Looking At Senses:

The Senses Fiona Macpherson, 2011-06-09 A Collection of Classic and Contemporary Articles on the Philosophy of the Senses

Ritual, Performance and the Senses Jon P. Mitchell, Michael Bull, 2015-02-26 Ritual has long been a central concept in anthropological theories of religious transmission Ritual Performance and the Senses offers a new understanding of how ritual enables religious representations ideas beliefs values to be shared among participants Focusing on the body and the experiential nature of ritual the book brings together insights from three distinct areas of study cognitive neuroanthropology performance studies and the anthropology of the senses Eight chapters by scholars from each of these sub disciplines investigate different aspects of embodied religious practice ranging from philosophical discussions of belief to explorations of the biological processes taking place in the brain itself Case studies range from miracles and visionary activity in Catholic Malta to meditative practices in theatrical performance and include three pilgrimage sites the Church of the Holy Sepulchre in Jerusalem the festival of Ramlila in Ramnagar India and the mountain shrine of the Lord of the Shiny Snow in Andean Peru Understanding ritual allows us to understand processes at the very centre of human social life and humanity itself making this an invaluable text for students and scholars in anthropology cognitive science performance studies and religious studies

Synaesthesia and the Ancient Senses Shane Butler, Alex Purves, 2014-09-03 Like us the ancient Greeks and Romans came to know and understand the world through their senses Yet sensory experience has rarely been considered in the study of antiquity and when the senses are examined sight is regularly privileged Synaesthesia and the Ancient Senses presents a radical reappraisal of antiquity's textures flavours and aromas sounds and sights It offers both a fresh look at society in the ancient world and an opportunity to deepen the reading of classical literature The book will appeal to readers in classical society and literature philosophy and cultural history All Greek and Latin is translated and technical matters are explained for the non specialist The introduction sets the ancient senses within the history of aesthetics and the subsequent essays explores the senses throughout the classical period and on to the modern reception of classical literature

On the Epistemology of the Senses in Early Chinese Thought Jane Geaney, 2002-01-01 By departing from traditional sinological approaches this method uncovers a detailed picture of certain shared underlying views of sense perception in the Lun Yu the Mozi including the Neo Mohist Canons the Xunzi the Mencius the Laozi and the Zhuangzi

quick calm plans for managing triggers and lived experience advice on understanding emotional regulation coping with sensory overload and how to look after your senses during intimacy this guide is here to ensure that you don't just survive adulthood you thrive in it The Five Senses of Man Julius Bernstein,1876 **Looking Through Images** Emmanuel Alloa,2021-10-05 Images have always stirred ambivalent reactions Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders they have hardly ever been seen as true sources of knowledge They were long viewed as mere appearances placeholders for the things themselves or deceptive illusions Today the traditional critique of the spectacle has given way to an unconditional embrace of the visual However we still lack a persuasive theoretical account of how images work Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloa reconstructs the earliest Western media theory Aristotle's concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices Sibley:approach to Aesthetics C ,

Agency, Freedom, and Moral Responsibility Andrei Buckareff,Carlos Moya,Sergi Rosell,2016-04-29 In recent years there has been a resurgence of interest in problems related to human agency and responsibility by philosophers and researchers in cognate disciplines The present volume brings together original contributions by leading specialists working in this vital field of philosophical inquiry The contents represent the state of the art of philosophical research on intentional agency free will and moral responsibility The volume begins with chapters on the metaphysics of agency and moves to chapters examining various problems of luck The final two sections have a normative focus with the first of the two containing chapters examining issues related to responsible agency and blame and the chapters in the final section examine responsibility and relationships This book will be of interest to researchers and students interested in both metaphysical and normative issues related to human agency Atheist Mind, Humanist Heart Lex Bayer,John Figdor,2014-09-26 Atheist Mind Humanist Heart asks an essential question for the 45 million Americans who self identify as nonreligious So you don't believe in God now what This question is increasingly important as one third of young adults under the age of thirty consider themselves nonreligious With a scientific eye and an empathetic heart the authors turn conventional perceptions about atheism on their head They show that atheism need not be reactionary against religion and God but rather that it can offer a clear set of constructive principles to live by which establish atheism as a positive worldview Following a philosophical approach grounded in logic and evidence Bayer and Figdor take readers on an inspiring journey to discover how to live a reasonable

ethical and happy life without God The readers are engaged at every step encouraged to self reflect and ultimately uncover their own set of personal beliefs *A New Look at Geometry* Irving Adler,2013-10-03 Richly detailed survey of the evolution of geometrical ideas and development of concepts of modern geometry projective Euclidean and non Euclidean geometry role of geometry in Newtonian physics calculus relativity Over 100 exercises with answers 1966 edition *Leap Before You Look* Helen Anne Molesworth,Ruth Erickson,2015-01-01 La exposici n refleja la historia del Black Mountain College BMC fundado en 1933 en Carolina del Norte y concebido como universidad experimental que situaba al arte en el centro de una educaci n liberal que pretend a educar mejor a los ciudadanos para participar en la sociedad democr tica La educaci n era interdisciplinaria y conced a gran importancia al debate la investigaci n y la experimentaci n dedicando la misma atenci n a las artes visuales pintura escultura dibujo que a las llamadas artes aplicadas tejidos cer mica orfebrer a as como a la arquitectura la poes a la m sica y la danza *The Word* ,1910 **Aesthetic Genesis** Jeff Mitscherling,2009-12-15 In *Aesthetic Genesis* the author argues for a reversal of the most fundamental tenet of phenomenology namely that all consciousness is intentional that is directed toward an object Mitscherling suggests as a new Copernican hypothesis that intentionality i e directionality gives rise to consciousness This book describes not only the origin or genesis of human cognition in sensation but also the genesis of sensation from intentional structures belonging to nature itself A phenomenological examination of our experience leads to the conclusion that the two sorts of being generally recognized by contemporary science and philosophy that is material being and ideal being prove ontologically inadequate to account for this experience Mitscherling rehabilitates the pre modern concepts of intentional being and formal causality and employs them in the construction of a comprehensive phenomenological analysis of embodiment aesthetic experience the interpretation of texts moral behavior and cognition in general **Change and Continuity in the English Language** Martti Juhani Rudanko,1998 While earlier treatments of English verb syntax from a diachronic perspective exist this book breaks entirely fresh ground with its focus on the detailed study of English predicate complementation over the past three centuries It draws data from an unprecedented combination of authoritative sources including computer corpora and H Poutsma s unpublished dictionary and offers novel systematizations of predicates and discussions of alternation By giving ample evidence of both change and continuity in the language over the past three hundred years the book opens up a new research field in the study of the English language **The Pragmatics of Governmental Discourse** Ayan-Yue Gupta,2024-08-02 This book presents a novel methodological framework for analysing governmental discourse It involves combining pragmatist perspectives on language with computational sociolinguistics and large language models LLMs The first half discusses traditional critical approaches to investigating discursive practices principally those employing Critical Discourse Analysis CDA and those based on methods developed by Michel Foucault These are critiqued in terms of pragmatist views on meaning which are rarely taken up in this area It is argued that to understand the grounding of social

structures and power relations in discourse we must begin with a systematic account of how meaning is contextually fixed. It is proposed that a pragmatist reading of Foucault's arguments about governmentality offers a productive framework for discourse analysis. To illustrate the advantages of this framework, the book presents a case study of the British government's adoption of resilience, sustainability, and wellbeing discourses in the period 2000–2020. A dataset of 179 million tokens sampled from approximately 170,000 government documents is used to illustrate how this framework can be combined with natural language processing (NLP) to make robust inferences. This study will be of interest to both sociologists interested in language and in the methodological potential of recent developments in NLP. Importantly, the book demonstrates how LLMs can be harnessed to bring new perspectives to long-standing sociological questions.

Oxford Studies in Agency and Responsibility Volume 4 David Shoemaker, 2017-07-21. Oxford Studies in Agency and Responsibility is a series of volumes presenting outstanding new work on a set of connected themes investigating such questions as: What does it mean to be an agent? What is the nature of moral responsibility? Of criminal responsibility? What is the relation between moral and criminal responsibility, if any? What is the relation between responsibility and the metaphysical issues of determinism and free will? What do various psychological disorders tell us about agency and responsibility? How do moral agents develop? How does this developmental story bear on questions about the nature of moral judgment and responsibility? What do the results from neuroscience imply, if anything, for our questions about agency and responsibility? OSAR thus straddles the areas of moral philosophy and philosophy of action but also draws from a diverse range of cross-disciplinary sources including moral psychology, psychology proper (including experimental and developmental), philosophy of psychology, philosophy of law, legal theory, metaphysics, neuroscience, neuroethics, political philosophy, and more. It is unified by its focus on who we are as deliberators and interactors, embodied practical agents negotiating (sometimes unsuccessfully) a world of moral and legal norms.

Theory and practice of corpus-based semantics Nikola Dobric, 2013-11-29. *Sensations, Thoughts, Language* Arthur Sullivan, 2019-09-30. Brian Loar (1939–2014) was an eminent and highly respected philosopher of mind and language. He was at the forefront of several different field-defining debates between the 1970s and the 2000s: from his earliest work on reducing semantics to psychology through debates about reference, functionalism, externalism, and the nature of intentionality to his most enduringly influential work on the explanatory gap between consciousness and neurons. Loar is widely credited with having developed the most comprehensive functionalist account of certain aspects of the mind, and his phenomenal content strategy is arguably one of the most significant developments on the ancient mind-body problem. This volume of essays honours the entirety of Loar's wide-ranging philosophical career. It features sixteen original essays from influential figures in the fields of philosophy of language and philosophy of mind, including those who worked with and were taught by Loar. The essays are divided into three thematic sections covering Loar's work in philosophy of language (especially the relations between semantics and psychology), 1970s–80s on content in the philosophy of mind, 1980s–90s and on

the metaphysics of intentionality and consciousness 1990s and beyond Taken together this book is a fitting tribute to one of the leading minds of the latter 20th century and a timely reflection on Loar s enduring influence on the philosophy of mind and language

Ancient Philosophy Anthony Kenny, 2004-06-17 Sir Anthony Kenny tells the fascinating story of the birth of philosophy and its remarkable flourishing in the ancient Mediterranean world This is the first of four volumes in which he unfolds a magisterial new history of Western philosophy Specially written for a broad popular readership but serious and deep enough to offer a genuine understanding of the great philosophers Kenny s lucid and stimulating history will become the definitive work for anyone interested in the people and ideas that shaped the course of Western thought
