A Psychonaut's Guide to the Invisible Landscape Dan Carpenter, 2006-02-14 A bold cartography of the inner landscape visible only to those experiencing altered states Presents the psychedelic experience as an objective landscape that embodies the Other rather than a subjective state of mind Provides corroboration of phenomena encountered by those who venture into this domain Journeying into the invisible world revealed by his use of the dissociative psychedelic DXM dextromethorphan Dan Carpenter found that what he experienced was not simply subjective sensations and psychological states but an objective world of familiar if inordinately odd landmarks and characters The running diary he kept of these voyages recounts impressions of a landscape charted by other travelers into this Inner Space and includes descriptions of many of the same phenomena recorded by such mind travelers as Terence and Dennis McKenna Alexander and Ann Shulgin and others who have experienced the hive mind the pool of all consciousness Into this territory where expression is like chaos theory where oddly symmetrical order manifests out of the seemingly anarchic swirl of images and events the author ventures with the mind set of a naturalist accepting whatever might be rather than what he hopes he might find What emerges is not a location crafted by subjective experience but a landscape that embodies the Other and that represents a conscious state in which the barriers between the self and the not self dissolve

An Encyclopedia of Shamanism Volume 2 Christina Pratt, 2007-08-01 Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness Shamanism arises from the actions the shaman takes in non ordinary reality and the results of those actions in ordinary reality It is not a religion yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development
