Longman Geography Contexts Students Longman Secondary Geography:

Environmental and Geographical Education for Sustainability Zijian Li, Michael Williams, 2006 Geography environment sustainability culture and education standing alone or in any combination provide the ingredients for a variety of stews They are all difficult to define and they generate endless debates for theoreticians and practitioners about their meaning and significance The editors have divided the chapters that follow into two parts in an effort to unit these diverse disciplines Part 1 is concerned with cultural foundations and curriculum issues related to geographical and environmental education for sustainability Part 2 comprises a series of chapters presenting education for sustainability in the contexts of national cultures

Learning and Teaching with Maps Patrick Wiegand, 2006-01-31 A comprehensive and authoritative account of how primary school children and teachers can use maps to enhance learning and deepen understanding of this essential skill It includes all aspects of map use such as reading and interpreting maps and using maps to find the way covering maps of all scales including globes and atlases The text is extensively illustrated with examples including maps made by children themselves using conventional materials as well as computer software A particular feature of the book is the integration of digital and conventional mapping and Internet and CD ROM cartography together with simple applications of Geographic Information Systems GIS appropriate to the needs of children right through primary and secondary education This book will be of great use to all primary teachers and subject teachers in secondary school as well as non specialist geography teachers and will enable children to use all types of maps in new compelling and thoughtful ways

The Making Of The Curriculum Ivor F Goodson, 2002-11-01 The first edition of *The Making of Curriculum* was published in 1988 and reviewers hailed it as a seminal work in the field In that work Goodson explored a number of aspects of the so called traditional subjects and described the way they develop over time to a point where they can be promoted as academic disciplines He showed that the claim to be academic was in fact the result of a substantial political contest covering a century or more The traditional subject was in short invented The first edition of this book provided a series of challenging insights for those desiring to make sense of the current debate over schooling In this new and extended second edition Bill Pinar adds an illuminating introduction and Goodson brings his argument up to date with a discussion of the National Curriculum a contemporary initiative in the making of curriculum

Science Education in International Contexts May M. H. Cheng, Winnie W. M. So, 2011-10-23 This book presents an international perspective on examining and putting into practice new innovations in science education The chapters are organized into three parts each of which addresses a key area in science education research Part I of this book Students conceptual understanding of science addresses issues related to the identification of students science concepts and the influence of everyday understandings on the construction of science concepts Part II Making science concepts plausible for students addresses the pedagogical concerns of teachers in making science ideas plausible and logical for their students Part III Science teacher learning reports on science teacher learning in

Australia and Hong Kong The focus is on the interaction between research and implementation or how theory can be realized in classroom practice with contributions from both non Western and non English speaking contexts and Western and English speaking countries Taken together the papers have a common focus on the relationship or integration of theory and practice in science education They demonstrate a concern to address education reform directions putting into practice recommendations from science education research and improving the quality of science education The contributors of this book come from seven different areas around the world These contributions have been essential in making the discussions in this book multi perspective and relevant to an international audience thus allowing it to emerge to join the international discourse on improving science education The studies reported in this book provide insights for future research addressing science education reform directions students learning needs and different classroom contexts The discussions and the findings reported are relevant to science educators teachers student teachers graduate students in education curriculum developers and those responsible for education policy

Contemporary Approaches to Second Language Acquisition

María del Pilar García Mayo, María Junkal Gutierrez Mangado, Maria Martinez Adrian, 2013 Second language acquisition SLA is a field of inquiry that has increased in importance since the 1960s Currently researchers adopt multiple perspectives in the analysis of learner language all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA the research carried out within them and wherever appropriate the implications and or applications for theory research and pedagogy that might derive from the available empirical evidence The book is intended for SLA researchers as well as for graduate MA Ph D students in SLA research applied linguistics and linguistics as the different chapters will be a guide in their research within the approaches presented The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it

Teaching Chemistry Jan Apotheker, 2019-05-06

Teaching Chemistry can be used in courses focusing on training for secondary school teachers in chemistry The author who has been actively involved in the development of a new chemistry curriculum in The Netherlands and is currently chair of the Committee on Chemistry Education of the International Union of Pure and Applied Chemistry offers an overview of the existing learning models and gives practical recommendations how to implement innovating strategies and methods of teaching chemistry at different levels It starts at the beginner level with students that have had no experience in secondary schools as a teacher After a solid background in the theory of learning practical guidance is provided helping teachers develop skills and practices focused on the learning process within their classrooms In the final chapter information is given about the way teachers can professionalize further in their teaching career Addresses innovative teaching methods and strategies Includes a section of practical examples and exercises in the end of each chapter Written by one of the top experts

in chemistry education Jan Apotheker taught chemistry for 25 years at the Praedinius Gymnasium Groningen In 1998 he became a lecturer in chemistry education at the University of Groningen retired in 2016 He is currently chair of the Committee on Chemistry Education of the IUPAC Nigerian Geographical Teachers Journal ,1999 **Empowering a Peasantry in a Caribbean Context** Carl B. Greenidge,2001 An exploration of the land settlement schemes of Guyana over 160 years It analyzes the interrelationships of conflicting forces in the political economy of Guyana which frustrated attempts at empowerment of the peasantry The impact of these schemes on social differentiation is also discussed **Space, Place and Scale in the Study of Education** Lorraine Symaco,Colin Brock,2017-10-02 The term space is inherently geographical Educational provision and activity takes place within spaces ranging from a room at home or in a school to a campus to an administrative area which could be a state within a country a whole country or a group of countries Such spaces are known as geographical surfaces Within these spaces the process of learning and teaching takes place at particular points that are often nodes in a network which may be formal such as a group of schools or universities or non formal such as in cyberspace Understanding what goes on depends on the scale at which it is observed ranging from individuals to global outreach Altogether this constitutes the geography of educational reality This comprehensive volume includes a theoretical background plus a sample of situations including school level policy and administration inequitable access education hubs and small states It offers an introduction to a relatively neglected member of the family of education foundation disciplines the geography of education This book was originally published as a special issue of Comparative Education **Researching Language in Schools and Communities** Len Unsworth,2005-11-17 Researching Language in Schools and Communities is designed for those who intend to carry out and or study research in children s language development teaching English as a second language children s literature casual conversation social class and language variation classroom discourse reading processes teaching writing literacy and curriculum area learning critical literacies and related areas The contributors are among the foremost researchers in these fields In this book they introduce approaches to help investigate such areas in applied language research using systemic functional linguistics SFL A key purpose of this text is to facilitate the further engagement of language researchers with SFL perspectives encouraging more collaborative transdisciplinary work across different fields of study and theoretical approaches in projects of mutual concern The first two chapters outline the key aspects of SFL descriptions of the relationships between language and social context and the inter related descriptions of text structures and grammatical systems This provides sufficient background to enable those coming new to SFL to make productive critical use of the research reviewed studies described and advice on project design provided in the following chapters Nevertheless the book is an introductory resource and particular attention has been paid throughout to the extensive provision of clear references to more elaborated accounts of the important issues discussed **Resources in Education** ,1996-04 **Routledge Encyclopedia of Language Teaching and Learning** Michael Byram,Adelheid

Hu,2013-06-26 The Routledge Encyclopedia of Language Teaching and Learning is an authoritative reference dealing with all aspects of this increasingly important field of study Offering a comprehensive range of articles on contemporary language teaching and its history it has been produced specifically for language teaching professionals and as a reference work for academic studies at postgraduate level In this new edition every single entry has been reviewed and updated with reference to new developments and publications Coverage has been expanded to reflect new technological global and academic developments with particular attention to areas such as online and distance learning teacher and learner cognition testing assessment and evaluation global English and teacher education Themes and disciplines covered include Methods and materials including new technologies and materials development Contexts and concepts such as mediation risk taking in language learning and intercomprehension Influential figures from the early days of language teaching to the contemporary Related disciplines such as psychology anthropology and corpus linguistics It covers the teaching of specific languages including Japanese Chinese Arabic and African languages as well as English French German and Spanish There are thirty five overview articles dealing with issues such as communicative language teaching early language learning teacher education and syllabus and curriculum design A further 160 entries focus on topics such as bilingualism language laboratories and study abroad Numerous shorter items examine language and cultural institutions professional associations and acronyms Multiple cross references enable the user to browse from one entry to another and there are suggestions for further reading Written by an international team of specialists the Routledge Encyclopedia of Language Teaching and Learning is an invaluable resource and reference manual for anyone with a professional or academic interest in the subject

Discourse in Content and Language Integrated Learning (CLIL) Classrooms Christiane Dalton-Puffer,2007-09-27 The label CLIL stands for classrooms where a foreign language English is used as a medium of instruction in content subjects This book provides a first in depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms It examines teacher and student talk at secondary school level from different discourse analytic angles taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context which in turn conditions the ways in which students experience use and learn the target language The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners appropriation of a foreign language as a medium of learning Victorian Science in Context Bernard Lightman,2008-07-31 Victorians were fascinated by the flood of strange new worlds that science was opening to them Exotic plants and animals poured into London from all corners of the Empire while revolutionary theories such as the radical idea that humans might be descended from apes drew crowds to heated debates Men and women of all social classes avidly collected scientific specimens for display in their homes and devoured literature about science and its practitioners Victorian Science in Context

captures the essence of this fascination charting the many ways in which science influenced and was influenced by the larger Victorian culture Contributions from leading scholars in history literature and the history of science explore questions such as What did science mean to the Victorians For whom was Victorian science written What ideological messages did it convey The contributors show how practical concerns interacted with contextual issues to mold Victorian science which in turn shaped much of the relationship between modern science and culture *Handbook of Historical Studies in Education* Tanya Fitzgerald,2020-04-03 This book offers an in depth historiographical and comparative analysis of prominent theoretical and methodological debates in the field Across each of the sections contributors will draw on specific case studies to illustrate the origins debates and tensions in the field and overview new trends directions and developments Each section includes an introduction that provides an overview of the theme and the overall emphasis within the section In addition each section has a concluding chapter that offers a critical and comparative analysis of the national case studies presented As a Handbook the emphasis is on deeper consideration of key issues rather than a more superficial and broader sweep The book offers researchers postgraduate and higher degree students as well as those teaching in this field a definitive text that identifies and debates key historiographical and methodological issues The intent is to encourage comparative historiographical perspectives of the nominated issues that overview the main theoretical and methodological debates and to propose new directions for the field The City: The city in global context Michael Pacione,2002 **Education Today** , Register of Educational Research in the United Kingdom, 1992-1995 National Foundation For Educational Research,1995 This latest volume of the Register of Educational Research in the United Kingdom lists all the major research projects being undertaken in Britain during the latter months of 1992 the whole of 1993 and 1994 and the early months of 1995 Each entry provides names and addresses of the researchers a detailed abstract the source and amount of the grant where applicable the length of the project and details of published material about the research *Journal of Pedagogy and Educational Management* ,2018-06-01 Journal of Pedagogy and Educational Management is an interdisciplinary academic journal in the field of pedagogical theory and practice and management of contemporary education issued by Varna University of Management Bulgaria The journal provides a platform for research based discussions of theoretical and empirical issues of K 12 and university and adult education Publications focusing on educational issues from fields such as management educational technology pedagogy and pedagogical management pedagogical psychology andragogy developmental psychology social pedagogy methodology anthropology conflictology organizational sciences and culture are invited The journal is open to teachers researchers and managers who examine the problems of pedagogical methods and technology and effective educational practices Young researchers and authors are also encouraged to submit their contributions Manuscript submissions should be between 4 000 and 20 000 words Major research articles of between 4 000 and 7 000 words are highly welcome Longer or shorter papers will also be considered The journal publishes also Research Notes of 1 500 2 000 words

Submitted papers must combine theoretical concepts with practical applications or empirical testing The Journal of Pedagogy and Educational Management also includes book reviews announcements for conferences and seminars abstracts of successfully defended doctoral dissertations case studies of best practices in pedagogy and educational management concept papers theoretical essays The journal will be published online in two languages English and Bulgarian The articles in Bulgarian are accompanied by an abstract in English JPEM is about to be published in one volume per year consisting of two issues The editorial team welcomes your submissions to the Journal of Pedagogy and Educational Management Manuscripts can be submitted to jpem.vumk.eu

Routledge Revivals: Schooling Ordinary Kids (1987) Phillip Brown, 2018-02-01
Originally published 1987 Schooling Ordinary Kids looks at the invisible majority of ordinary working class pupils The book explains why these pupils are now at the centre of a major educational crisis surrounding the soaring rates of youth unemployment The book is a timely examination of educational inequalities unemployment and the new vocationalism Drawing extensively the study of schools in the urban centre of South Wales the book highlights the need for an alternative politics of education if we were to meet the educational challenge of the late twentieth century The new vocationalism is revealed here as a policy for inequality both politically and in the classroom
