United States. Congress. Senate. Committee on the Judiciary,1956 *Critique of Security* Mark Neocleous,2008-05-12 This book brings together a range of diverse discussions about security in order to sustain a genuine critique of the subject It is unique in its examination of the historical and political links between social security and national security and in its assessment of the way that emergency powers as the most intense realisation of the rhetoric of national security have been synthesised with normal law Among other ideas and concepts Mark Neocleous discusses the place of security in the liberal tradition of political theory Building on insights from Foucault and Marx he argues that liberalism s central category is not liberty but security He also deals with the role of security in justifying the introduction and continuation of emergency powers through a historical excavation of the state of emergency a political reading of the way emergency powers are only tangentially concerned with warfare and a theoretical reading of the debate between Schmitt and Benjamin **Communist Domination of Unions and National Security** United States.
