

SACRED GEOMETRY

Symbolism and Purpose in Religious Structures

Nigel Pennick

Geometry underlies the structure of all things - from galaxies to molecules. Despite our separation from the natural world, we human beings are still bounded by the laws of the universe. Each time a geometrical form is created, an expression of this universal oneness is made, and from the dawn of time religious structures have expressed this unity in their every detail. In this absorbing history, the first of its kind, the applications of sacred geometry are examined and the full extent of its practice is revealed. Sacred geometry is responsible for the feeling of awe generated by a gothic cathedral as well as the 'rightness' of a Georgian drawing-room. Sacred Geometry traces the rise and fall of this transcendent art from the megalithic stone circles to Art Nouveau and reveals how buildings that conform to its timeless principles mirror the geometry of the cosmos.

with a summary history of the topic's use in architecture. Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage. Among the provocative issues discussed in terms of their relationship to architecture are chaos theory, feminism, service to the community, and the use of metaphor. Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts. All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text.

Creating Places of Power Nigel Pennick, 2022-11-29. An exploration of the traditional rites of auspicious building and crafting. Explains the ceremonial beginnings and Hermetic principles in the laying out of foundations not only for sacred buildings like temples but also for homes and barns. Examines the principles and ceremonies of electional astrology and details how to compute natural time as opposed to clock time. Shares examples from ancient Egypt, Iran, India, and Europe that range from the Stone Age to the Renaissance and include secret societies. When we make things, whether a building, a sacred space, or a magical object, there is a precise moment when the artifact comes into being as a separate entity. That moment in time possesses its own unique quality, and because of this, there is a right time to do something and a wrong time. And as Nigel Pennick reveals, we have the power to select favorable moments for our creations, just as our ancestors did. Illustrating ancient principles of divination, chronomancy, and electional astrology, Pennick examines all the factors behind the ancestral art of geomancy: the auspicious creation and alignment of sacred buildings as places of power. Sharing examples from ancient Egypt, Iran, India, and Europe that range from the Stone Age to the modern day, including secret societies like the Rosicrucians and the Freemasons, he explains how many cities were constructed on specially selected sites and founded ritually at precise predetermined moments. Looking at the traditional rites of creating places of power, Pennick explains the ceremonial beginnings and Hermetic principles in the laying out of foundations as well as the use of sacrifice in the building of many notable structures. Examining the role of sacred geometry in geomancy, Pennick explains the Hermetic meaning assigned to each direction in traditional European cultures as well as the principles of natural measures and the science of understanding lucky and unlucky days. Revealing how geomantic principles are rooted in the structure of the world and the cosmic patterns of space and time, the author shows how they transcend the ages and are just as meaningful today as they were to our ancestors.

Gateways to the Otherworld Philip Gardiner, 2009-01-30. Is there life after death? Is there a world outside our own? WHAT IF ANCIENT PEOPLE ALREADY KNEW THE ANSWERS TO THESE QUESTIONS? Acclaimed author Philip Gardiner proves that our ancestors were far more advanced scientifically and spiritually than previously believed. Through a special technique, ancient Egyptians and others were able to journey to other realities within themselves in short to the Otherworld. The author undergoes his own experiments to prove the point. Gardiner also shows that ancient people knew more about their place in the universe than previously thought. They placed buildings and objects in specific places around the globe because these points had a distinct relation to the universal and human wave.

resonance of electromagnetism When the ancients journeyed to these places they were joining with God and visualizing the effect The remarkable conclusions and discoveries in this book not only dispel some age old myths but also address questions such as Is there a universal frequency that allows the mind to travel into other realms Does the Great Pyramid hold a real secret to the quantum realm What are those mysterious round towers found scattered around our planet Is ESP real What Gateways to the Otherworld uncovers are not just tales of ancient trips to other realms nor theories on why stone circles were built in specific locations but real answers based on thorough research and science *The Mathematical Mind of F.
