Younker, 2016-04-08 The year 2008 marks the 40th anniversary of Madaba Plains Project archaeological research in the Hashemite Kingdom of Jordan The Madaba Plains Project is one of the longest lived continuously running archaeological excavation projects in the Middle East Spanning four decades the project with its beginnings at Tall Hisban in the late sixties has engaged 1 500 participants produced scores of publications and spawned a dozen other projects Its legacy includes being one of the first major Near Eastern archaeology projects to adopt a multi millennial regional approach to incorporate ethnoarchaeology and environmental studies to construct data around a food systems approach and to computerize procedures for archaeological data acquisition and analysis thus helping advance both the theoretical underpinnings and the field methods of archaeology in the southern Levant and beyond Madaba Plains Project directors wishing to celebrate this major scientific and historical milestone have produced this anniversary volume which highlights the value of ongoing collaborative research across the region of central Jordan attempting to explain life and survival from the Bronze ages through the Islamic and early modern periods and features the latest results from ongoing research enlivens the discussion by hearing from major scholars in the field who in the process of assessing the contributions of the project to the archaeology of the southern Levant broaden the discussion in the context of ancient Near Eastern archaeological research and expands the horizons of the project s research by presenting the ever enlarging number and extent of projects conducted by dig directors once on staff with the Madaba Plains Project thereby taking readers all over Jordan and beyond **“And in Length of Days Understanding” (Job 12:12)** Erez Ben-Yosef, Ian W. N. Jones, 2023-08-01 This two volume book presents cutting edge archaeological research primarily as practiced in the Eastern Mediterranean region These volumes key foci are inspired by the work of Thomas E Levy Volume 1 provides an in depth look at new archaeological research in the southern Levant primarily in modern Israel and Jordan inspired by Levy s commitment to understanding social political and economic processes in a long term or deep time perspective Volume 2 focuses on new research in several key areas of 21st century anthropological archaeology and archaeological science Volume 1 is organized around two major themes 1 the later prehistory of the southern Levant or the Neolithic Chalcolithic and Bronze Age and 2 new research in biblical archaeology or the historical archaeology of the Iron Age Each section contains a combination of new perspectives on key debates and studies introducing new research questions and directions Volume 2 is organized around five major themes 1 the archaeology of the Faynan copper ore district of southern Jordan a key region for archaeometallurgical research in West Asia where Levy conducted field research for over a decade 2 new research in archaeometallurgy beyond the Faynan region 3 marine and maritime archaeology focusing on

issues of trade and environmental change 4 cyber archaeology an important 21st century field Levy conceived as the marriage of archaeology engineering computer science and the natural sciences and 5 key issues in anthropological archaeological theory In addition to presenting the reader with an up to date view of research in each of these areas the volume also has chapters exploring the connections between these themes e g the maritime trade of metals and cyber digital archaeological approaches to metallurgy The work contains contributions from both up and coming early career researchers and key established figures in their fields This book is an essential reference for archaeologists and scholars in related disciplines working in the southern Levant and the Eastern Mediterranean Garden History John Dixon Hunt,1992 This collection of essays explores the issues methods and approaches that students in landscape architecture have developed during that period to cope with the expanding subject of gardens and their history The volume will serve as a bench mark in the field with its range of approaches and wealth of illustrative material Each contributor focuses upon a specific piece of his or her research and uses this as a basis to discuss the wider implications of the study of gardens within such contexts as botanical horticultural agrarian literary technological social culture political and art history Provided by publisher *The Archaeology of Israel* Neil Asher Silberman,David B. Small,1997-03-01 This challenging volume offers a timely and extensive overview of the current state of archaeology in Israel Contributed by leading scholars the essays focus on current problems and cutting edge issues ranging from reviews of ongoing excavations to new analytical approaches Of interest not only to archaeologists but to social historians as well the topics include archaeology and social history archaeology and ethnicity as well as the overarching issue of how texts and archaeological knowledge are to be combined in the reconstruction of ancient Israel **“Did I Not Bring Israel Out of Egypt?”** James K. Hoffmeier,Alan R. Millard,Gary A. Rendsburg,2016-05-19 The Hebrew Scriptures consider the exodus from Egypt to be Israel s formative and foundational event Indeed the Bible offers no other explanation for Israel s origin as a people It is also true that no contemporary record regarding a man named Moses or the Israelites generally either living in or leaving Egypt has been found Hence many biblical scholars and archaeologists take a skeptical attitude dismissing the exodus from the realm of history However the contributors to this volume are convinced that there is an alternative more positive approach Using textual and archaeological materials from the ancient Near East in a comparative way in conjunction with the Torah s narratives and with other biblical texts the contributors to this volume specialists in ancient Egypt ancient Near Eastern culture and history and biblical studies maintain that the reports in the Hebrew Bible should not be cavalierly dismissed for ideological reasons but rather should be deemed to contain authentic memories **Arch Of Society** Thomas Levy,1995-01-01 This volume marks a departure from earlier descriptive archaeological summaries of the Holy Land Taking an anthropological and socio economic perspective many of the leading archaeologists who work in Israel and Jordan today present timely and concise summaries of the archaeology of this region Chronologically organized each chapter outlines the major cultural transitions which occurred in a given archaeological

period To explain the processes which were responsible for culture change a review is made of the most recent research concerning settlement patterns innovations and technology religion and ideology and social organization The material culture of every period of human history in the Holy Land is explored from the earliest prehistoric hominids through the Biblical and historical periods and up to modern 20th century times Each chapter is accompanied by settlement pattern maps and a plate highlighting the major artifacts which archaeologists use to identify the material culture of the period In addition windows are presented which focus on major social issues and controversies such as The Agricultural Revolution the Israelite Conquest of Canaan and Ancient Metal Working and Social Change This volume should provide students and the general reader with a useful reference volume concerning the archaeology of societies which lived and live in the Holy Land
