confidence in drawing or if your efforts are less than satisfactory despite repeated attempts at capturing what are seen in
front You might be an absolute beginner or one who has spent a lifetime away from creative activities due to work or family
commitments You might cringe at the idea of picking up a pencil due to a severe inner critic or an affliction that can only be
described as picture dyslexia The first part of this book attempts to decode the underlying causes of this difficulty via a test
and questionnaire to be followed with special drawing exercises from the most basic The main part of this book does not take
the orthodox approach of informing on vanishing points perspectives and plotting but merely to help you see what is in front
of you Instead this book starts at the beginning to learn the language of line from A B and C Within you will find a series of
drawing exercises geared towards combating distorted perceptions in drawing by exercising all fields of vision This includes
exercises on visual judgment symmetrical drawing abstract drawing pictures within frames negative shapes the weight of

marks upside down drawing and more Further chapters explore the realms of tonality again via the language of shading from A B and C Opportunities for progression can be found within the latter chapters exploring specialised shading techniques A guide on the prescriptive areas of drawing can be found in the final chapter for guidance This includes a section on plotting your drawing the artist s viewfinder vanishing points and how to draw ellipses Print book s dimensions 8 5x5 5in and 110 pages With 15 500 words and around 90 images The author has a PCET qualification in teaching as well as a Degree in Fine Art
