Desire Elise Morrison, 2016-10-12 *Discipline and Desire* examines how surveillance technologies when placed within the frames of theater and performance can be used to critique and reimagine the politics of surveillance in everyday life. The book explores how rapidly proliferating surveillance technologies including drones, CCTV cameras, GPS tracking systems, medical surveillance equipment, and facial recognition software can be repurposed through performance to become technologies of ethical witnessing, critique, and action. While the subject of surveillance continues to provoke fascination and debate in mainstream media and academia, opportunities to critically reflect upon and more importantly to imagine alternative creative responses to living in a rapidly expanding surveillance society have been harder to find. Author Elise Morrison argues that such opportunities are being created through the growing genre of surveillance art and performance, defined as works that centrally employ technologies and techniques of surveillance to create theater, installation, and performance art. Introducing readers to a broad range of surveillance art works including the work of artists and activists such as Surveillance Camera Players, Jill Magid, Steve Mann, Hasan Elahi, Wafaa Bilal, Blast Theory, Electronic Disturbance Theater, George Brant, Janet Cardiff, Mona Hatoum, and Zach Blas, *Discipline and Desire* provides a practical and analytical framework that can aid the diverse pursuits of new media arts practitioners, performance scholars, activists, and hobbyists interested in critical and creative uses of surveillance technologies.

Unmaking Waste Sarah Newman, 2023-05-26 In *Unmaking Waste*, Sarah Newman asks what happens when there are disagreements about what constitutes waste and what one should do with it, both at singular moments in time (for example, when ideas about waste collide in emerging colonial contexts) and across time (such as between those who left things behind in the past and the archaeologists who recover them). Newman examines ancient Mesoamerican understandings of waste, Euro-American perceptions of waste in New Spain, and early modern European ideals of civility and Christian understandings of good and bad expressed metaphorically through cleanliness and filth. These differing perceptions, Newman argues, demand that we rethink centuries of assumptions imposed on other places, times, and peoples so long as waste remains a category misunderstood to be common, sensible, and stable. Archaeological methods will prove unequal to their task; Newman instead proposes anamorphic archaeology, an approach that emphasizes the possibility that archaeological objects have multiple physical and conceptual lives.
