Pytheas Of Massilia On The Ocean Text Translation And Commentary:

Pytheas of Massalia Lionel Scott, 2021-11-21 Pytheas of Massalia Marseille mariner explorer geographer and astronomer made a pioneering voyage into the then unknown Atlantic around 325 BC reaching Britain and the Baltic this book collects and translates the references to him and his book which is lost and discusses and explains them The Greeks of Pytheas time knew virtually nothing of northern Europe beyond the often fantastical stories of traders and Pytheas was the first person to provide factual first hand information on this region His journey covered Iberia France Britain from where he travelled so far north that he encountered ice floes he then reached the Baltic It was he who recorded Thule and his astronomy enabled him to locate it on the Arctic Circle Two thirds of our references to Pytheas come from Pliny and Strabo their methods of work as well as the perils of manuscript transmission are explored in this volume Scott also includes discussions and appendices on these areas to enable the scope of available references to be understood as a whole There are some details of Pytheas voyage that are lost but the book offers balanced reasons for proposing how we may reasonably fill them in The breadth of Pytheas achievements and the areas and topics his work covers mean that he has a wide range of appeal within classical studies and ancient history This volume provides an invaluable resource to undergraduate and postgraduate students of early geography and astronomy and Greece's knowledge of and relationship to the rest of Europe in this period

A Cultural History of the Sea in Antiquity Marie-Claire Beaulieu, 2023-02-09 The sea is omnipresent in the ancient cultures of the Mediterranean basin It is an inexhaustible source of food but also a well traveled roadway and a means to communicate trade with or wage war against one's neighbors Perhaps because these practical meanings of the sea were so deeply embedded in daily life the sea also had a profound religious and symbolic significance for ancient people from the worship of sea deities by anxious mariners to the creation of intricate literary devices based on the wine dark sea and concepts such as insularity People even imagined that at the edge of the world where the ocean meets the sky was the entrance to the Underworld as well as to Olympus the realm of the gods In between these distant mythical shores and the well known contours of the Mediterranean was a space where all utopias and dystopias could be projected a space to discover and rediscover endlessly This volume addresses the constant interplay between the real and the imaginary significance of the sea in ancient thought from philosophy and science to shipbuilding trade routes military technology poetry mythmaking and iconography The volume spans a period of almost two millennia and an area that covers Spain to India and China and West Africa to the British Isles demonstrating the global interconnection of cultures and trade conceived in its broadest possible sense in the ancient world

Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic Erokhin, Vasilii, Gao, Tianming, Zhang, Xiuhua, 2018-12-28 Global interest in the exploration of the Arctic has been growing rapidly As the Arctic becomes a global resource base and trade corridor between the continents it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the

environment The Handbook of Research on International Collaboration Economic Development and Sustainability in the Arctic discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic Featuring research on topics such as agricultural production environmental resources and investment collaboration this book is ideally designed for policymakers business leaders and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Arctic region

Measuring the Universe Kitty Ferguson, 2013-01-31 Suppose you and I still wondered whether all of the pinpoints of light in the night sky are the same distance from us Suppose none of our contemporaries could tell us whether the Sun orbits the Earth or vice versa or even how large the Earth is Suppose no one had guessed there are mathematical laws underlying the motions of the heavens How would how did anyone begin to discover these numbers and these relationships without leaving the Earth What made anyone even think it was possible to find out how far without going there In Measuring the Universe we join our ancestors and contemporary scientists as they tease this information out of a sky full of stars Some of the questions have turned out to be loaded and a great deal besides mathematics and astronomy has gone into answering them Politics religion philosophy and personal ambition all have played roles in this drama There are poignant personal stories of people like Copernicus Kepler Newton Herschel and Hubble Today scientists are attempting to determine the distance to objects near the borders of the observable universe far beyond anything that can be seen with the naked eye in the night sky and to measure time back to its origin The numbers are too enormous to comprehend Nevertheless generations of curious people have figured them out one resourceful step at a time Progress has owed as much to raw ingenuity as to technology and frontier inventiveness is still not out of date

Farewell Britannia Simon Young, 2010-12-09 A vivid and gripping account of Roman Britain written as a family history Brilliant young historian Simon Young has invented a multi generational family part Roman part Celtic invaders intermarrying with natives to tell the dramatic story of 400 years of Roman rule in Britain Vivid historical detail is balanced by a real feel for the psychological depth of the individual stories The narrator is writing this family history in 430 AD realising the Romans will never return He chooses 14 of the most interesting but not always the most admirable of his ancestors The big events of Roman Britain are all here scouting for Caesar s expedition in 55 BC the Roman invasion in 43 AD Boudicca s revolt and the massacre of 70 000 Romans the Pict attacks on Hadrian s Wall the great Barbarian Conspiracy of 367 and the sudden cataclysmic departure of the legions in 410 But there are plenty of non military episodes spying on the Druids a centurion dreaming of retirement with a young slave he has bought an ambitious wife on the northern frontier a bad poet in Londinium infanticide in Surrey a young Christian girl facing martyrdom in a British amphitheatre

The Great Journeys in History Robin Hanbury-Tenison, 2021-05-04 A lively collection of the adventurous stories of the greatest explorers in history Ferdinand Magellan Genghis Khan Thor Heyerdahl Amelia Earhart and Neil Armstrong these are some of the greatest travelers of all time This book chronicles their stories and

many more describing epic voyages from early trips through the great port city of Alexandria to the latest journeys into space In antiquity we follow Alexander the Great to the Indus and Hannibal across the Alps in medieval times we trek beside Genghis Khan and Ibn Battuta The Renaissance eventually led to Columbus visiting the Americas and to the circumnavigation of the world In the following centuries global maps are filled in by Abel Tasman Vitus Bering and James Cook Journeys specifically made for scientific discoveries most famously by Alexander von Humboldt and Charles Darwin begin In modern times the ends of the earth were reached including both poles and the world s highest mountain Editor Robin Hanbury Tenison leads an incredible team of fifty two contributors including Robert Ballard and Ranulph Fiennes who relate firsthand experiences with the journeys and places they describe The Great Journeys in History chronicles the stories of bold early travelers who explored the unexplored and who set out into the unknown bringing alive the romance and thrill of adventure
