Seeds of Famine Richard W. Franke,1992-12-03 SCOTT copy 2 From the John Holmes Library Collection **Seeds of Exchange** Maria Fedorova,2025-08-15 Seeds of Exchange examines the US and Soviet exchange of agricultural knowledge and technology during the interwar period Maria Fedorova challenges the perception of the Soviet Union as a passive recipient of American technology and expertise She reveals the circular nature of this exchange through official government bureaus amid anxious farmers in crowded auditoriums in cramped cars across North Dakota and Montana and by train over the once fertile steppes of the Volga Amid the post World War I food insecurity Soviet and American agricultural experts relied on transnational networks bridging ideological differences As Soviets traveled across the US agricultural regions and Americans plowed steppes in the southern Urals and the lower Volga both groups believed that innovative solutions could be found beyond their own national borders Soviets were avidly interested in American technology and American agricultural experts perceived the Soviet Union to be an ideal setting for experimenting with and refining modern farm systems and organizational practices As Seeds of Exchange shows agricultural modernization was not the exclusive domain of Western countries Censored 2001 Peter Phillips,Project Censored,2001-04-03 The yearly volumes of Censored in continuous publication since 1976 and since 1995 available through Seven Stories Press is dedicated to the stories that ought to be top features on the nightly news but that are missing because of media bias and self censorship The top stories are listed democratically in order of importance according to students faculty and a national panel of judges Each of the top stories is presented at length alongside updates from the investigative reporters who broke the stories Beyond the Top 25 stories additional chapters delve further into timely media topics The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse Censored D j Vu signs of hope in the alternative and news media and the state of media bias and alternative coverage around the world In the Truth Emergency section scholars and journalists take a critical look at the US NATO military industrial media empire And in the Project Censored International section the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world A perennial favorite of booksellers teachers and readers everywhere Censored is one of the strongest life signs of our current collective desire to get the news we citizens need despite what Big Media tells us *A Dictionary of the Economic Products of India: Dacrydium to Gordonia* Sir George Watt,1890 **Consumers' Guide** ,1943 Agroforestry Parklands in Sub-Saharan Africa Jean-Marc Boffa,Food and Agriculture Organization of the United Nations,1999-01-01 This document attempts to present the current state of knowledge on agroforestry parkland systems These systems which for many local populations are very important for food security income generation and environmental protection are found primarily in the semi arid and sub humid zones of West Africa The document first provides a thorough description of their distribution and diversity and discusses different ways of classifying them It also presents data on current

trends in parkland development and assesses determining factors The document then provides an in depth analysis of biophysical tree soil crop interactions and the factors regulating them and describes various improved parkland management techniques It goes on to examine the strength and limitations of institutional arrangements as well as the constraints imposed by Sahelian forest policies on the sustainable management of parklands The production use and marketing of parkland products is reviewed with an emphasis on their contribution to food security local and national income as well as social values Overall costs and benefits of the practice of parkland agroforestry are evaluated In conclusion the document identifies crucial research needs and promising avenues for promoting sustainable management of parkland systems
