On The Way To Self Knowledge:

On the Way to Self Knowledge Jacob Needleman, Dennis Lewis, 1976 Help I need somebody but is it a guru or a shrink In response to this dilemma the philosopher Jacob Needleman arranged a lecture series at the University of California Medical Center in San Francisco in the hope of clarifying both the distinctions and the interrelations between these two paths of self knowledge psychotherapy and the ancient spiritual disciplines This book is the enriching and often electrifying result The eight lecturers psychotherapists interested in the further reaches of self development and spiritual teachers concerned with helping people live dispatch the basic question with little ultimate disagreement The consensus most concisely expressed by British therapist A C Robin Skynner is that therapy and the sacred traditions lead in quite different one might say perpendicular directions therapy towards integration and functioning on the plane of normal daily life spiritual discipline towards the far more difficult and demanding ascent into transcendence and self evolution But while the confusion of the two can be dangerous properly understood they can assist and enhance each other Kirkus Reviews 10 15 76 *On the Way to Self Knowledge* Jacob Needleman, Dennis Lewis, 1976-01-01 **Way to Self-Knowledge** Gopi Krishna, 2013 *The Way to Self-knowledge* Watchman Nee, 1985 **A Way of Self-Knowledge** Rudolf Steiner, 1999-05 Ever since her early days at the Findhorn Community in Scotland Dorothy Maclean has been helping people attune to nature and connect with their inner divinity Now in *Choices of Love* she discusses the nature of divine love and how each of us can avail ourselves of its power to enrich any aspect of our lives The immensity of divine love how to contact it the nature of the Divine blocks to understanding the nature of good and evil and the angelic world of nature and of human groupings such as cities states and nations are among the topics Dorothy Maclean addresses *Choices of Love* will leave you with a clearer understanding of yourself and of the universal love in which we all participate *Self-Knowledge for Humans* Quassim Cassam, 2014-11-27 Human beings are not model epistemic citizens Our reasoning can be careless and uncritical and our beliefs desires and other attitudes aren't always as they ought rationally to be Our beliefs can be eccentric our desires irrational and our hopes hopelessly unrealistic Our attitudes are influenced by a wide range of non epistemic or non rational factors including our character our emotions and powerful unconscious biases Yet we are rarely conscious of such influences Self ignorance is not something to which human beings are immune In this book Quassim Cassam develops an account of self knowledge which tries to do justice to these and other respects in which humans aren't model epistemic citizens He rejects rationalist and other mainstream philosophical accounts of self knowledge on the grounds that in more than one sense they aren't accounts of self knowledge for humans Instead he defends the view that inferences from behavioural and psychological evidence are a basic source of human self knowledge On this account self knowledge is a genuine cognitive achievement and self ignorance is almost always on the cards As well as explaining knowledge of our own states of mind Cassam also accounts for what he calls substantial self knowledge including knowledge of our values emotions and character He criticizes philosophical accounts of self

knowledge for neglecting substantial self knowledge and concludes with a discussion of the value of self knowledge This book tries to do for philosophy what behavioural economics tries to do for economics Just as behavioural economics is the economics of homo sapiens as distinct from the economics of an ideally rational and self homo economics so Cassam argues that philosophy should focus on the human predicament rather than on the reasoning and self knowledge of an idealized homo philosophicus

Self-knowledge Ursula Renz,2017 The acquisition of self knowledge is often described as one of the main goals of philosophical inquiry At the same time some sort of self knowledge is often regarded as a necessary condition of our being a human agent or human subject Thus self knowledge is taken to constitute both the beginning and the end of humans search for wisdom and as such it is intricately bound up with the very idea of philosophy Not surprisingly therefore the Delphic injunction Know thyself has fascinated philosophers of different times backgrounds and tempers But how can we make sense of this imperative What is self knowledge and how is it achieved What are the structural features that distinguish self knowledge from other types of knowledge What role do external second and third personal sources of knowledge play in the acquisition of self knowledge How can we account for the moral impact ascribed to self knowledge Is it just a form of anthropological knowledge that allows agents to act in accordance with their aims Or does self knowledge ultimately ennoble the self of the subjects having it Finally is self knowledge or its completion a goal that may be reached at all The book addresses these questions in fifteen chapters covering approaches of many philosophers from Plato and Aristotle to Edmund Husserl or Elisabeth Anscombe The short reflections inserted between the chapters show that the search for self knowledge is an important theme in literature poetry painting and self portraiture from Homer

Self-Knowledge and Resentment Akeel Bilgrami,2012-03-05 In *Self Knowledge and Resentment* Akeel Bilgrami argues that self knowledge of our intentional states is special among all the knowledges we have because it is not an epistemological notion in the standard sense of that term but instead is a fallout of the radically normative nature of thought and agency Four themes or questions are brought together into an integrated philosophical position What makes self knowledge different from other forms of knowledge What makes for freedom and agency in a deterministic universe What makes intentional states of a subject irreducible to its physical and functional states And what makes values irreducible to the states of nature as the natural sciences study them This integration of themes into a single and systematic picture of thought value agency and self knowledge is essential to the book s aspiration and argument Once this integrated position is fully in place the book closes with a postscript on how one might fruitfully view the kind of self knowledge that is pursued in psychoanalysis

Handbook of Self-Knowledge Simine Vazire,Timothy D. Wilson,2012-06-20 An exploration of self knowledge looks at current research on how people perceive their own thoughts feelings traits and behavior with coverage encompassing the mental behavioral biological and social structures that underlie self knowledge

Self-Knowledge and the Self David A Jopling,2002-09-11 In this clear and reasoned discussion of self knowledge and the self the author asks whether it is really possible to know ourselves as we really

are He illuminates issues about the nature of self identity which are of fundamental importance in moral psychology epistemology and literary criticism Jopling focuses on the accounts of Stuart Hampshire Jean Paul Sartre and Richard Rorty and dialogical philosophical psychology and illustrates his argument with examples from literature drama and psychology

Shakespeare's Patterns of Self-knowledge Rolf Soellner,1972 The Renaissance evinced a strong interest in self knowledge and the theme is a persistent one in the moral and dramatic literature of the age The ancients slogan nosce teipsum became a universal watchword of men schooled in the paramount importance of coming to know themselves Shakespeare's abiding interest in the concept of self knowledge shows itself in the dramatic patterns of his plays in images ideas themes and character portrayals The recurrence of such motifs as the search for the self and the dangers and rewards of finding oneself as well as the prominence of such ideal or nearly ideal characters as Henry V Duke Vincentio and Prospero testify to the powerful influence humanistic notions of self knowledge exerted on Shakespeare as a writer and thinker But his was a changing and developing art in a restless and dynamic age Professor Soellner suggests that as much as Shakespeare's artistic development which also affects his patterns of self knowledge is part of his natural growth into a mature and incomparable dramatist it is yet analogous to the stylistic and philosophic changes that led from the Renaissance through Mannerism toward the Baroque Mr Soellner examines twelve plays in which self knowledge as the Renaissance understood it figures prominently Mindful that concepts of self knowledge are not independent of cultural contexts and that the definitions in the moral literature of the time were notoriously imprecise and unscientific he recognizes that the meaning of the term in Shakespeare's time must be acquired as Shakespeare acquired it that is contextually Mr Soellner distinguishes three points in Shakespeare's evolution an early stage that culminates in the later histories and the romantic comedies in which the dramatist reflected sometimes almost schematically the humanistic patterns of his time a middle or interim phase that begins with Julius Caesar and includes both Hamlet and the problem comedies and in which Shakespeare experiences certain hesitations and entertains some doubts about the patterns accepted uncritically earlier and the final period of the great tragedies and tragicomic romances in which a growing awareness of the unpredictability of human nature leads to a dynamic synthesis in which what is the quintessence of humanism is fused with a full realization of the weakness of codification and a profound sympathy for the human condition In the last of his great plays the tempests Mr Soellner finds Shakespeare composed a brilliant finale in which are worked many of the patterns that he used in his earlier work The dream of The Tempest that man can control himself limit his power and even resign it voluntarily is totally humanistic and may be utopia But it is one of the happiest expectations of man and represents an irresistible affirmation of his potential greatness Rolf Soellner
