Looking Around A Journey Through Architecture:

Looking Around Witold Rybczynski, 1993 An inspired engaging look at what architecture is and how we live and work in it by the acclaimed author of *Home* and *The Most Beautiful House in the World* Rybczynski discusses buildings like the Wexner Center for the Visual Arts demonstrates how architecture actually works and more *An Illustrated Guide to Tactical Diagramming* Sid Heal, 2005-11 This book is not about construction although you will learn about building codes and practices It is not about tactics although the information gained by knowing a floor plan will undoubtedly affect them Instead this book is designed to provide a quick and simple method of confidently determining floor plans by using outside architectural features It assumes no knowledge of construction or tactics and is designed to be useful whether it is read cover to cover or occasionally referred to as a reference It provides time tested tried and true principles that any tactician can use to determine avenues of approach observation and fields of fire obstacles and cover or concealment not to mention where a suspect might be most vulnerable Using this essential tool for quick and clear comprehension of tactical diagramming even a novice tactical planner will learn to use windows doors vents and other clues to confidently determine interior features After reading this book it will be clear that the proverbial glass house is in the mind's eye **New York Magazine**, 1992-09-14 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea Reshaping Museum Space Suzanne Macleod, 2005-10-09 Reshaping Museum Space pulls together the views of an international group of museum professionals architects designers and academics highlights the complexity significance and malleability of museum space and provides reflections upon recent developments in museum architecture and exhibition design Various chapters concentrate on the process of architectural and spatial reshaping and the problems of navigating the often contradictory agendas and aspirations of the broad range of professionals and stakeholders involved in any new project Contributors review recent new build expansion and exhibition projects questioning the types of museum space required at the beginning of the twenty first century and highlighting a range of possibilities for creative museum design Essential reading for anyone involved in creating designing and project managing the development of museum exhibits and vital reading for students of the discipline **Designing a Place Called Home** James Wentling, 2012-12-06 are often lined with garages in front of houses that are clearly more internalized in design some even taking on a fortress like appearance Today's new homes are technically superior in construction i.e. they are more energy efficient weather resistant and maintenance free However they also seem to lack the warmth and charm of prewar homes for which more construction dollars were spent on quality veneers but in features and other human scale details The postwar need for massive amounts of affordable

housing for returning GIs helped to encourage building practices that could reduce on site labor and material costs in houses. The accommodation of the automobile cost cutting movements and a variety of other trends caused a gradual decline in the human social and emotional qualities of postwar residential architecture. This book will attempt to look at the issues and choices facing today's residential designers and home builders and ask: How can we make our new houses and neighborhoods more responsive to humanistic needs particularly in light of constant pressures to keep housing costs down? This question will generally be addressed by comparing historical designs to those of today to see if we might be able to reconsider some old fashioned ideas in new housing designs. **For the Record** Joan Grierson, 2008-03-31

When Marjorie Hill graduated in 1920 as Canada's first girl architect she was entering a profession that had been established in Canada just 30 years earlier. **For the Record** the first history of women architects in Canada provides a fascinating introduction to early women architects presented within the context of developments in both Europe and North America. Profiles of the women who graduated from the School of Architecture at the University of Toronto between 1920 and 1960 are illustrated with photographs of their work and include archival material that has never before been published. The final chapter on contemporary women in architecture showcases contributions by leading women architects across the country from Halifax to Vancouver to Iqaluit. **For the Record** also provides current information on schools of architecture in Canada and includes a list of other resources to encourage young women who are thinking of pursuing careers in architecture. **William C.**

Brocklesby: A Connecticut Valley Architect in the Gilded Age Bill Ranauro, 2023-07-07 The late nineteenth century known commonly as the Gilded Age produced some of the most beautiful yet controversial architecture in America's history. The great influencers of the period including Richard Upjohn, Henry Hobson Richardson and Charles McKim each spread the gospel of his own architectural style. The result was an eclectic mix of styles that some detested but that others embraced. Caught in the struggle to find an architecture America could claim as its own, Hartford Connecticut architect William Brocklesby carved out his own stylistic path. In an age when the taste for ostentation and pretension was adopted by many, William Brocklesby produced some of the most dignified and beautiful architecture in the Connecticut Valley. His churches, libraries and theaters remain as artistic landmarks throughout western New England and his work at colleges from Hartford to Amherst, Massachusetts make for some of the most picturesque college campuses in America. This book serves as a companion to the author's earlier book *Asher Benjamin American Architect*. Author Artist Taken together the two books provide a view of developments in American architecture from 1790 to 1910. **The Architecture of William C Brocklesby** Hailing from Hartford Connecticut architect William C Brocklesby 1847-1910 spent his career designing beautiful yet dignified churches, libraries and public buildings throughout the Connecticut River Valley and western New England. Working in an age when ostentation was the rule rather than the exception, Brocklesby maintained a restrained hand in the application of ornament. His design of Forbes Library in Northampton, Massachusetts stands out as a monument to his ability as a design

architect In addition William Brocklesby was among a handful of nineteenth century architects who made the Connecticut River Valley the birthplace of the prototypical American college campus Working largely within the vision of the famed American landscape architects Andrew Jackson Downing and Frederick Law Olmstead Brocklesby and others built campuses that were meant to mimic the traditional New England village Through the designs of the college buildings by Peabody and Stearns and William Brocklesby Smith College s architectural history traces the development of late nineteenth century styles National Register of Historic Places Inventory

A Theory of Urbanity Anton Zijderfeld,2017-09-29 Cities provide for people not just functionally in terms of jobs obligations and practical pursuits but also and above all emotionally We like some cities and detest others Despite shared

rationalizations and common modes of administration and design each city has its own culture A culture is typically human in that it contains all dimensions of the human personal condition from the lowest to the most sublime Urban culture comprises both economic and civic culture and is the source of a city's vitality For today's urban sprawls which have a weak and failing economic and civic culture the task of the urban administration and various economic and civic organizations is to strengthen conditions that can prevent the emergence of urban anomie With suburbanization the edge city and the emergence of cyberspace some argue that cities as integrated places of working and living are things of the past Zijderfeld argues that people are and remain social animals who like and need one another's company particularly in their economic socio cultural and political activities Throughout the ages cities have provided the environment in which people fulfill these needs Anton Zijderfeld discusses urban preferences the organizations and ramifications of urbanity the modernization of urban culture the uneasy alliance between urbanity and the interventionist state and the cultural dimensions of urban renewal Zijderfeld sees the economic and civic culture of the city as the centerpiece of contemporary urban management and contemporary urban democracy In this sense the new technology is an ally of the new urban renewal Most postmodern treatises on the end of the city are impressionistic and unsystematic In contrast Zijderfeld puts the qualitative dimensions of city life into focus catching its pulse and cultural rhythms in a systematic context that prior studies have lacked As such it will be of great interest to urban administrators p

Mapping St. Petersburg Julie A. Buckler, 2018-06-05 Pushkin's palaces or Dostoevsky's slums Many a modern day visitor to St Petersburg has one or more likely both of these images in mind when setting foot in this stage set like setting for some of the world's most treasured literary masterpieces What they overlook is the vast uncharted territory in between In Mapping St Petersburg Julie Buckler traces the evolution of Russia's onetime capital from a conceptual hierarchy to a living cultural system a topography expressed not only by the city's physical structures but also by the literary texts that have helped create it By favoring noncanonical works and underdescribed spaces Buckler seeks to revise the literary monumentalization of St Petersburg with Pushkin and Dostoevsky representing two traditional albeit opposing perspectives to offer an off center view of a richer less familiar urban landscape She views this grand city the product of Peter the Great's ambitious vision not only as a geographical entity but also as a network of genres that carries historical and cultural meaning We discover the busy messy middle ground of this hybrid city through an intricate web of descriptions in literary works nonfiction writings such as sketches feuilletons memoirs letters essays criticism and urban legends lore songs and social practices all of which add character and depth to this refurbished imperial city

Architecture Depends Jeremy Till, 2013-02-08 Polemics and reflections on how to bridge the gap between what architecture actually is and what architects want it to be Architecture depends on what On people time politics ethics mess the real world Architecture Jeremy Till argues with conviction in this engaging sometimes pugnacious book cannot help itself it is dependent for its very existence on things outside itself Despite the claims of autonomy purity and control that architects like to make about their practice architecture is buffeted by uncertainty and contingency Circumstances invariably intervene to upset the architect's best laid plans at every stage in the process from design through construction to occupancy Architects however tend to deny this fearing contingency and preferring to pursue perfection With *Architecture Depends* architect and critic Jeremy Till offers a proposal for rescuing architects from themselves a way to bridge the gap between what architecture actually is and what architects want it to be Mixing anecdote design social theory and personal experience Till's writing is always accessible moving freely between high and low registers much like his suggestions for architecture itself
