Gottlieb,2003-11-07 Updated with nearly forty new selections to reflect the tremendous growth and transformation of scholarly theological and activist religious environmentalism the second edition of This Sacred Earth is an unparalleled resource for the study of religion s complex relationship to the environment

Refuge in Crestone Aaron Thomas Raverty,2014-06-18 As globalization proceeds at an ever increasing and more unrelenting pace relations among the world s religions are taking on both a new visibility and a new urgency Christian theologians and others intent on innovative formulations in the theology of religions are making interreligious dialogue with non Christians a priority One way to promote creative scholarship in this quest is to tap into interdisciplinary resources and the author of this volume is uniquely qualified to do so since he holds graduate degrees in both theology and cultural anthropology Aaron Thomas Raverty s Refuge in Crestone A Sanctuary for Interreligious Dialogue elucidates how the praxis of interreligious dialogue as outlined in key Vatican documents in the Catholic Church could be better served by attending to the qualitative ethnographic methods of sociocultural anthropology Because the material behavioral and cognitive aspects of dialogue as revealed in daily life common social and political action religious experience and theological exchange are embedded in culture they are amenable to ethnographic analysis Using the unique multi religious Colorado site of Crestone and its environs as a fieldwork laboratory and self described Refuge for World Truths the ethnographic data gleaned from this project exemplify the creative interdisciplinary contributions of anthropology to theologizing It seeks to demonstrate using an empirical multi religious community as its focus how anthropology can support interreligious dialogue The results of such dialogue could not only assist the scholarly community by helping theologians arrive at new formulations in the burgeoning area of the theology of religions but might also serve the more practical goal of promoting peace as an alternative to violence in today s complex and sorely troubled world *The Sacred Earth* Brian Molyneaux,1995 **Sacred Earth, Sacred Soul** John Philip Newell,2021-07-06 A leading spiritual teacher reveals how Celtic spirituality listening to the sacred around us and inside of us can help us heal the earth overcome our conflicts and reconnect with ourselves John Philip Newell shares the long hidden tradition of Celtic Christianity explaining how this earth based spirituality can help us rediscover the natural rhythms of life and deepen our spiritual connection with God with each other and with the earth Newell introduces some of Celtic Christianity s leading practitioners both saints and pioneers of faith whose timeless wisdom is more necessary than ever including Pelagius who shows us how to look beyond sin to affirm our sacredness as part of all God s creation and courageously stand up for our principles in the face of oppression Brigid of Kildare who illuminates the interrelationship of all things and reminds us of the power of the sacred feminine to overcome those seeking to control us

John Muir who encourages us to see the holiness and beauty of wilderness and what we must do to protect these gifts
Teilhard de Chardin who inspires us to see how science faith and our future tell one universal story that begins with
sacredness By embracing the wisdom of Celtic Christianity we can learn how to listen to the sacred and see the divine in all
of creation and within each of us Human beings are inherently spiritual creatures who intuitively see the sacred in nature
and within one another but our cultures and at times even our faiths have made us forget what each of us already know deep
in our souls but have learned to suppress Sacred Earth Sacred Soul offers a new spiritual foundation for our lives once
centered on encouragement guidance and hope for creating a better world Wading Through Many Voices Harold
Recinos,2011-04-16 Wading through Many Voices brings together the voices of Latino a African American Asian American
Native American and Euro American scholars to produce a dialogue of public theology how faith communities divided by race
class ethnicity and gender can find a common ground for life together The authors articulate a multiethnic perspective on
public theology that counters the divisive identity politics of U S public life with systematic thinking that strengthens the
commitment to critically transform social relations in light of a shared vision of public good The contributors develop a
shared public theology that addresses social divisions while offering readers a broad vision to collaborate and struggle for an
improved understanding of the common good for our pluralistic society In light of emerging social issues the contributors
suggest that a fundamental respect for difference is a required first value for living together in a common social and political

Samson Georg Friedrich Händel, 1810 *Greening Philosophy of Religion* Jea Sophia Oh, John Quiring, 2024-07-08
Greening Philosophy of Religion Process Ecology and Ethics develops fruitful avenues for the theory and practice of greening philosophy of religion Collected with a pluralistic conception of both philosophy and religion the chapters in this volume address pressing and timely issues that involve imagining ecological democracy as an ideal horizon for facing climate catastrophe with a radical hope and sober vision for realizing a more sustainable planetary economy that places a high value on food sovereignty an ethic of trust and inter religious conversations Edited by Jea Sophia Oh and John Quiring this book offers a vital contribution to the fields of philosophy of religion environmental ethics religion and ecology comparative philosophy and ecotheology all tuned to the note of process thinking and a deep ecological sensibility Religions and Extraterrestrial Life David A. Weintraub, 2014-07-16 In the twenty first century the debate about life on other worlds is quickly changing from the realm of speculation to the domain of hard science Within a few years as a consequence of the rapid discovery by astronomers of planets around other stars astronomers very likely will have discovered clear evidence of life beyond the Earth Such a discovery of extraterrestrial life will change everything Knowing the answer as to whether humanity has company in the universe will trigger one of the greatest intellectual revolutions in history not the least of which will be a challenge for at least some terrestrial religions Which religions will handle the discovery of extraterrestrial life with ease and which will struggle to assimilate this new knowledge about our place in the universe Some religions as currently practiced appear to only be viable on Earth Other religions could be practiced on distant worlds but nevertheless identify both Earth as a place and humankind as a species of singular spiritual religious importance while some religions could be practiced equally well anywhere in the universe by any sentient beings Weintraub guides readers on an invigorating tour of the world's most widely practiced religions It reveals what if anything each religion has to say about the possibility that extraterrestrial life exists and how or if a particular religion would work on other planets in distant parts of the universe

Sacred Earth, Sacred Soul: A Celtic Guide to Listening to Our Souls and Saving the World John Philip Newell, 2021-07-08 A leading spiritual teacher reveals how Celtic spirituality listening to the sacred around us and inside us can help us heal the earth overcome our conflicts and reconnect with ourselves **Keepers of the Central Fire** Lorelei A.

Lambert,1999 The health of Native Americans is intimately tied to the health of the environment Yet abuses of land water and air continue to compromise the health of native people and their land rights This fascinating book explores this intimate relationship between people and the land and environment and health Here is an important message for health care providers ecologists and those who attempt to live their lives in harmony with the earth Our Tribe Chanting Andrew Ramer,2025-01-28 We gay men come from every other people In this time of social political and environmental challenges we have a sacred role in Coming In to who we are so that together we can help to unify and heal the world and the tales stories poems and rituals in this book were gathered together to support us in doing that Our Tribe Chanting is the final stand alone volume in a groundbreaking trilogy that begins with Two Flutes Playing and Two Hearts Dancing **Lessons Learned in Protecting and Restoring Biodiversity** Bonnie L. Harper-Lore,Gary K. Lore,2024-09-11 We have everything we need to begin solving this crisis with the exception of the will to act But in America our will to take action is itself a renewable resource Al Gore 2002 This book explains why we should take action and how to do so giving insights saving time and money for future generations Earth s biodiversity is threatened in many ways including by climate change invasive species and development Conservation response cannot be defined by political boundaries yet lands are commonly managed at the local state and national levels These authors actions from all levels crossed lines to partner and get things done for the greater good Expert educators scientists practitioners citizens and policymakers took action and contributed to the present volume Conservation requires a multidisciplinary approach and so herein some 50 disciplines inform and inspire future practices and policies Students and professionals alike in applied ecology wildlife biology entomology botany land management landscape architecture journalism ethics and public policy benefit from these authorities stories Risk Management in a Hazardous Environment Michael Bolig,2010-05-10 A research focus on hazards risk perception and risk minimizing strategies is relatively new in the social and environmental sciences This volume by a prominent scholar of East African societies is a powerful example of this growing interest Earlier theory and research tended to describe social and economic systems in some form of equilibrium However recent thinking in human ecology evolutionary biology not to mention in economic and political theory has come to assign to risk a prominent role in predictive modeling of behavior It turns out that risk minimalization is central to the understanding of individual strategies and numerous social institutions It is not simply a peripheral and transient moment in a group s history Anthropologists interested in forager societies have emphasized risk management strategies as a major force shaping hunting and gathering routines and structuring institutions of food sharing and territorial behavior This book builds on some of these developments but through the analysis of quite complex pastoral and farming peoples and in populations with substantial known histories The method of analysis depends heavily on the controlled comparisons of different populations sharing some cultural characteristics but differing in exposure to certain risks or hazards The central questions guiding this approach are 1 How are hazards generated through environmental

variation and degradation through increasing internal stratification violent conflicts and marginalization 2 How do these hazards result in damages to single households or to individual actors and how do these costs vary within one society 3 How are hazards perceived by the people affected 4 How do actors of different wealth social status age and gender try to minimize risks by delimiting the effect of damages during an on going crisis and what kind of institutionalized measures do they design to insure themselves against hazards preventing their occurrence or limiting their effects 5 How is risk minimization affected by cultural innovation and how can the importance of the quest for enhanced security as a driving force of cultural evolution be estimated
