Seduction Of Place The City In The Twenty First Century And Beyond:

Architecture, Ethics, and the Personhood of Place Gregory Caicco, 2007 Architecture and environmental design are among the last professional fields to develop a sustained and nuanced discussion concerning ethics Hemmed in by politics and powerful clients on one side and the often unscrupulous practices of the construction industry on the other environmental designers have been traditionally reluctant to address ethical issues head on And yet the rapid urbanization of the world's population continues to swell into new megacities each less healthy welcoming secure or environmentally sustainable than the next Green carbon reduced and sustainable building practices are important ways architects have recently responded to the symptoms of the crisis but are these efforts really addressing the core issues Taking the Dine Navajo Hogan Song a song used to protect and nourish the personhood of newly constructed dwellings as their inspiration the architects philosophers poets and other contemporary scholars contributing to this volume demonstrate that a deeper more radical change in our relationship to the built world needs to occur While offering a careful critique of modernist corporate or techno enthralled design practices these essays investigate an alternative relational ecology whose wisdom draws from ancient and often marginalized voices if not the whisperings of the earth itself Contributors include Richard Kearney Alberto Perez Gomez Juhani Pallasmaa Karsten Harries Edward Casey Susan Stewart David Abram Stacy Alaimo Jace and Laura Weaver Philip Sheldrake and Sebnem Yucel Young

the pursuit of economies of scale But this epochal march of modernity is now over In *Beyond Digital* Mario Carpo reviews the long history of the computational mode of production showing how the merger of robotic automation and artificial intelligence will stop and reverse the modernist quest for scale Today's technologies already allow us to use nonstandard building materials as found or as made and assemble them in as many nonstandard intelligent adaptive ways as needed the microfactories of our imminent future will be automated artisan shops The post industrial logic of computational manufacturing has been known and theorized for some time By tracing its theoretical and technical sources and reviewing the design theories that accompanied its rise Carpo shows how the computational project long under the sway of powerful antimodern ideologies is now being recast by the urgency of the climate crisis which has vindicated its premises and by the global pandemic which has tragically proven its viability Looking at the work of a new generation of designers technologists and producers *Beyond Digital* offers a new modern agenda for our post industrial future

Tales of Berlin in American Literature up to the 21st Century Joshua Parker, 2016-03-17 Of all European cities Americans today are perhaps most curious about Berlin whose position in the American imagination is an essential component of nineteenth century postwar and contemporary transatlantic imagology Over various periods Berlin has been a tenuous space for American claims to cultural heritage and to real geographic space in Europe symbolizing the ultimate evil and the power of redemption This volume offers a comprehensive examination of the city's image in American literature from 1840 to the present Tracing both a history of Berlin and of American culture through the ways the city has been narrated across three centuries by some 100 authors through 145 novels short stories plays and poems *Tales of Berlin* presents a composite landscape not only of the German capital but of shifting subtexts in American society which have contextualized its meaning for Americans in the past and continue to do so today

The Seduction of Place Joseph Rykwert, 2001-10 No other place on earth is as full both of promise and of dread as the city it is at once alienating and exciting These concentrations of people have not however come about as the result of vast immutable impersonal forces but because of human choices The worsening or betterment of urban life will also be the result of choices Our choices That cities display and represent the personal desires of their inhabitants is central to Joseph Rykwert's argument in *The Seduction of Place* Insisting that they are the physical constructs of communities he travels through history to trace their roots in ancient times and outlines current attempts and future possibilities to improve the metropolis Rykwert includes a broad range of urban landscapes 18th and 19th century Paris and London the current sprawl of Mexico City and Cairo planned cities like Brasilia and finally New York the world capital Always opinionated and often controversial Rykwert assesses how and why urban projects from the past succeeded or failed and what lessons can be drawn from them for the future Ultimately *The Seduction of Place* is a deeply felt and powerfully reasoned call for a commitment by every citizen to the creation of a more humane place to live
