Sacred Science:

The Need For a Sacred Science Seyyed Hossein Nasr, 2005-08-12 The meaning of a science rooted in the sacred its contrast to modern science and its pertinence to us today *The Sacred Science* Nick Polizzi, 2018-04-03 In 2010 Nick Polizzi did something unimaginable He assembled a group of eight desperately ill patients from around the world and brought them into the heart of the Amazon rainforest to put the mysterious medicines of native shamans to the test The healing journey that unfolded would change their lives and his own forever In *The Sacred Science* we join Nick as he explores these primordial traditions and learns firsthand what it takes to truly heal ourselves of physical disease emotional trauma and the sense of lostness that so many of us feel in these modern times We venture into a place where the ordinary rules we live by even survival instincts don't apply where the only thing to do is to step forward and be ready for anything Nick is not a guru or shaman he is an ordinary guy who pieced together an illuminating journey one experience at a time In this riveting true story we're shown the many layers that must be peeled away in order for us to find the truth of who we are and why we're here This book is a bridge between the flashy fast moving modern world and the forgotten ways of a healthier earth connected ancestral past You'll find practices and principles of native wisdom that you can put to use in your own life and you'll gain a new understanding of what it means to heal In the end what will become of the eight patients who set out on this path with Nick Will the exotic jungle medicines and harrowing rites of passage destroy them or give them a new lease on life Five will return with remarkable healing results Two will return disappointed One won't return at all **Summa**

Complete & Unabridged 3 Parts + Supplement & Appendix + interactive links and annotations) Thomas Aquinas, 2023-12-05 In his magnum opus *Summa Theologica* Thomas Aquinas endeavors to systematize the entirety of Christian theology presenting complex theological doctrines in a structured and accessible manner The work is divided into three parts addressing questions of God ethics and the sacraments enriched with annotations and interactive links that enhance reader engagement Aquinas employs a dialectical style utilizing the Scholastic method of questioning and answering which fosters a profound understanding of faith and reason's relationship a hallmark of medieval scholasticism His synthesis of Aristotelian philosophy with Christian doctrine marks a pivotal contribution to Western thought addressing fundamental issues that resonate through subsequent theological discourse Thomas Aquinas a thirteenth century philosopher and theologian is often heralded as one of the foremost figures in Western philosophy His formative experiences in the

intellectual and spiritual milieu of the Dominican order coupled with his engagement with the works of Aristotle significantly influenced his theological perspectives. The *Summa Theologica* reflects Aquinas's commitment to exploring the depths of divine truth while accommodating human reason, seeking a harmonious integration of faith and intellect, earning him acclaim as a Doctor of the Church. I highly recommend *Summa Theologica* for scholars and laypersons alike as it serves not only as a theological treatise but as an enduring guide to moral reasoning and spiritual inquiry. The interactive elements in this edition enrich the reading experience, allowing for deeper engagement with Aquinas's insights into ethics, divine law, and the nature of God. This work remains essential for anyone seeking to understand the foundations of Christian theology and its implications for contemporary faith and reason.

[The Universal Kabbalah](#) Leonora Leet, 2004-09-29. This landmark work by an innovative modern Kabbalist develops a scientific model for kabbalistic cosmology and soul psychology. Derived from the kabbalistic diagram of the Tree of Life and the author's own Sabbath Star diagram, this universal model encodes the laws of all cosmic manifestation, giving a mathematical basis to many aspects of this mystical tradition and providing a new synthesis of science and spirituality that may well write a new chapter to the Kabbalah.

The Structure of Political Thought Charles N. R. McCoy, 2017-07-05. Originally published in 1963, this classic book is a rethinking of the history of Western political philosophy. Charles N. R. McCoy contrasts classical medieval principles against the hypotheses at the root of modern liberalism and modern conservatism. In Part I, *The Classical Christian Tradition* from Plato to Aquinas, the author lays the foundation for a philosophical structure capable of producing constitutional liberty. Part II, *The Modern Theory of Politics* from Machiavelli to Marx, attempts to show, beginning with Machiavelli, the reversal and destruction of the pre-modern structure postulated in Part I. McCoy stresses the great contributions of Aristotle to political thought found in his more familiar *Ethics* and *Politics*, but also includes key insights drawn from *Metaphysics* and *Physics*. These contributions are developed and perfected, McCoy argues, by Augustine and Aquinas. Two other important features include McCoy's epistemological insights into Plato's work that will be new to many readers and the author's juxtaposition of traditional natural law with the modernized theory of natural law. The modern account of autonomous natural law in McCoy's view helps explain the totalitarian direction of key aspects of modern political thought. This classic volume on the origins of modern philosophical thought remains a standard in the field.

Integral Research and Innovation Ronnie Lessem, Alexander Schieffer, 2016-05-23. The core question underlying *Integral Research and Innovation* is: How can social research be turned into social or indeed integral innovation? Complementing their acclaimed *Transformation Management*, this second book in the *Transformation and Innovation Series* explains how the knowledge creation that underpins transformative processes occurs. The authors show how research has to be transformative rather than just informative if it is to contribute usefully to building integrated and sustainable enterprises. At a time when business practitioners and others responsible for organizational development are desperate for usable knowledge, the authors contend that social science research is failing to support

business and management generally. Instead, academic researchers engage in esoteric arguments about research methodology which do not contribute usefully to the resolution of real world problems. Drawing on their experience of environments where researchers and practitioners do engage constructively, resulting in research that is active, participative and genuinely innovative, Professor Lessem and Dr Schieffer are in territory that is far beyond that covered by standard works on research methodology. This is a book not just for academics and researchers wanting to make a meaningful contribution, but also for reflective practitioners from the corporate, organizational and consultancy based worlds who operate in the area of interface between business and management, education, learning and society, and who need to know how research can be used to make a real difference.

[Fingerprints of the Gods](#) Graham Hancock, 2025-06-17

Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. Graham Hancock is featured in the popular *Ancient Apocalypse*, a Netflix original docuseries. Hancock structures his arguments through the scientific method. He's asking the right questions. If it's true, then it can significantly change the course of history and our understanding of our civilisations.

Medium

In *Fingerprints of the Gods*, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind's hidden past. In ancient monuments as far apart as Egypt's Great Sphinx, the strange Andean ruins of Tiahuanaco and Mexico's awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as yet unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement and evolved scientific knowledge. A record-breaking 1 bestseller in Britain, *Fingerprints of the Gods* contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past and so our future. And *Fingerprints of the Gods* tells us something more. As we recover the truth about prehistory and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us: a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time, a cataclysm that may be about to recur.

Summa Theologica (Complete) Saint Thomas Aquinas, 1955-01-01 All Scripture inspired of God is profitable to teach to reprove to correct to instruct in justice Now Scripture inspired of God is no part of philosophical science which has been built up by human reason Therefore it is useful that besides philosophical science there should be other knowledge i e inspired of God I answer that It was necessary for man's salvation that there should be a knowledge revealed by God besides philosophical science built up by human reason Firstly indeed because man is directed to God as to an end that surpasses the grasp of his reason The eye hath not seen O God besides Thee what things Thou hast prepared for them that wait for Thee Isa 66 4 But the end must first be known by

men who are to direct their thoughts and actions to the end Hence it was necessary for the salvation of man that certain truths which exceed human reason should be made known to him by divine revelation Even as regards those truths about God which human reason could have discovered it was necessary that man should be taught by a divine revelation because the truth about God such as reason could discover would only be known by a few and that after a long time and with the admixture of many errors Whereas man's whole salvation which is in God depends upon the knowledge of this truth Therefore in order that the salvation of men might be brought about more fitly and more surely it was necessary that they should be taught divine truths by divine revelation It was therefore necessary that besides philosophical science built up by reason there should be a sacred science learned through revelation Although those things which are beyond man's knowledge may not be sought for by man through his reason nevertheless once they are revealed by God they must be accepted by faith Hence the sacred text continues For many things are shown to thee above the understanding of man Eccles 3 25 And in this the sacred science consists Sciences are differentiated according to the various means through which knowledge is obtained For the astronomer and the physicist both may prove the same conclusion that the earth for instance is round the astronomer by means of mathematics i e abstracting from matter but the physicist by means of matter itself Hence there is no reason why those things which may be learned from philosophical science so far as they can be known by natural reason may not also be taught us by another science so far as they fall within revelation Hence theology included in sacred doctrine differs in kind from that theology which is part of philosophy Further no science deals with individual facts But this sacred science treats of individual facts such as the deeds of Abraham Isaac and Jacob and such like Therefore sacred doctrine is not a science On the contrary Augustine says to this science alone belongs that whereby saving faith is begotten nourished protected and strengthened But this can be said of no science except sacred doctrine Therefore sacred doctrine is a science I answer that Sacred doctrine is a science We must bear in mind that there are two kinds of sciences There are some which proceed from a principle known by the natural light of intelligence such as arithmetic and geometry and the like There are some which proceed from principles known by the light of a higher science thus the science of perspective proceeds from principles established by geometry and music from principles established by arithmetic So it is that sacred doctrine is a science because it proceeds from principles established by the light of a higher science namely the science of God and the blessed Hence just as the musician accepts on authority the principles taught him by the mathematician so sacred science is established on principles revealed by God **Losing Reality** Robert Jay
