book shows how these different strands combine in ways that can be positive or negative and explains why this interaction depends far more on the lifestyle we choose than on the genes we inherit In that way it gives the reader a unique and comprehensive understanding of their body and tells them how with this knowledge they can optimise their health The topics range from nutrition toxins men s health and women s health to understanding why our skin brain and liver age and how to undo the damage and stave off ageing But the book s main focus underlying all of this is hormones the chemicals that tell different parts of our body what to do Our hormone levels vary throughout our life but if they are supported correctly they can keep us youthful and vital into our final years Finding health then is not about seven ways to detox or the five best vitamins The body is far more complex than that and in an approach aimed specifically at the layperson Younger for Longer traces the exciting path of how the body works to help the reader create the best person they can be for the rest of their life

Age as an Equality Issue Sandra Fredman, Sarah Spencer, 2003-07 Until recently age discrimination attracted little social opprobrium However ageism has now been thrust onto the equality agenda by the spectre of an ageing population This has led to a range of policies on active ageing Most importantly legally binding legislation prohibiting age discrimination in employment will need to be in place by 2006 Remarkably little attention has been paid to the key issues To what extent is age inevitably linked with declining capacity What are the central aims of a policy on age equality and how can these be realised in law How should law and policy address age discrimination in health education and employment What lessons can be learned from the US and Europe And should young people be dealt with in the same way as older people This book answers these questions in a series of chapters by experts from a wide range of disciplines It begins by examining the nature of the ageing process and then turns to a detailed analysis of the concept of age equality In the light of this analysis the following three chapters critically assess employment education and health A separate chapter is devoted to discrimination against children The last two chapters consider the experience in the US and other European countries
