Segmented Worlds And Self Group Life And Individual Consciousness:

Segmented Worlds and Self Yi-fu Tuan,1982 **Segmented World and the Self** Yi-Fu Tuan,1984 The European Dream Jeremy Rifkin,2013-04-24 At one time the American Dream was the ideal and envy of the world But today at the dawn of the new Millennium Europe is pointing a new way to the future In this major new book best selling author Jeremy Rifkin argues that Europe has a vision of its own and is overtaking America as the world s next superpower The American Dream was based on economic growth personal wealth and independence It was synonymous with love of country and patriotism frontier mentality and the unbridled exercise of power Yet what were once considered prime virtues cherished and idealised not only in America but throughout the world are increasingly seen by many as drawbacks and even impediments But while the American Dream tires and languishes in the past a new European Dream is being born Today we see a new set of values emerging which are focused on sustainable development quality of life and multilateralism More cosmopolitan and less concerned with the brute exercise of power the European Dream is better positioned to accommodate the many forces that are propelling us into a more interconnected and interdependent world Where does Britain fit into this story The British find themselves betwixt and between a fading American Dream and a newly emerging European Dream which is gaining the upper hand in our contemporary global age Rifkin argues that Britain is uniquely positioned to play a bridge role between Europe and America and has the potential to help create a synergy between the two superpowers of the 21st century But in order to exercise any real influence in world affairs Britain must choose to be part of a larger political entity In a globally connected world no people can exist any longer as an island unto themselves The only question for Britain is whether it will make its home with America or with Europe **Retail and the Artifice of Social Change** Steven Miles,2015-11-06 In Retail and Social Change Steven Miles presents a cross disciplinary analysis of the evolution of retail and how in both its material and virtual guises it has come to reframe our relationship with the social world Retail has become increasingly influential in homogenising the urban experience And yet in reacting to trends in virtual consumption retailers are also becoming more and more conscious of the need to engage with consumers in more sophisticated ways Retail and Social Change will interest students and scholars in geography cultural studies sociology marketing and business studies interested in how and why retail pervades both our physical and emotional lives in increasingly unexpected ways It will provide a lively comparative and thought provoking contribution that interrogates the implications of retail change for what it means to be a citizen of a consumer society in the twenty first century Evolutionary Competence M. Escapism Yi-Fu Tuan,2000-10-31 Acclaimed cultural geographer Yi Fu Tuan considers humanity s enduring desire to escape reality and embrace alternatives such as love culture and Disneyworld In prehistoric times our ancestors began building shelters and planting crops in order to escape from nature s harsh realities Today we flee urban dangers for the safer reconfigured world of suburban lawns and parks According to geographer Yi Fu Tuan people have always sought to

escape in one way or another sometimes foolishly often creatively and ingeniously Glass tower cities suburbs shopping malls Disneyland all are among the most recent monuments in our efforts to escape the constraints and uncertainties of life ultimately those imposed by nature What cultural product Tuan asks is not escape In his new book the capstone of a celebrated career Tuan shows that escapism is an inescapable component of human thought and culture

Discourses of Disease Howard Y. F. Choy, 2016-05-18 The meanings of disease have undergone such drastic changes with the introduction of modern Western medicine into China during the last two hundred years that new discourses have been invented to theorize illness redefine health and reconstruct classes and genders As a consequence medical literature is rewritten with histories of hygiene studies of psychopathology and stories of cancer disabilities and pandemics This edited volume includes studies of discourses about both bodily and psychiatric illness in modern China bringing together ground breaking scholarships that reconfigure the fields of history literature film psychology anthropology and gender studies by tracing the pathological path of the Sick Man of East Asia through the nineteenth and twentieth centuries into the new millennium

Communication in Eastern Europe Fred L. Casmir, 2012-12-06 This volume represents a clear attempt to learn something from the events in Eastern European countries It does not start with simplistic or old assumptions based on convenient Western communication models but instead takes a new approach If chaos theory could fundamentally change how physicists looked at order in the universe then it may be of value for communication scholars to attempt to understand the diversity of chaos or order in the human universe rather than attempt to force existing models on it for their own explanatory purposes This book is not merely based on the study of select groups of university students or on laboratory settings created in the minds of social scientists It seeks to understand some of the real world including the historical backgrounds and the theoretical assumptions brought to studies of intercultural conflicts Using personal and professional insights developed during firsthand contacts with existing situations chapter authors illustrate some of the realities by using the complexity of changes in Eastern European states during the final decade of the 20th century From education to business from the role of women to the role of mass media from the impact of political systems to the impact of history communication between those who are culturally diverse though they may have been arbitrarily forced to live under the same political roof is the theme of these scholarly studies The editor's reason for developing this volume of original essays is his belief that diversity rather than assumed similarity or even sameness based on the use of inadequate terminology is necessary for learning from contemporary human experiences He further believes that diversity and the significant roles of cultural values as well as of history need to become key concepts in the model with which to begin when it comes to the study of various aspects of intercultural communication It is therefore vital that scholars who represent various points of view and backgrounds contribute to that process After all understanding what is happening in the world is centrally anchored in or related to effective and successful intercultural communication between scholars who have different academic and personal

Neurosociology:

Fundamentals and Current Findings David D. Franks,2019-02-06 This book offers an introduction to the fundamentals of

neurosociology and presents the newest issues and findings in the field It describes the evolution of the brain and its social nature It examines the concept of knowing and what can be known as well as the subjective sensations we experience Next it explores the ubiquitousness of New Unconsciousness and the latest conclusions about mirror neurons Additional themes and concepts described are sex differences in the brain imitation determinism and agency The book brings together neuroscience and sociology two fields that are very different in terms of method theory tradition and practice It does so building on the following premise If our brains have been forged evolutionarily over the many centuries for social life sociologists should have the opportunity if not the duty to know about it whatever the reservations of some who think that any approach that includes biology must be reductionistic

Jean Toomer and the Terrors of American History Charles Scruggs, Lee VanDemarr, 2016-11-11 Jean Toomer's *Cane* was the first major text of the Harlem Renaissance and the first important modernist text by an African American writer It powerfully depicts the terror in the history of American race relations a public world of lynchings race riots and Jim Crow and a private world of internalized conflict over identity and race which mirrored struggles in the culture at large Toomer's own life reflected that internal conflict and he has been an ambiguous figure in literary history an author who wrote a text that had a tremendous impact on African American authors but who eventually tried to distance himself from *Cane* and from his identification as a black writer In *Jean Toomer and the Terrors of American History* Charles Scruggs and Lee VanDemarr examine original sources Toomer's rediscovered early writings on politics and race his extensive correspondence with Waldo Frank and unpublished portions of his autobiographies to show how the cultural wars of the 1920s influenced the shaping of Toomer's book and his subsequent efforts to escape the racial definitions of American society That those definitions remain crucial for American society even today is one reason Toomer's work continues to fascinate and to influence contemporary writers and readers

Routledge Handbook of Sustainable Product Design Jonathan Chapman, 2017-05-08 As a cultivated form of invention product design is a deeply human phenomenon that enables us to shape modify and alter the world around us for better or worse The recent emergence of the sustainability imperative in product design compels us to recalibrate the parameters of good design in an unsustainable age Written by designers for designers the *Routledge Handbook of Sustainable Product Design* presents the first systematic overview of the burgeoning field of sustainable product design Brimming with intelligent viewpoints critical propositions practical examples and rich theoretical analyses this book provides an essential point of reference for scholars and practitioners at the intersection of product design and sustainability The book takes readers to the depth of our engagements with the designed world to advance the social and ecological purpose of product design as a critical twenty first century practice Comprising 35 chapters across 6 thematic parts the book's contributors include the most significant international thinkers in this dynamic and evolving field

The Routledge Research Companion to Media Geography Paul C. Adams, Jim Craine, 2016-03-23 This Companion provides an authoritative source for scholars and students of the nascent field

of media geography While it has deep roots in the wider discipline the consolidation of media geography has started only in the past decade with the creation of media geography's first dedicated journal *Aether* as well as the publication of the sub discipline's first textbook However at present there is no other work which provides a comprehensive overview and grounding By indicating the sub discipline's evolution and hinting at its future this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration The contributors leading scholars in this field including Stuart Aitken Deborah Dixon Derek McCormack Barney Warf and Matthew Zook not only review the existing literature within the remit of their chapters but also articulate arguments about where the future might take media geography scholarship The volume is not simply a collection of individual offerings but has afforded an opportunity to exchange ideas about media geography with contributors making connections between chapters and developing common themes

Water, Knowledge and the Environment in Asia Ravi Baghel, Lea Stepan, Joseph K.W. Hill, 2017-03-31 The dramatic transformation of our planet by human actions has been heralded as the coming of the new epoch of the Anthropocene Human relations with water raise some of the most urgent questions in this regard The starting point of this book is that these changes should not be seen as the result of monolithic actions of an undifferentiated humanity but as emerging from diverse ways of relating to water in a variety of settings and knowledge systems With its large population and rapid demographic and socioeconomic change Asia provides an ideal context for examining how varied forms of knowledge pertaining to water encounter and intermingle with one another While it is difficult to carry out comprehensive research on water knowledge in Asia due to its linguistic political and cultural fragmentation the topic nevertheless has relevance across boundaries By using a carefully chosen selection of case studies in a variety of locations and across diverse disciplines the book demonstrates commonalities and differences in everyday water practices around Asia while challenging both romantic presumptions and Eurocentrism Examples presented include class differences in water use in the megacity of Delhi India the impact of radiation on water practices in Fukushima Japan the role of the King in hydraulic practices in Thailand and ritual irrigation in Bali Indonesia
