The Square and the Circle of the Indian Arts Kapila Vatsyayan, 1997 The Square and the Circle of the Indian Arts is a major contribution in Indian art history More than a book on the theories of arts it has far reaching implications for the way one thinks about the future of indology and art history It provides a model to be emulated for inter disciplinary research not only between the arts but also the sciences and the arts The book begins by re examining the imagery of the Vedas and the Upanisads highlighting some aspects of early speculative thought which influenced the enunciation of aesthetic theories particularly of Bharata in the Natyasastra The next chapter introduces a new methodology of analyzing the rituals yajna as laid down in the Yajurveda and the Satapatha Brahmana the best way to focus the relationship between the text and the practice Four chapters follow one each on drama natya architecture vastu sculpture silpa and music sangita Each presents some fundamental concepts of speculative thought concerned with each of the arts and purposefully correlates these with actual examples both of the past and the present The afterward to this second edition remains an event not only because the book benefits from the works published since the first edition but also because it presents the author's integral vision and her unique adventure into the boundaries of several disciplines It demonstrates the efficacy of her earlier approach of investigating the imagery and the metaphors as basic to the discourse of the Indian tradition She proposes a multi layered cluster of concepts and metaphors which enable one to uncode the complex multi dimensional character of the Indian Arts Also significantly she suggests a deeper comprehension of the relevance of the developments in the field of traditional mathematics and biology for the study
