Quantitative Methods In On Line Systems:

Quantitative Methods in On-line Systems John A. T. Pritchard, 1976 The objectives of this book are to describe queuing theory and other quantitative methods to show how these methods may be applied in the design of an on line system In particular it discusses how response times are estimated how an efficient data transmission block size is determined and how system availability is investigated The book is written for systems designers and consultants who will be concerned with the sizing of an online system Computer professionals who have to carry out response time calculations and design systems which meet specified performance criteria are faced with such questions as what types of component is required How many components are required How should the components be interconnected This book explains methods which can be of assistance in answering questions like these The reader may be someone who has or may be expected at some future date to design a system or someone who will have to evaluate alternative proposals prepared for his organizations by equipment suppliers or by a consultancy company It is assumed that the reader is familiar with batch data processing **Wiley CMA**

United Nations Office of Drugs and Crime around 284 million people aged between 15 and 64 years used drugs in the year 2020 In addition it is estimated that over 11 million people were injecting drugs and half of these were living with hepatitis C Young people are using more drugs than previously and numbers have increased over the past decade While numbers are estimated at a global level there remains little evidence for practitioners and policy makers on key questions such as how many people are using drugs that are hidden and haven t contacted services Questions include the challenging topics of providing safe injecting spaces and drug consumption rooms As populations age in some regions questions arise on the nature of substance use among older people Countries with younger populations are concerned about estimates on the numbers of children potentially impacted by parental substance use and how to engage with them Awareness of trauma informed services is increasing and questions arise on the impact of domestic abuse or adverse childhood experiences on people who use drugs and their families Globally there is a growing concern on how to inform the debate on cannabis policies and how to assess if the chosen policy will be acceptable to the general population The aim of this book is to provide researchers service providers and policy makers with a step by step guide to robust methodologies and illustrative case

studies to address these challenges The objective of each chapter is to answer a key question provide a summary of the background evidence demonstrate through a series of logical steps how to obtain national or local evidence and finally illustrate the process with detailed real life case studies As addiction is encountered across a wide range of professions and civil society organizations this book will be an essential textbook for graduate students of medicine nursing public health addiction psychology and health and social care professions It will be a guiding reference book for international national and local commissioners and providers of related policies and services At a local level the step by step case studies will provide an easy to follow framework for those wishing to apply the methods to benefit and improve their own practice service or policy

Using the ISO 56002 Innovation Management System Sid Benraouane,H. James Harrington,2021-06-29 In 2019 ISO Technical Committee 279 released a new international standard on innovation management system called ISO 56002 2019 The objective of this standard is to provide a framework on how to build an innovation ecosystem that can be sustained over time Similar to the quality management system that ISO established decades ago this standard provides instructions related to best practices on how to manage innovation activities projects and programs It does not describe detailed activities within the organization but rather provides guidance at a general level It does not prescribe any requirements or specific tools or methods for innovation activities Essentially the standard does not provide guidance on how to implement and or use the standard The standard basically tells you what to do and document this powerful book tells you how to do it The techniques in this book are directed at key tasks across the innovative process such as maximizing quality productivity maintainability usability and reliability while focusing on reducing the product cycle time and costs within the innovative process Currently there are no other comprehensive books available on how to fully implement this standard in companies This book is crucial for managers business leaders entrepreneurs and consultants looking for help to reap the benefits of an innovation management system This book takes you step by step through the process of developing an innovation ecosystem In addition it provides frameworks tools methodologies cases and best practices so your organization can experience the full value of the standard
