Securing Protected Areas In The Face Of Global Change Issues And Strategies:

Securing protected areas in the face of global change : key lessons learned from case studies and field learning sites in protected areas Peter Shadie, 2008 **Securing Protected Areas in the Face of Global Change** Charles Victor Barber, Kenton Miller, Melissa M. Boness, 2004 We live in a world of rapid global change biophysical socio economic and institutional This book examines the issues and options for protected area management to ensure that we continue to protect the Earth's most valuable ecosystems in the face of these unprecedented changes Managing Protected Areas Michael Lockwood, Graeme Worboys, Ashish Kothari, 2012-05-04 This handbook produced by world renowned experts from the World Conservation Union IUCN spans the full terrain of protected area management and is the international benchmark for the field The book employs dozens of detailed international cases studies hundreds of concise topical snapshots maps tables illustrations and a colour plate section as well as evaluation tools checklists and numerous appendices to cover all aspects of park management from biodiversity to natural heritage to financial management The book establishes a conceptual underpinning for protected area management presents guiding principles for the 21st century reflects recent work on international best practice and provides an assessment of skills required by professionals As the most authoritative guide ever compiled to the principles and practice of protected area management this volume is essential for all professionals and students in all countries and contexts **Foundations of Environmental Sustainability** Larry Rockwood, Ronald Stewart, Thomas Dietz, 2008-06-04 This book reviews and analyzes the period roughly from the 1950s to the present when the environment became an issue as important as economic growth or war and peace to assess the current situation and begin planning for the challenges that lie ahead Most people are aware of both the environmental destruction taking place around the world and of the specter of climate change The devastation of New Orleans by hurricane Katrina illustrates the potential for disaster when climate change is combined with the mismanaged environmental policy How did we get to this point What has been done and what can be done to avoid future environmental disasters Thirty two contributing chapter authors among them one of the principal drafters of the National Environmental Policy Act Chief of the African Environment Division and the World Bank Vice President of the Center for Conservation Innovation at the World Wildlife Fund President of the Zoological Society of London former President of the Ecological Society of America use their unique authoritative perspective to review the evolution of environmental science and policy in the past half century Each author describes the evolution of environmental science and policy in the past half century and consider the challenges of the future Although the authors of this book come from various fields they have followed paths that have generally converged on the concept of sustainability This book attempts to define what sustainability is how we can achieve it and what the prospects for sustainability in the future are *Biodiversity Litigation* Guillaume Futhazar, Sandrine Maljean-Dubois, Jona Razzaque, 2023 This book promotes the concept of Biodiversity Litigation as a common notion of environmental law and investigates litigation in a variety of

countries and from various perspectives It opens the space for more creative legal thinking when dealing with and analysing biodiversity related disputes Guidelines for Protected Areas Legislation Barbara J. Lausche,2011 The central aim of this publication is to consider the key elements of a modern comprehensive and effective legal framework for successful management of protected areas They provide practical guidance for all those involved in developing improving or reviewing national legislation on protected areas be they legal drafters and practitioners protected area managers interested NGOs or scholars These guidelines include fifteen case studies eight dealing with the protected area legislation of individual countries and six cases dealing with specific sites providing fundamental solutions that stand the test of time Transforming Parks and Protected Areas Kevin S. Hanna,Douglas A. Clark,D. Scott Slocombe,2007-10-18 A rare collection of articles that fuses academic theory critique of practice and practical knowledge Transforming Parks and Protected Areas analyzes and critiques the emerging issues in the design and operation of parks and protected areas **The World's Protected Areas** Stuart Chape,Mark Spalding,Martin Jenkins,2008 Illustrated with maps color photographs and graphics this reference offers a comprehensive status report on the world s 60 000 parks nature reserves and other land and marine areas designated as protected areas It offers an overview of what these protected areas have and have not accomplished and what threats they face Provided by publisher **Ski Trails and Wildlife** Eric Burr,2008-05-08 Snow sports are usually the first step to learning about snow country wildlife which is only as safe as knowledgeable people want it to be Unfortunately knowledge is too often lacking and skiing is perceived as detrimental too wildlife Reality is that skiing in all its many forms from ski lift resorts to far flung Scandinavian style ski touring holds the keys to wildlife conservation and restoration No amount of litigation can change this basic fact of life although the Mineral King Case from the Supreme Court of the United States certainly changed the legal landscape for all environmental litigation Mineral King s near miss at becoming another ski lift avalanche disaster area preceded Early Winters another almost ski lift area which shares the honor of being a Supreme Court case and is the last chapter of this book Olympic National Park is the other ski history explored so that the National Parks are given equal emphasis with America s National Forests and Canada s Crown Lands An extensive bibliography also includes many electronically available sources The language is not technical and no prior experience with either skiing or wildlife is presumed The book is primarily written for both skiing and wildlife enthusiasts who may not know much about each other It is intended as a peace offering to hopefully prevent future ski wars and unnecessary trips through the legal system That effort could be better spent restoring wildlife and the life support system of our circumpolar boreal forest Protected Area Governance and Management Graeme L. Worboys,Michael Lockwood,Ashish Kothari,Sue Feary,Ian Pulsford,2015-04-08 Protected Area Governance and Management presents a compendium of original text case studies and examples from across the world by drawing on the literature and on the knowledge and experience of those involved in protected areas The book synthesises current knowledge and cutting edge thinking from the diverse branches of practice and learning relevant to

protected area governance and management It is intended as an investment in the skills and competencies of people and consequently the effective governance and management of protected areas for which they are responsible now and into the future The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term and organisations such as International Union for the Conservation of Nature are a unifying force in this regard Nonetheless protected areas are a socio political phenomenon and the ways that nations understand govern and manage them is always open to contest and debate The book aims to enlighten educate and above all to challenge readers to think deeply about protected areas their future and their past as well as their present The book has been compiled by 169 authors and deals with all aspects of protected area governance and management It provides information to support capacity development training of protected area field officers managers in charge and executive level managers

A Guide to Securing Protected Areas in the Face of Global Change ,2003 Food Production and Nature Conservation Iain J. Gordon,Herbert H.T. Prins,Geoff R. Squire,2016-11-25 Feeding the world s growing human population is increasingly challenging especially as more people adopt a western diet and lifestyle Doing so without causing damage to nature poses an even greater challenge This book argues that in order to create a sustainable food supply whilst conserving nature agriculture and nature must be reconnected and approached together The authors demonstrate that while the links between nature and food production have to some extent already been recognized until now the focus has been to protect one from the impacts of the other Instead it is argued that nature and agriculture can and should work together and ultimately benefit from one another Chapters describe efforts to protect nature through globally connected protected area systems and illustrate how farming methods are being shaped to protect nature within agricultural systems The authors also point to many ways in which nature benefits agriculture through the ecosystem services it provides Overall the book shows that nature conservation and food production must be considered as equally important components of future solutions to meet the global demand for food in a manner that is sustainable for both the human population and the planet as a whole
