Restructuring the European State Paolo Dardanelli, 2017-12-12 Since 1950 devolution reforms have been widespread
across Western Europe leading to constitutional transformation in Belgium Italy Spain and the United Kingdom as well as the
potential for state breakup as witnessed by independence referendums in Scotland and Catalonia Over the same period
European integration has transferred power upwards to what is now the European Union The simultaneous occurrence of
these seemingly contradictory trends raises fundamental questions Is state restructuring a uniform process Has it been
fuelled by European integration and if so how Restructuring the European State uses a comparative analysis to present a
systematic investigation of the connections between European integration and state restructuring Paolo Dardanelli argues
that there are two distinct dynamics of state restructuring bottom up where one or more regions demand self government
and top down where the central government decides to devolve power Through quantitative analyses of thirteen key phases
of state restructuring in Belgium Denmark France Italy Spain and the United Kingdom he shows that European integration
has a powerful influence only in bottom up cases Dardanelli points to a striking paradox of integration whereby an ethos of
Europe growing ever closer to union has become associated with fragmentation divergence and increased complexity rather
than a seamless system of multilevel governance Innovative and rigorously researched Restructuring the European State

Arqueología, patrimonio y nacionalismo en Cataluña (1850-1939)* Francisco Gracia Alonso, 2018-12-17. Como afirma Michel Foucault, los arqueólogos recomponen los estratos del pasado para entender el presente y en efecto desde principios del siglo XIX los estados europeos utilizaron la investigación arqueológica para definir modelos de cohesión social a partir de la interpretación del pasado. En Cataluña, Enric Prat de la Riba construyó su ideario nacionalista empleando las fuentes clásicas para vincular los orígenes del territorio con Grecia y potenciar las intervenciones en Empúries con el objetivo de demostrar factualmente sus tesis. Esta obra analiza el desarrollo de la arqueología en Cataluña desde la segunda mitad del siglo XIX hasta la Guerra Civil, prestando especial atención al discurso ideológico del catalanismo político que concibió la arqueología como un instrumento para proyectar una determinada visión de la historia, lo que no impidió que el trabajo científico de la Escuela de Barcelona se convirtiera en un referente en el ámbito europeo.
