the costs effectiveness and implications of outsourcing some of their operations and services This book provides a framework for decision makers to view and review information services within their organizations Entire units components of libraries and information centres are defined and untangled so that the widest variety of organizations can analyse their own environments Although there is a minimal use of library and computing jargon a short glossary at the end explains terms for which there is no simple English language substitute Each chapter is accompanied by comments from a broad range of experts in the information field
