Looking At Brazil:

Latin America's Potential in Nation Branding: A closer look at Brazil's, Chile's and Colombia's practices Eva Niesing, 2013-09-27 In the globalized world of today a well elaborated long term oriented nation branding strategy can help nations to improve and to better control of their nation image Nation branding activities increase the countries competitiveness in the global marketplace and help to foster the tourism arrivals inward foreign direct investment flows and exports and further they help to attract talented workforce and students Despite its growing importance most Latin American countries still have not engaged enough in the area of nation branding and mostly only focus their activities on the tourism promotion The region's countries have a good image regarding soft factors such as their people and tourism attractions but have a weak image regarding their products and investment opportunities Brazil has a relatively good nation image in many dimensions but still has not developed an extensive nation branding strategy Chile and Colombia are among the Latin American countries which have started to conduct more complete nation branding activities Although such advances can be observed there is still a lot of improvement potential in the nation branding practices of Latin American countries

Looking at Brazil Sarita Kendall, 1974 Introduces the geography people history cities culture and resources of the largest South American country Brazilian Bulletin, 1965 *Brazil* International Monetary Fund. Western Hemisphere Dept., 2013-10-23 This Selected Issues paper analyzes pace of economic growth for Brazil Moderating activity and stubbornly elevated inflation since 2010 have led to a reevaluation of Brazil's long term potential growth rate Growth accounting suggests that potential growth is probably lower than was widely assumed in recent years and now stands at about 3.12 percent The demographic dividend of a rapidly expanding labor force is fading and further structural declines in unemployment are likely to be limited Potential growth will rely more on the pace of capital deepening and productivity growth Lifting both may require successful implementation of the infrastructure investment program higher domestic saving and structural reforms

The Politics and History of AIDS Treatment in Brazil Amy Nunn, 2009-02-15 Brazil's public policy

response to the AIDS epidemic preceded those of many developing countries. During my tenure as President in 1996, Brazil adopted a law guaranteeing free and universal access to AIDS treatment for all people living with HIV/AIDS. Brazil became the first developing country to provide publicly financed AIDS treatment for all people living with HIV/AIDS. We now have one of the world's most successful AIDS programs that is considered a model for other developing countries. Today 185,000 people receive life-saving AIDS cocktails in Brazil and thousands of lives have been saved. But this was not an easy battle. There were many challenges along the way. Twenty years ago, Brazil's achievements today might have seemed impossible. During the 1980s in Brazil, as elsewhere, there was overwhelming stigma associated with AIDS. People living with HIV often lost their jobs and died quickly before the advent of life-saving antiretroviral drugs. Brazil's AIDS movement was extraordinarily important in promoting progressive AIDS policies; associations of people living with HIV were the first to denounce pervasive AIDS-related discrimination and called public attention to the importance of AIDS. Activists protested in the streets for over a decade, engaged the media, and framed AIDS as a human rights issue.
