategic bombing and aircraft carriers versus battleships and gives equal attention to managerial doctrinal and technological innovations The author shows how better management resulted in increasing lethality of close air support of the RAF during the latter part of World War II and at the same times highlights the limits of air power with case studies of the two Gulf Wars The author goes beyond our traditional understanding of air power associated with bombing and fighter engagements adding the important elements associated with naval power including ground logistics support anti aircraft measures and political constraints As he explains air power has become Western politicians weapon of choice spreading maximum destruction with the minimum of commitment His current and comprehensive study considers how we got to this point and what the future has in store

Anyone seeking a balanced accurate understanding of air power in history will find this book an essential introduction

**United States Air Force and Its Antecedents** James T. Controvich, Martin Gordon, 2004-06-24 This bibliography lists published and printed unit histories for the United States Air Force and Its Antecedents including Air Divisions Wings Groups Squadrons Aviation Engineers and the Women s Army Corps *A Handbook Of American Military History* Jerry Sweeney, 2019-09-25 This unique reference work covers the military history of the United States from the Revolution to the Gulf War The Handbook of American Military History is comprehensive easy to use and supplies essential information on the social technological political tactical and strategic developments that have affected the evolution of the U S **Special Bibliography Series** ,1957 [Air University Library Index to Military Periodicals](#) ,1985 **The Soviet Union and the Politics of Nuclear Weapons in Europe, 1969-87** Jonathan Haslam, 1989-06-30 A comprehensive study of the reasons for the Soviet deployment of the SS 20 missile in the 1970s and the reasons why they agreed to eliminate it in the 1987 INF Treaty In the process Haslam examines the evolution of Soviet foreign and defence policy towards Western Europe in the 1970s and 1980s [The Cold War](#) Jeremy Black, 2015-10-29 The term the Cold War has had many meanings and interpretations since it was originally coined and has been used to analyse everything from comics to pro natalist policies and science fiction to gender politics This range has great value but also poses problems notably by diluting the focus on war of a certain type and by exacerbating a lack of precision in definition and analysis The Cold War A Military History is the first survey of the period to focus on the diplomatic and military confrontation and conflict Jeremy Black begins his overview in 1917 and covers the long Cold War from the 7th November Revolution to the ongoing repercussions and reverberations of the conflict today The book is forward looking as well as retrospective not least in encouraging us to reflect on how much the character of the present world owes to the Cold War The result is a detailed survey that will be invaluable to students and scholars of military and international history *Ideologies in Conflict* Chris S. Adams, Jr., 2001-07 The author characterizes this book as a docu story As such it is an exceptionally well researched and skillfully written chronology of the history of Russia the Soviet Union and the cold War The work is unusual and unique It is unusual because unlike most books of an historical nature it is free flowing and not tightly structured It is unique because it is written with considerable input from the author s personal experiences interwoven with perceptions and anecdotal observations The work is Assertive I have no doubt that there was Cold War I fought in it The Author Candid Stalin is an unconscionable dictator but I liked the little son of a bitch Truman Provocative Truman is worthless Stalin and Challenging Why not set a goal just between the two of us let s find a practical way to solve our critical issues Reagan and we can set a specific agenda for how to straighten out Soviet American relations Gorbachev Finally it is Cautionary The world has become in many respects a safer place Unfortunately it is also still a dangerous place fraught with uncertainty Commander in Chief US Strategic Command and The missile force is in the same state of readiness as ten years ago My men and my missiles are always ready General of the Army Igor Sergeyev
